HOW CAN GP2U HELP YOUR BUSINESS?

GP2U is a service that allows patients to see doctors using video conferencing, so rather than the patient going to the doctor the doctor comes to the patient, wherever they are.

Access to expert healthcare is, in many parts of Australia, problematic. Most specialists live and work in the major metropolitan centres so patient access can be a real problem. We hope that you will join us and help deliver part of the solution.

Currently patients in rural and remote areas, Residential Aged Care Facilities, and Aboriginal Medical Service facilities are eligible for Medicare funded Telehealth.

The financial benefits flowing to you from seeing these patients are as follows:

- \$1300 following your first consultation and a further \$2600 following your 10th (Until 1st July 2014).
- A 50% premium on top of the MBS Schedule Fee for the applicable service (Ongoing).
- A \$39 Telehealth Service Incentive (Until 1st July 2014).
- A \$13 Bulk Billing Bonus (Until 1st July 2014).

The net effect of all this is shown in the table below:

Item Number	Schedule Fee	Telehealth Item	Schedule Fee	Combined Total	Bulk Bill Yield	+ \$13 BB Bonus	+ \$39 Service Incentive
104	85.55	99	42.77	128.32	109.08	122.08	161.08

The nitty gritty about integrating Telehealth into your practice follows below.

It looks long, but it's really like a comic book with lots of pictures (screenshots) and only a few words.

WHAT IS GP2U?

GP2U is a service that allows patients to see doctors using video conferencing, so rather than the patient going to the doctor the doctor comes to the patient, wherever they are.

The service handles all the details of managing bookings, connecting video conferences, Medicare billing, DB4 assignment of benefit forms, notes, and remote prescribing.

Our service is available 7 days a week 365 days a year.

You are free to use as little or as much of the service as fits your clinical workflow.

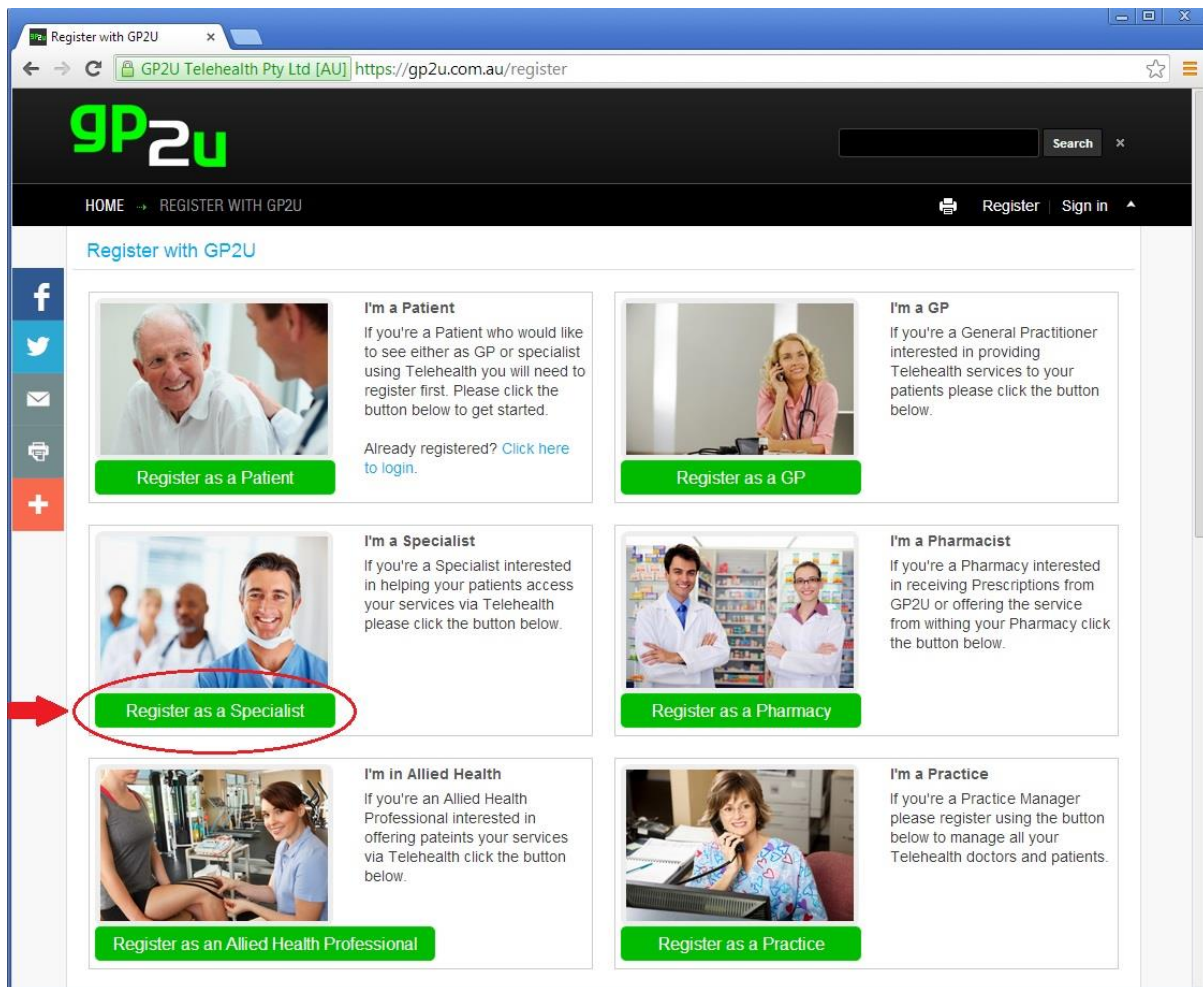

REGISTERING WITH GP2U IS EASY AND COMES WITH A ONE MONTH, NO OBLIGATION, FREE TRIAL!

Registration as a Specialist with GP2U is easy. Simply click this link to register.

<https://gp2u.com.au/registration?group=Specialist>

OR

Registration takes less than two minutes. Just fill in the blanks for each step.

Step 1 Just fill out your title (optional), first name, last name, and your preferred salutation.

The screenshot shows the 'Registration Step 1' form. The header includes the GP2U logo and a search bar. The main content area is titled 'Registration Step 1' and shows a progress bar with five steps: Name (completed), Password, Address, Phone, and Register. The form fields include:

- Title (Optional)
- First Name
- Surname
- Salutation

Below the Salutation field, there is a note: "Please tell us how you would you like to be addressed? e.g. Dear Dr Zhivago, Hi Bill, Greetings Sir Richard...". A green 'Next >' button is at the bottom.

Step 2 – Please invent a username (one that you can remember) and password (type until the bar goes green). Then add an email that you use regularly and your specialty from the drop down list, then click next.

Registration Step 2

GP2U Telehealth Pty Ltd [AU] https://gp2u.com.au/registration/step2

gp2u

HOME

Registration Step 2

Name Password Address Phone Register

Username GP2UTestSpecialist Available

Password Passwords match

Email Address admin@gp2u.com.au

Email Address admin@gp2u.com.au Email addresses match

Speciality Nuclear Medicine

Next >

Step 3 – We need your current address, city/town, postcode. We use your geographical location to automatically set your time zone. In practice what this means is that everyone on the system sees appointment times reported in local time. So a 10 am appointment in Queensland will appear as 8 am in WA.

Registration Step 3

GP2U Telehealth Pty Ltd [AU] https://gp2u.com.au/registration/step3

gp2u

HOME

Registration Step 3

Name Password Address Phone Register

Address (1) 1 King Street

Address (2) Optional

City/Town Perth Optional

Postcode 6000

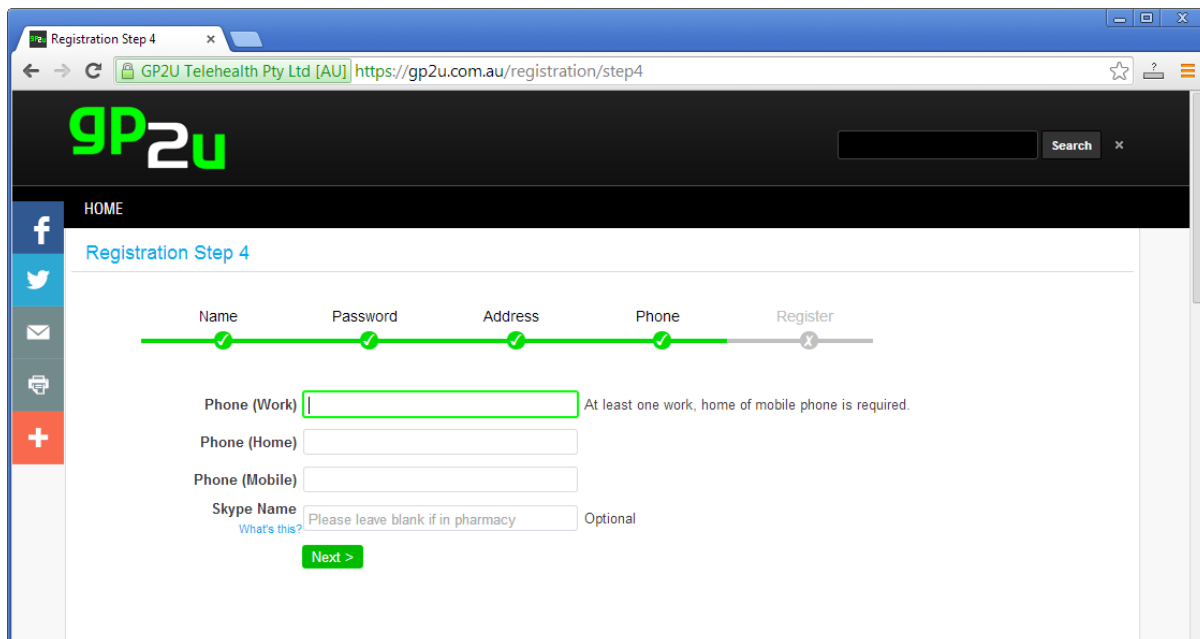

State Western Australia Australia Only

Country Australia

Time Zone Perth [GMT+8.0]

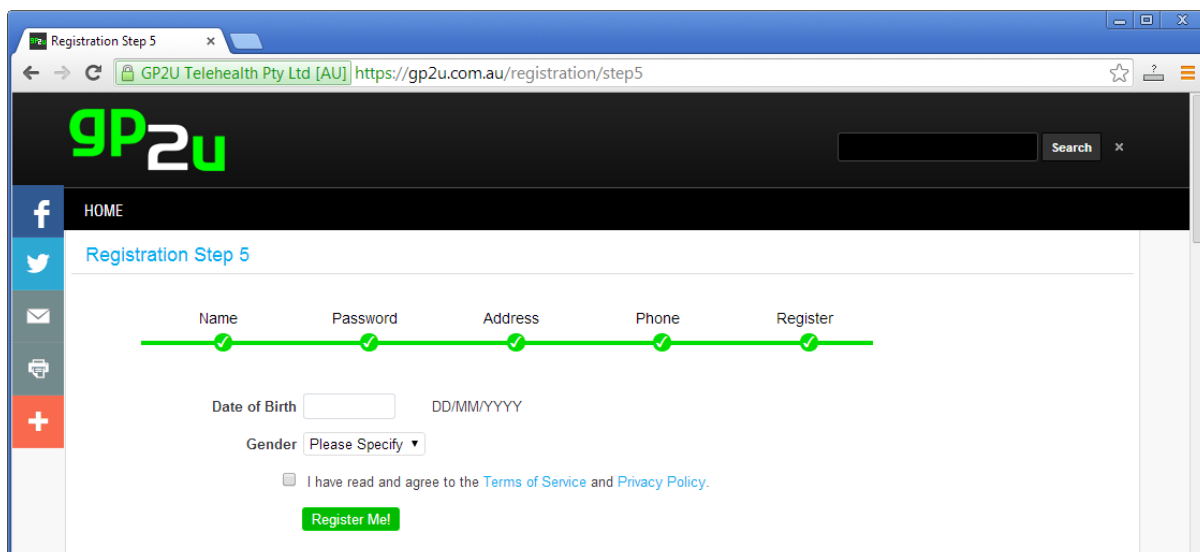

Next >

Step 4 – Please give us at least one phone number and your Skype login if you have one. You don't need Skype to use GP2U because we have inbuilt WebRTC video conferencing, but you are free to use Skype if you wish. The choice is yours.

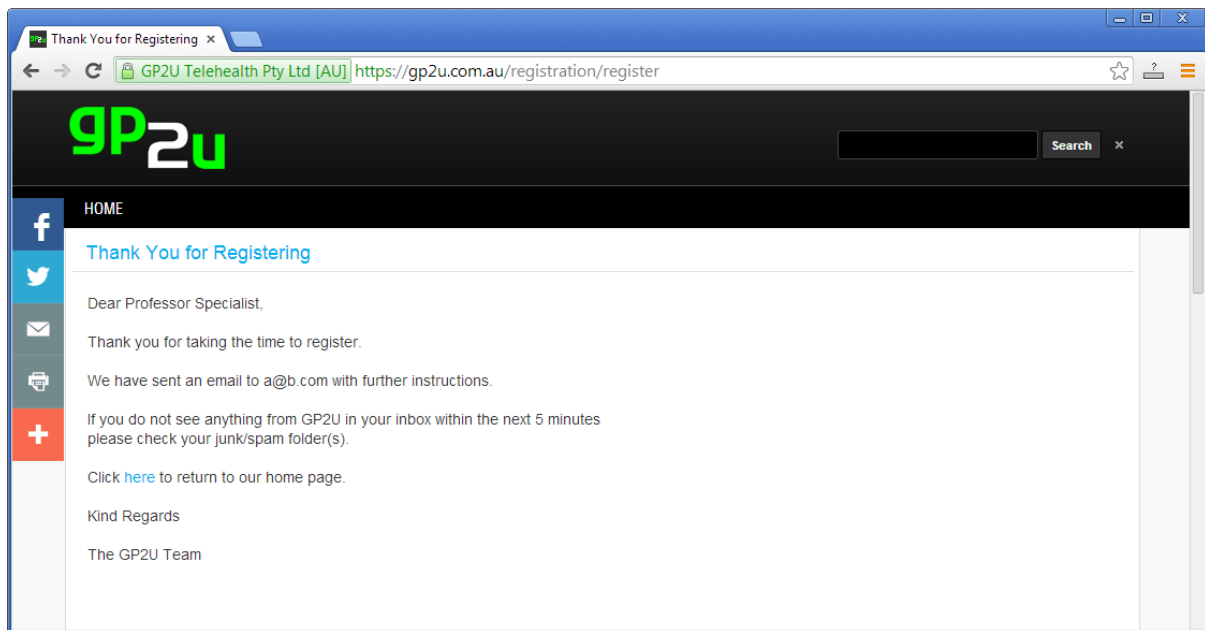

The screenshot shows the 'Registration Step 4' page on the GP2U website. The browser address bar shows 'https://gp2u.com.au/registration/step4'. The page features the GP2U logo and a search bar. A progress bar at the top indicates that 'Name', 'Password', 'Address', and 'Phone' steps are completed (marked with green checkmarks), while the 'Register' step is not (marked with a red X). Below the progress bar, there are input fields for 'Phone (Work)', 'Phone (Home)', and 'Phone (Mobile)'. A note states: 'At least one work, home or mobile phone is required.' There is also a field for 'Skype Name' with a hint 'Please leave blank if in pharmacy' and a link 'What's this?'. A green 'Next >' button is at the bottom.

Step5 – Just add your DOB and gender, agree to the terms.....

The screenshot shows the 'Registration Step 5' page on the GP2U website. The browser address bar shows 'https://gp2u.com.au/registration/step5'. The progress bar now shows all five steps ('Name', 'Password', 'Address', 'Phone', and 'Register') completed with green checkmarks. The main form area contains a 'Date of Birth' field with a placeholder 'DD/MM/YYYY', a 'Gender' dropdown menu with 'Please Specify' selected, and a checkbox for 'I have read and agree to the Terms of Service and Privacy Policy.' A green 'Register Me!' button is at the bottom.

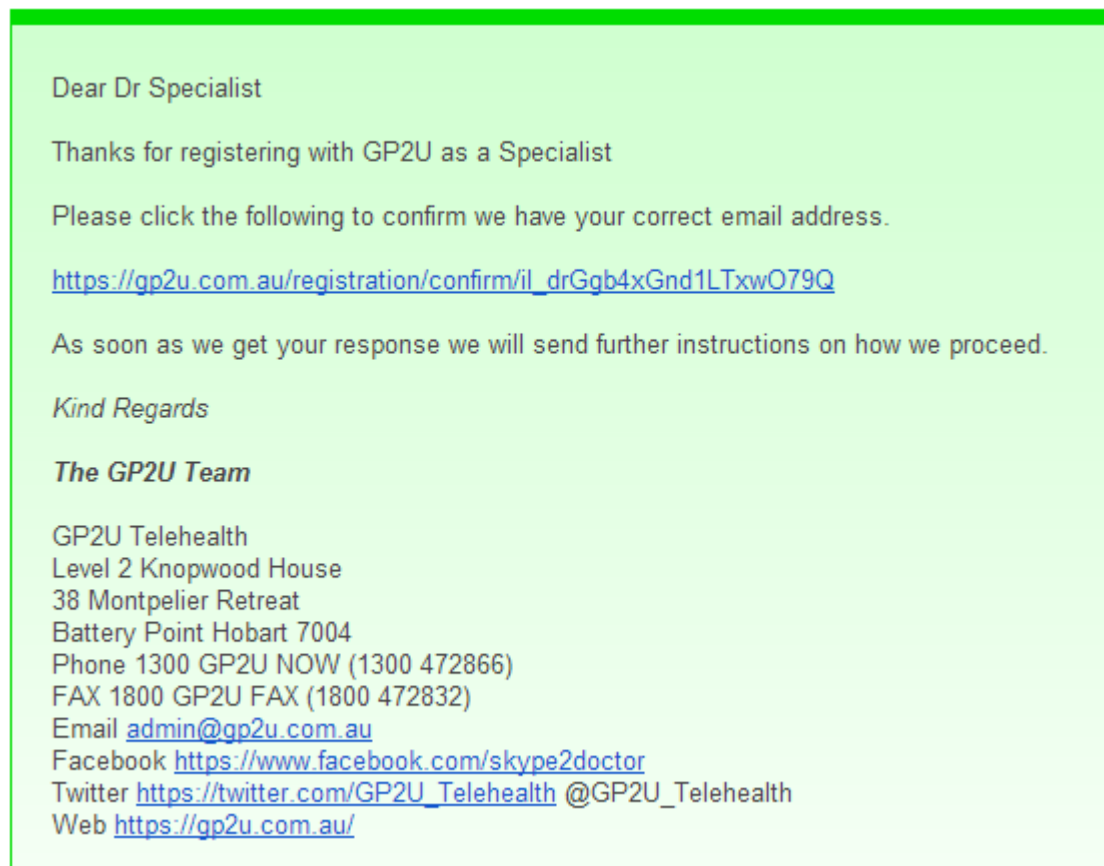

Now just click the "Register Me!" button.

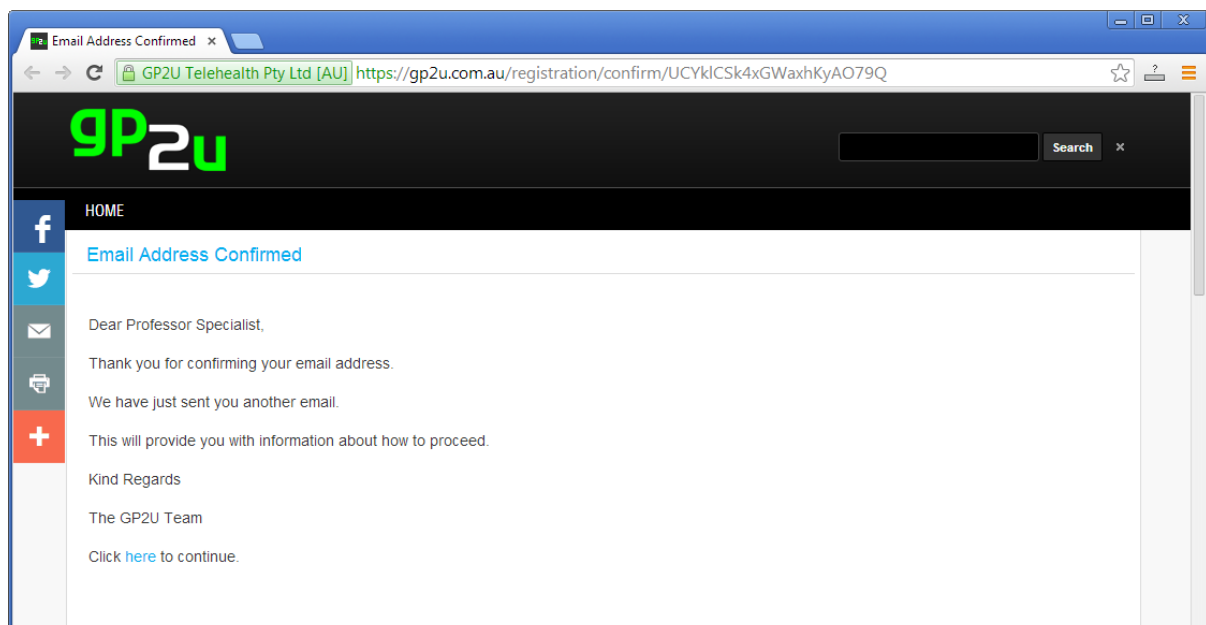

If you choose to integrate Telehealth within your practice we charge a \$1495 annual service fee to cover our costs, which includes the support you will need to get things working smoothly. This fee is more than covered by your first consult.

Patients and GPs are not charged to use the system to book Specialist appointments.

At the completion of your registration you will get an email from us asking you to click a link to confirm we have your correct email address.

Clicking on the link will take you to this page:

It will also send you the following email:

Dear Dr Specialist

Thanks for confirming your registration with GP2U as a specialist.

Your username is: test.a.specialist

You have nominated your specialty as: Cardiology

One of our consultants will be in contact shortly to assist with your accreditation.

We are sure you'll understand why it's vital that every Specialist we make available via our system is who they say they are.

Our accreditation process is as quick, painless, and practical as we can possibly make it. The things we need that may not be immediately to hand include:

Photographic ID (Driver's licence or Passport)
Proof of AHPRA Registration
Proof of Specialist Status with Medicare
Certificate of Medical Indemnity
Medicare Provider Number
The names and phone numbers of 3 professional referees

You can speed the process up by sending these details to:

Fax: 1800 GP2U FAX (1800 472832)
Email: admin@gp2u.com.au

Before our system will allow patients under 18 years of age to make bookings with you a Working With Children Check is required. This is entirely optional.

You will find a range of resources on our website. Some that may be of immediate use include:

How to set up video conferencing: https://gp2u.com.au/how_to/setup_videoconferencing.html

Frequently Asked Questions: <https://gp2u.com.au/faq.html>

Introductory videos: <https://gp2u.com.au/video.html>

Congratulations on your insightful decision to explore the possibilities presented by the new Medicare Telehealth provisions. We hope it brings a new and interesting dimension to your current practice.

If you have any questions please feel free to contact us at:

Web: <https://gp2u.com.au/contactus>
Phone: 1300 GP2U NOW (1300 472866) - this is a 24/7/365 service

Kind Regards

The GP2U Team

ACCREDITATION PROCESS

You will notice we have an accreditation process and are sure you'll understand why it's vital that every Specialist we make available via our system is who they say they are.

Our accreditation process is as quick, painless, and practical as we can possibly make it. The things we need that may not be immediately to hand include:

- Photographic ID (Driver's licence or Passport)
- Proof of AHPRA Registration
- Proof of Specialist Status with Medicare
- Certificate of Medical Indemnity
- Medicare Provider Number
- The names and phone numbers of 3 professional referees

As soon as we have these details from you, we will be able to make your account active.

You can send these through via email or fax to:

Email: admin@gp2u.com.au

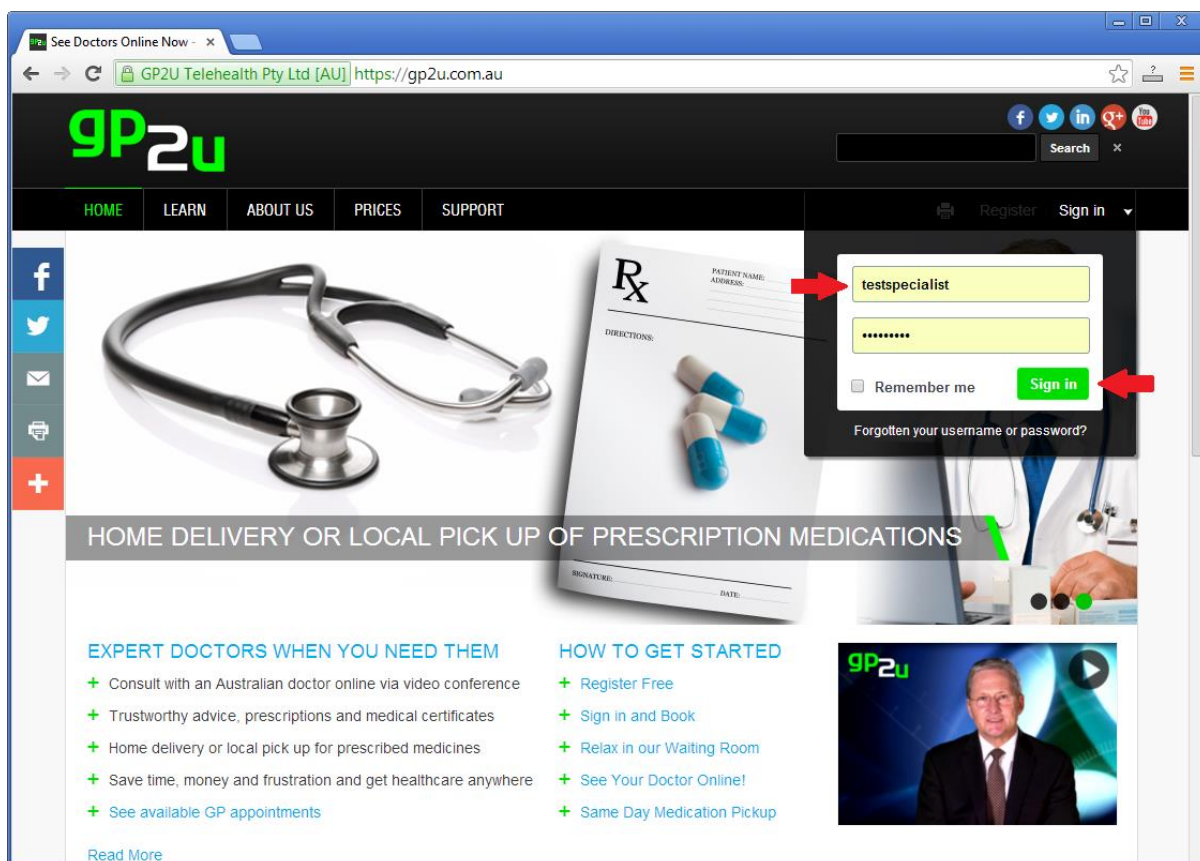

FAX: 1800 472832

You will receive a welcome email as soon as your account is activated.

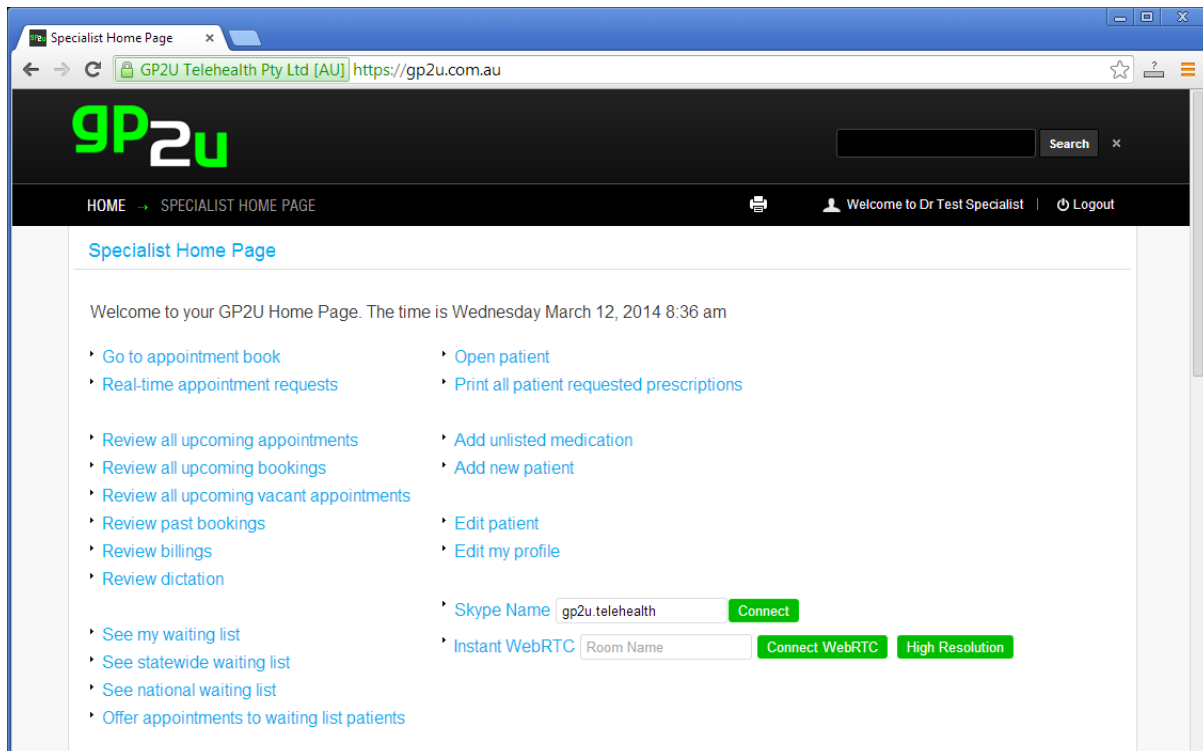

Once your account is active you can login.

LOGGING IN

You login from our home page:

This brings you to your home page:

There is quite a lot to see here but it is all quite straightforward with each link doing what you expect it to do and no hidden menus. It is all divided into logical chinks.

Patients login exactly the same way but have a different home page, appropriate to their needs.

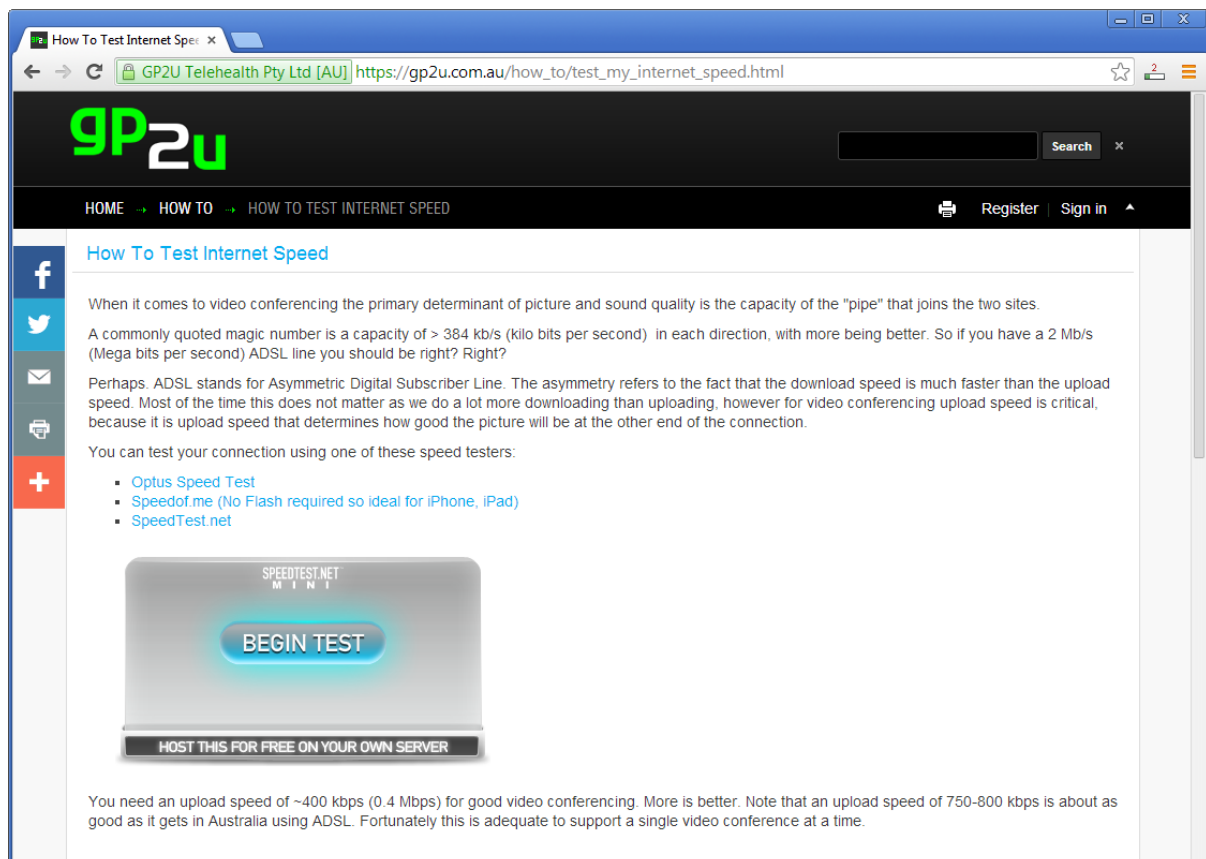

SETTING UP GP2U IN YOUR PRACTICE

INTERNET

It will not be possible to offer video consultations within your practice unless you have adequate Internet connectivity, so before going any further please go to:

https://gp2u.com.au/how_to/test_my_internet_speed.html

Click on the “Begin Test” button:

When it comes to video conferencing the primary determinant of picture and sound quality is the capacity of the "pipe" that joins the two sites. A commonly quoted magic number is a capacity of > 384 kb/s (kilo bits per second) in each direction, with more being better. So, if you have a 2 Mb/s (Mega bits per second) ADSL line you should be right? Right? Perhaps.

ADSL stands for Asymmetric Digital Subscriber Line. The asymmetry refers to the fact that the download speed is much faster than the upload speed. Most of the time this does not matter as we do a lot more downloading than uploading, however for video conferencing upload speed is critical, because it is upload speed that determines how good the picture will be at the other end of the connection.

You need an upload speed of ~400 kbps (0.4 Mbps) for good video conferencing. More is better.

Note that an upload speed of 750-800 kbps is about as good as it gets in Australia using ADSL. Fortunately this is adequate to support a single video conference at a time.

You want to see something like this:

How To Test Internet Speed

How To Test Internet Speed

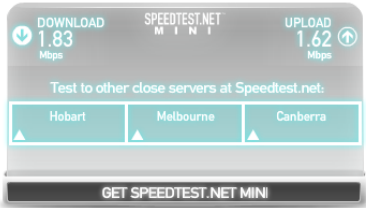

When it comes to video conferencing the primary determinant of picture and sound quality is the capacity of the "pipe" that joins the two sites.

A commonly quoted magic number is a capacity of > 384 kb/s (kilo bits per second) in each direction, with more being better. So if you have a 2 Mb/s (Mega bits per second) ADSL line you should be right? Right?

Perhaps. ADSL stands for Asymmetric Digital Subscriber Line. The asymmetry refers to the fact that the download speed is much faster than the upload speed. Most of the time this does not matter as we do a lot more downloading than uploading, however for video conferencing upload speed is critical, because it is upload speed that determines how good the picture will be at the other end of the connection.

You can test your connection using one of these speed testers:

- Optus Speed Test
- Speedof.me (No Flash required so ideal for iPhone, iPad)
- SpeedTest.net

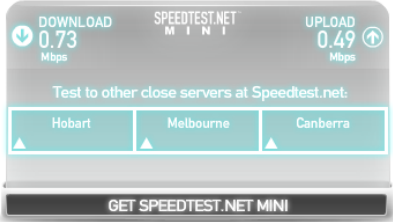

Test to other close servers at Speedtest.net:

Hobart Melbourne Canberra

GET SPEEDTEST.NET MINI

You need an upload speed of ~400 kbps (0.4 Mbps) for good video conferencing. More is better. Note that an upload speed of 750-800 kbps is about as good as it gets in Australia using ADSL. Fortunately this is adequate to support a single video conference at a time.

You don't want to see something this slow; this is right on the borderline.....

Test to other close servers at Speedtest.net:

Hobart Melbourne Canberra

GET SPEEDTEST.NET MINI

You need an upload speed of ~400 kbps (0.4 Mbps) for good video conferencing. More is better. Note that an upload speed of 750-800 kbps is about as good as it gets in Australia using ADSL. Fortunately this is adequate to support a single video conference at a time.

COMPUTER

Virtually any modern computer available at Harvey Norman, Dick Smith, JB HiFi, etc will be adequate.

We need the following components.

- A modern computer around the \$800-1000 price point.
- Laptops work well.
- Net books do not work well.

CAMERA

- If you are using a desktop computer and need to add a camera we have found the top of the range Logitech Webcams (~\$120) work best. These have Carl Zeiss autofocus lenses.
- Cheaper laptops have poor quality cameras.

MICROPHONE

- Microphones are typically integrated with Webcams. The main reason to buy a top end Webcam is to get a good microphone.
- Cheaper laptops have poor quality microphones.

SPEAKERS

- Virtually any set of external speakers will do.

Cheaper laptops have poor quality speakers.

We will be happy to work with you to help get this setup.

SETTING UP VIDEO CONFERENCING

We use both Skype and WebRTC for video conferencing. If you know how to use Skype feel free to use that.

Using WebRTC via Google Chrome makes seeing a doctor online as simple as logging into our website and going to the virtual waiting room.

Here's how you do it.

DOWNLOAD AND INSTALL GOOGLE CHROME

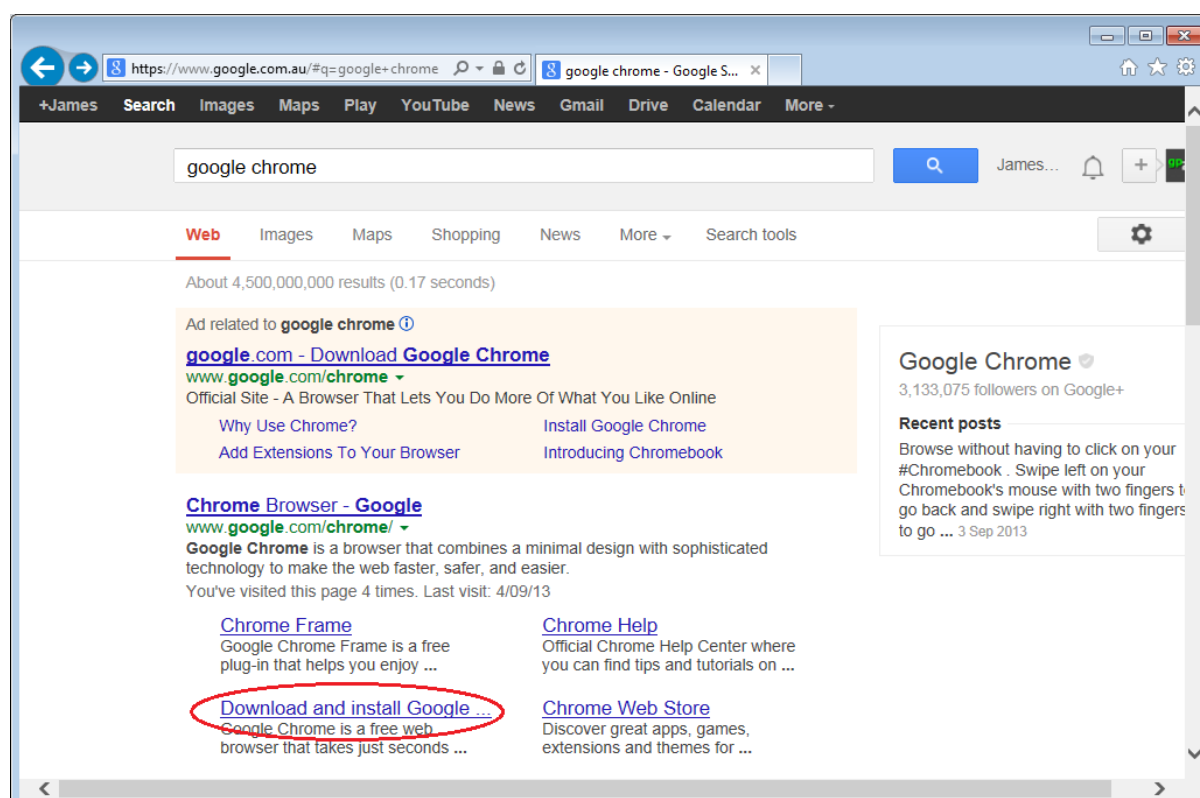

Once you have established you have adequate Internet connectivity and sourced a suitable computer, we need to make it easy to video conference.

Google Chrome is Google's free web browser.

As well as being faster and more reliable than Internet Explorer, it comes complete with inbuilt WebRTC based video conferencing.

While we support all of Skype, H323, and SIP based video conferencing, WebRTC is a very convenient option for patients as all they need to do is go to our site, login and go to the Virtual Waiting Room and everything is automatically setup for them.

Chrome is easy to find:

Just follow the prompts and Chrome will be installed in no time.

If downloading using Windows 8 –

- Go to desktop (from metro interface)
- Open Internet Explorer
- Type "google.com" into the address bar
- Type 'download chrome' into Google

- Follow the instructions.

To make it easier – just click this link <https://support.google.com/chrome/answer/95346?hl=en-GB> and then click the "Download Chrome" button.

SET GP2U AS THE HOME PAGE IN GC

To make things as robust and reliable as possible, it works well to set up GP2U as the home page in Google Chrome.

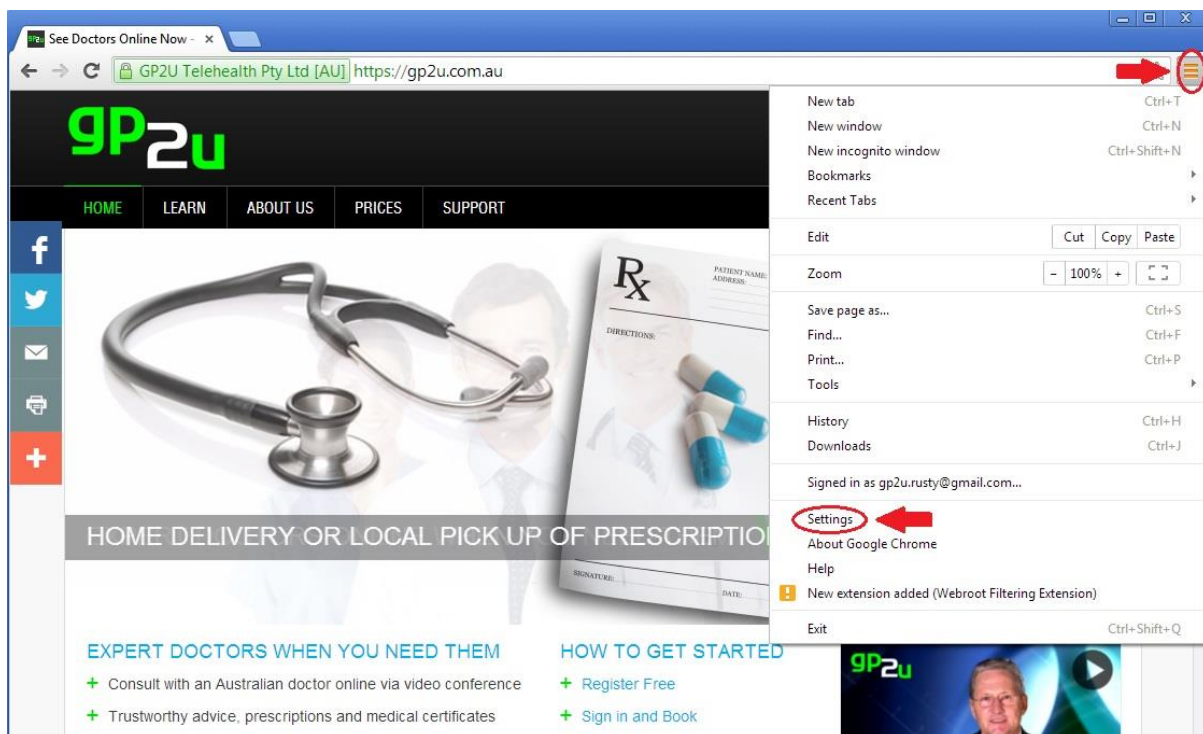

That way all you have to do is open Chrome and things will be ready.

First browse to <https://gp2u.com.au>.

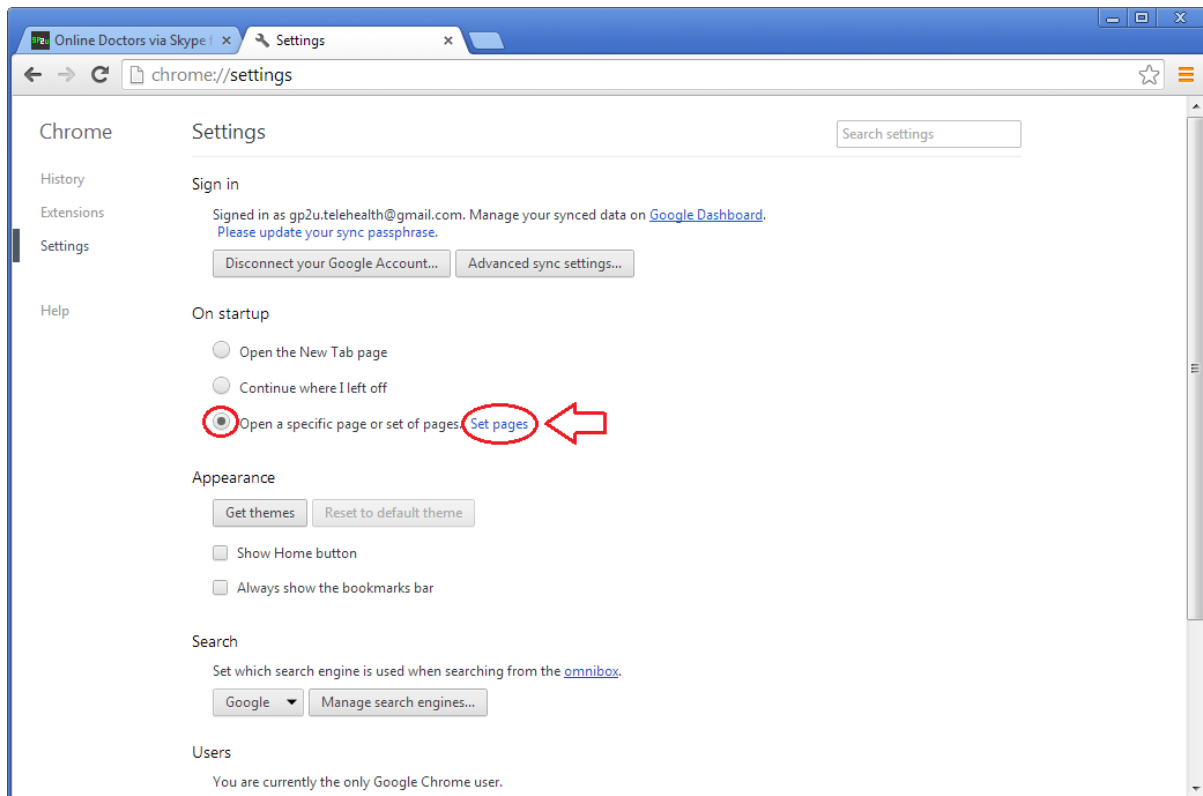

Just type in gp2u.com into Chrome and our site will appear.

Now let's set this as the home page.

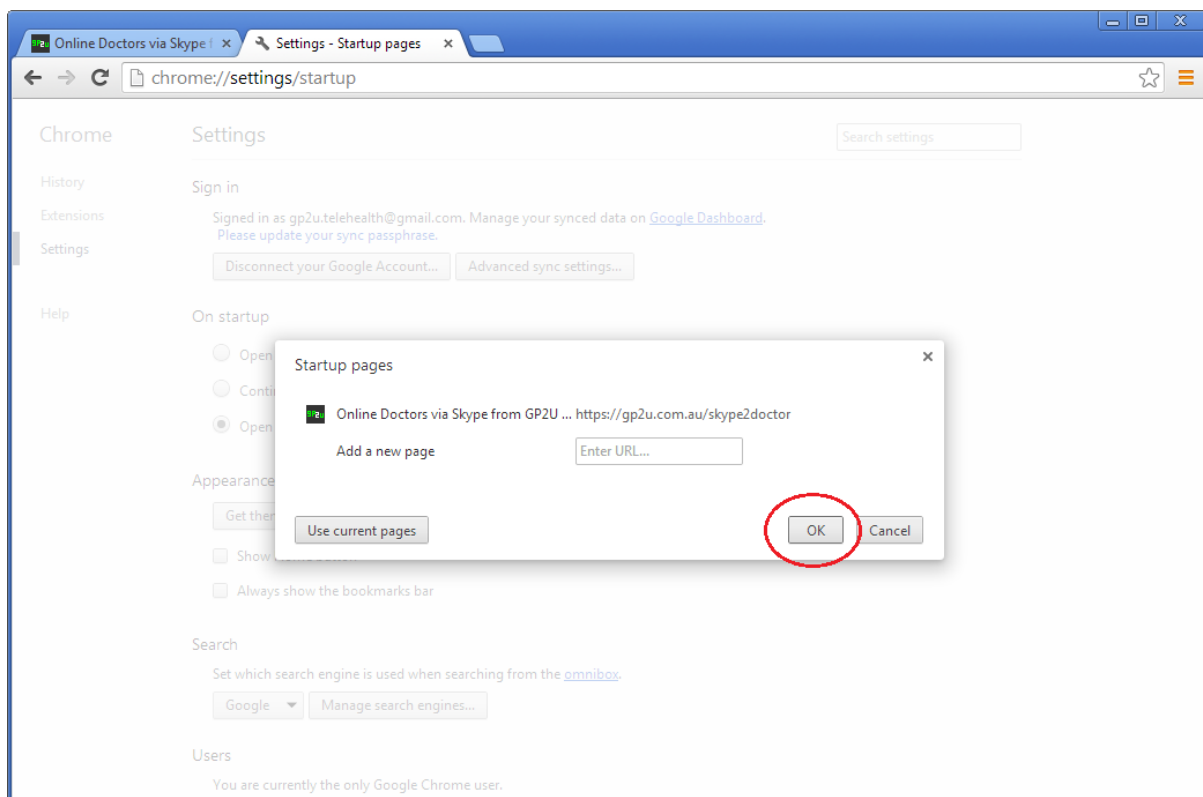

- First, click on the 3 horizontal lines near the top right.
- This brings up a menu.
- In this menu click on the settings link as shown below

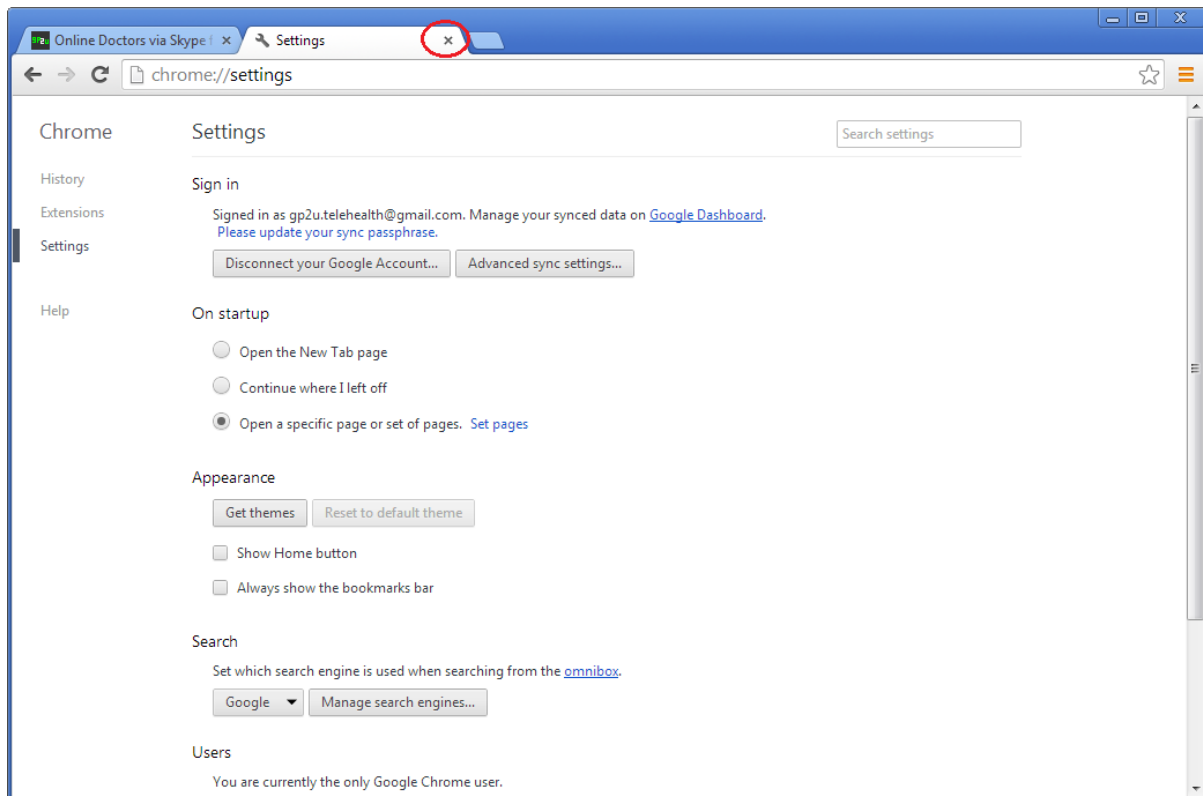

Now click the radio button next to “Open a specific page or set of pages” then click the “Set pages” link

Which will bring you to this page:

Click OK and then close the settings tab by clicking on the “X” as shown:

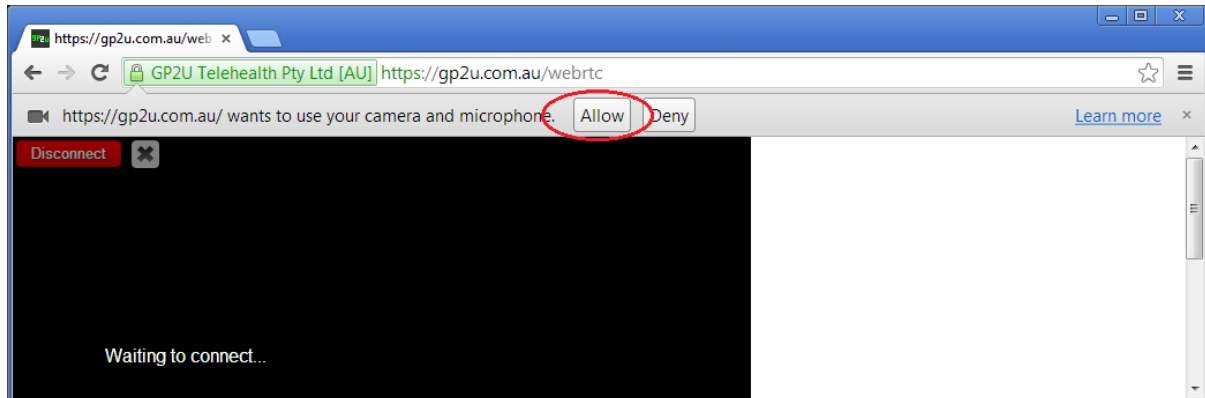

Now you can close Chrome down.

When you open it again it will automatically open on the GP2U page.

TEST VIDEO CONFERENCE

Once you have things set up please give us a quick call and go to this page <https://gp2u.com.au/webrtc>

There is a one-off requirement to allow GP2U to use your camera and microphone. Please click the “Allow” button as shown below:

Please note that patients will also have to click this “Allow” button the first time they use the system.

Once you have clicked “Allow” you will see a picture of you in the top left corner:

You can hide your picture using the “X” button next to “Disconnect” if you don’t want to see what you look like.

Now simply give us a call on 1300 472866 and we will connect to the other end so you can see things in action.

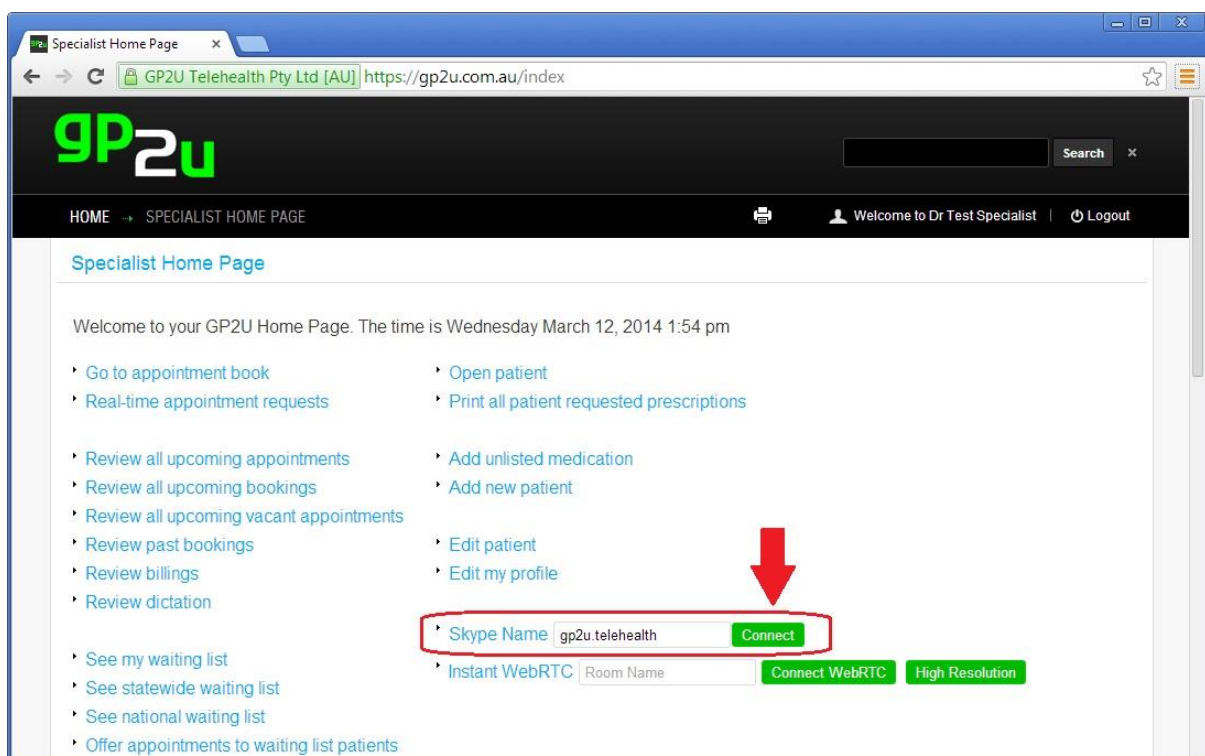

TESTING SKYPE

We can also test Skype at the same time.

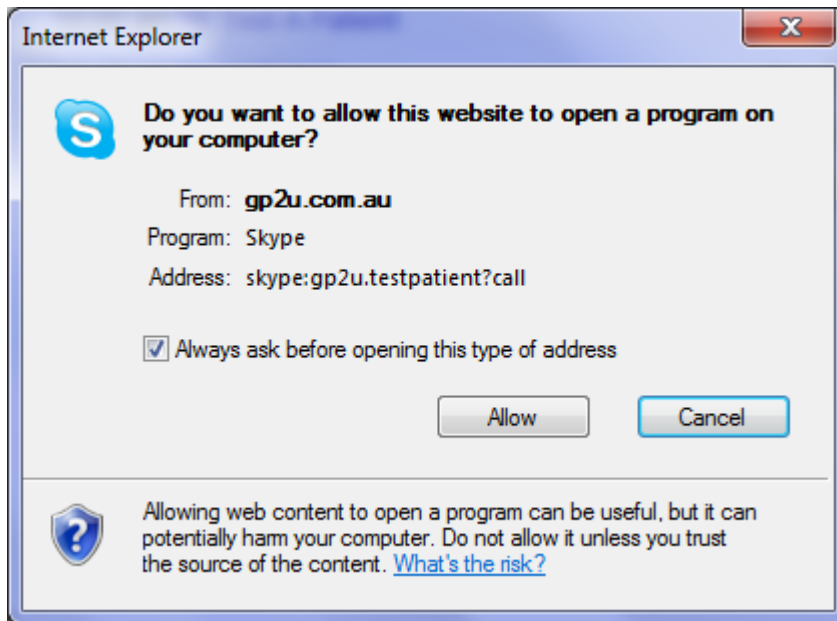

Normally, connections are handled automatically but if you ever have the need to connect to a Skype account, you can do so without having to exchange connection details.

From your home page simply enter the Skype name you wish to connect to (the default is us – gp2u.telehealth).

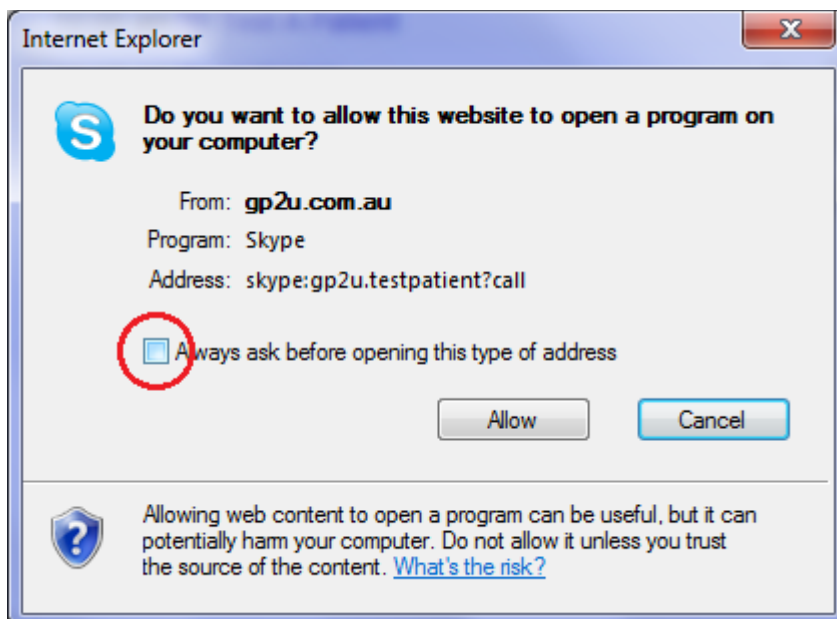

Click “Connect”

The first time you use this link you will get the following messages:

Click on the check box before "Always ask before opening this type of address" to remove the tick and then click Allow:

Next you will see this prompt:

Click on the check box before “Do not ask me again” to add a tick and then click “OK”:

The next time you press [Connect] you will not see these prompts.

Skype will place the call immediately.

Ta da! 😊

So now we've done that once, you should never be troubled about it again and pressing the connect button in the appointment book should just work.

Please note that in this picture the camera is turned off – see the diagonal red line?

In a perfect world you won't see this, however if you do, just click on the camera to turn the video on.

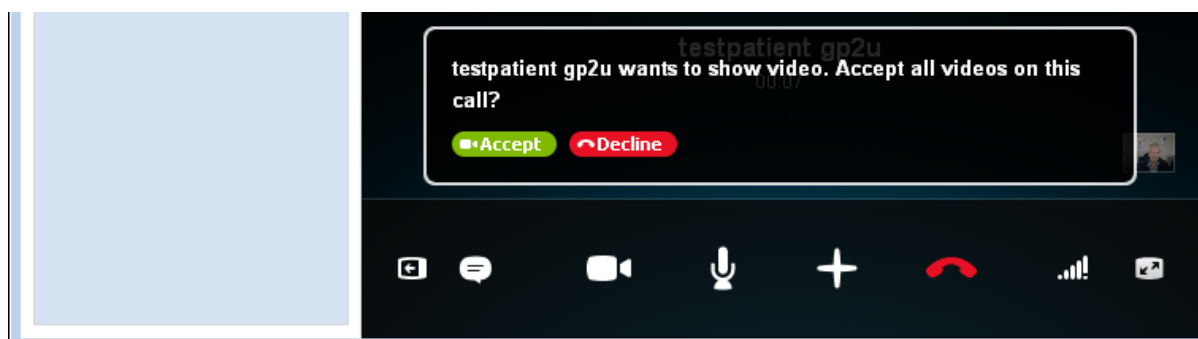

Your patient may also need to click on the video camera icon to turn their video on.

If you see a blank screen like this:

Then simply tell the patient to click their camera on.

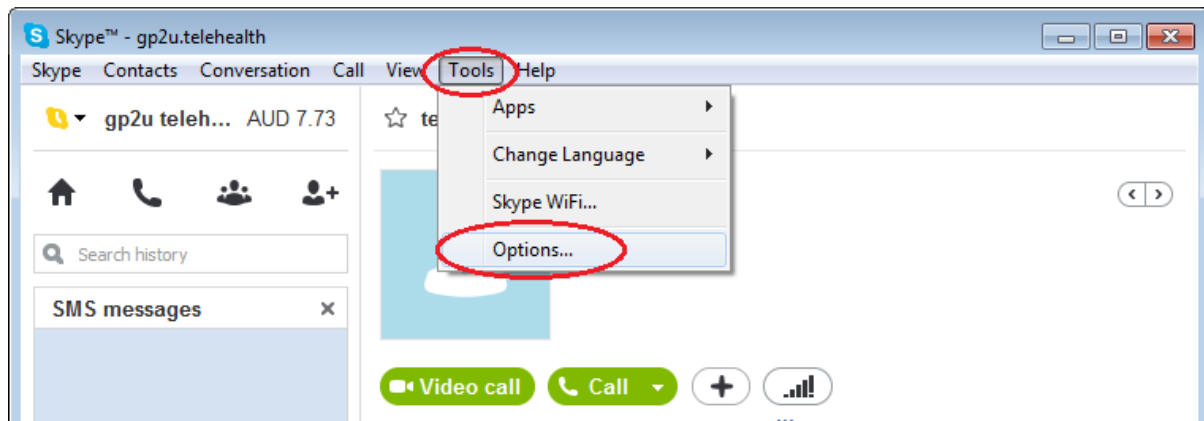

You will then see a message like this appear:

Click on the "Accept" button.

You can stop this message appearing by changing the default setting for video.

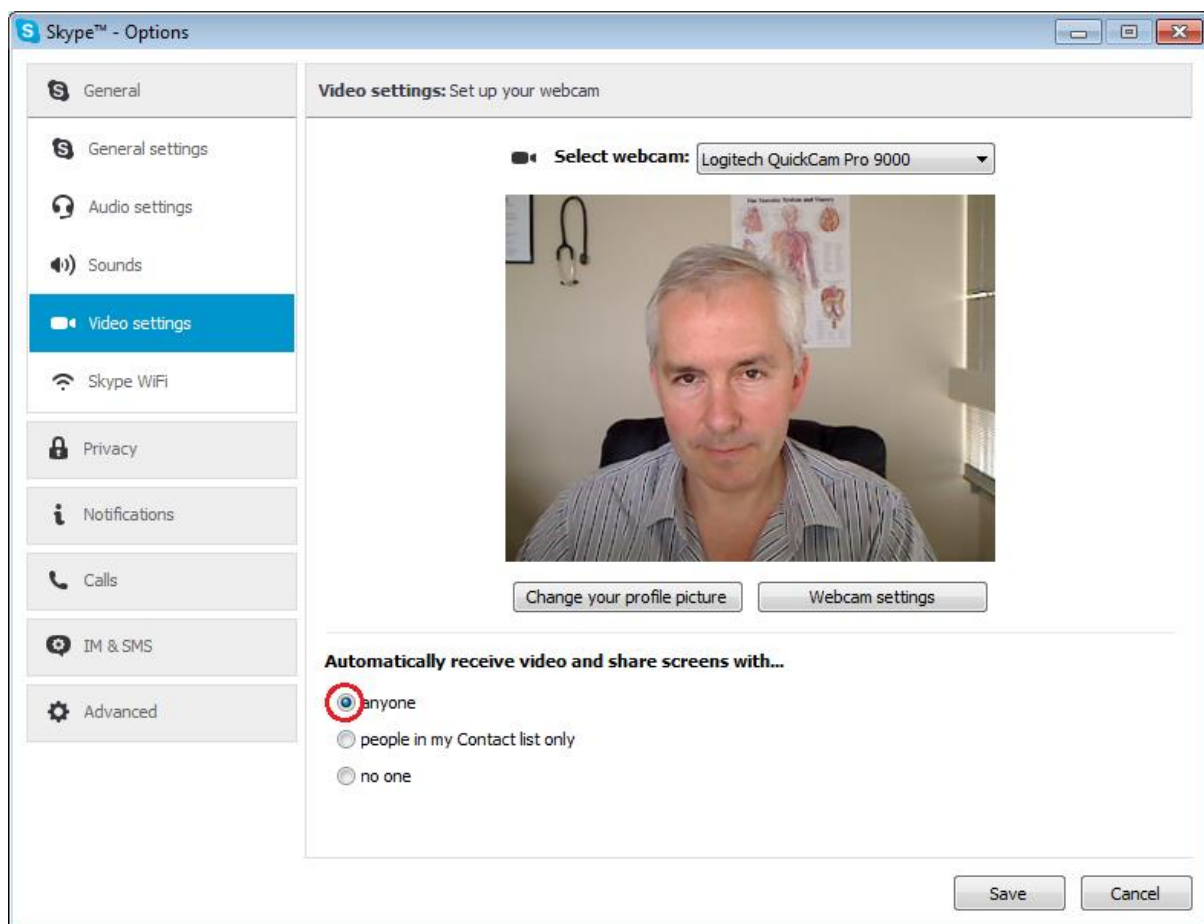

Select Tools | Options from the main Skype menu:

Then select "Video Settings".

Click on the radio button next to "anyone" as show.

Click "Save".

Now you won't get asked if you want to accept videos again.

Please note that both you and the patient have the ability to mute your microphones.

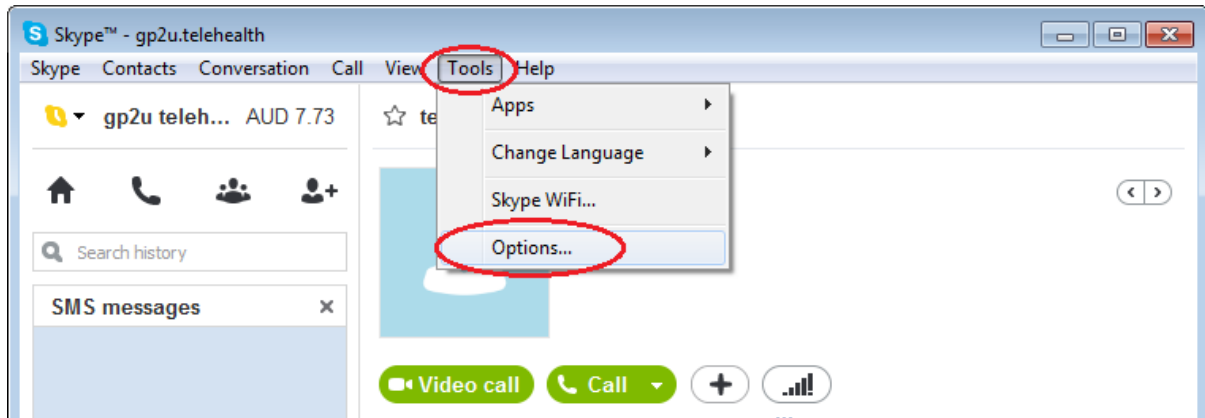

This is not the default but if you can't hear each other, this is a very likely culprit.

TROUBLESHOOTING

If you can't see or hear the patient, make sure your microphones are not muted, your video is switched on and your speakers are switched on.

You can test your camera, microphone and speakers by selecting Tools | Options from the main Skype menu.

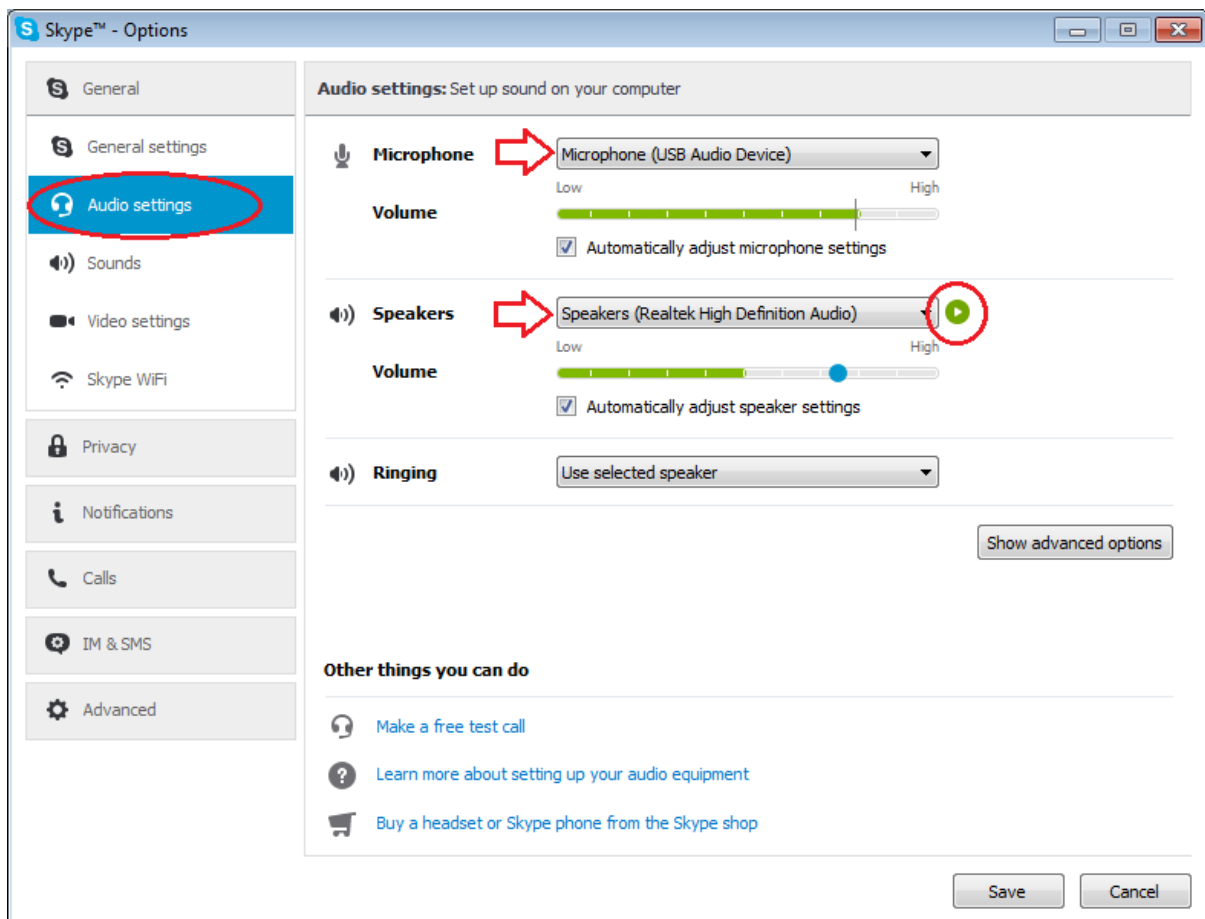

Click on the “Audio settings”.

When you speak you should see the volume bar move in the microphone section.

If not, click on the drop down list and select the correct device.

Similarly, when you click the little green play button (circled) you should hear sound.

If not, click on the drop down list and select the correct device.

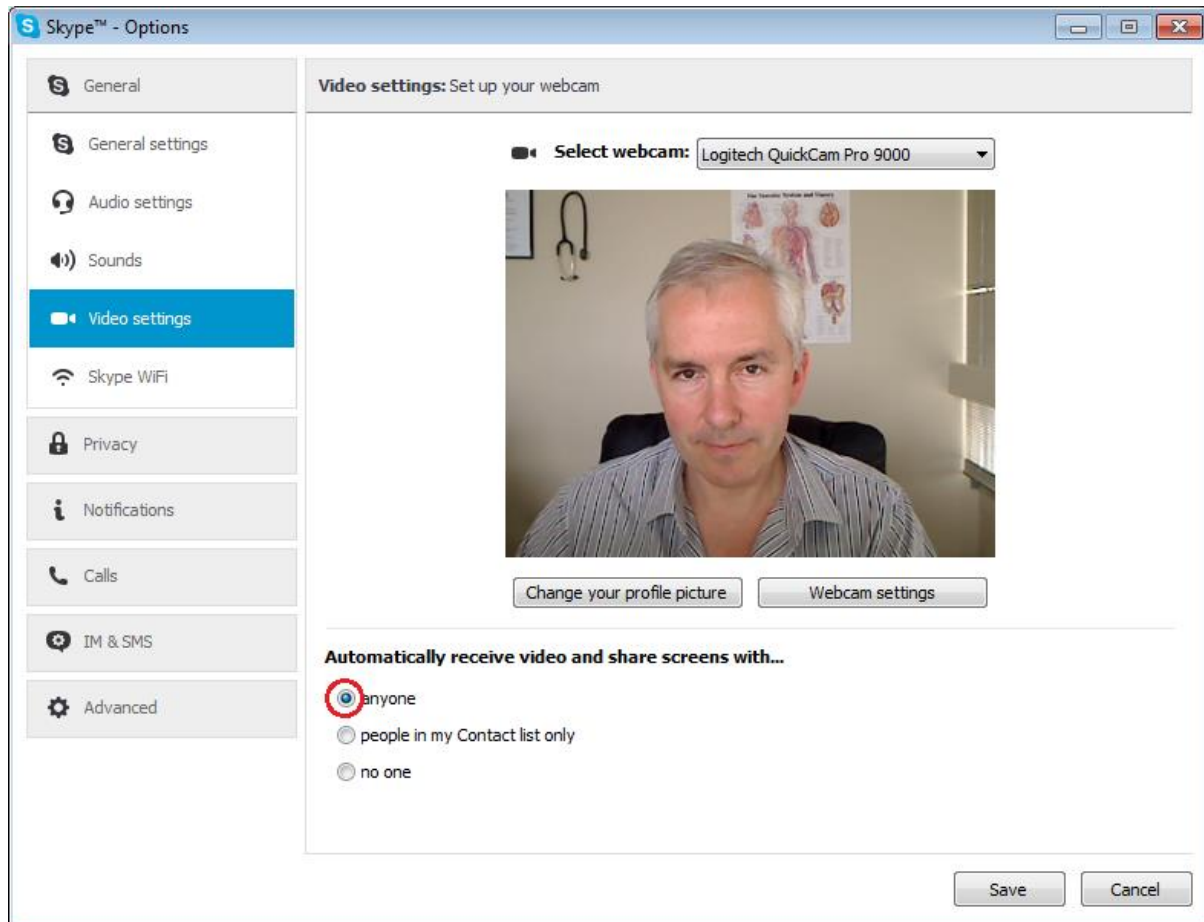

Don't forget to click "Save" if you make changes here!

Now check your video settings.

You should see a picture of yourself.

If not, click on the "Select webcam" drop down list and select the correct device.

Remember that your computer also has a separate volume control.

On Windows it is down at the bottom of the page on the right hand side.

Here is what it looks like muted –

Click on the speaker to unmute it

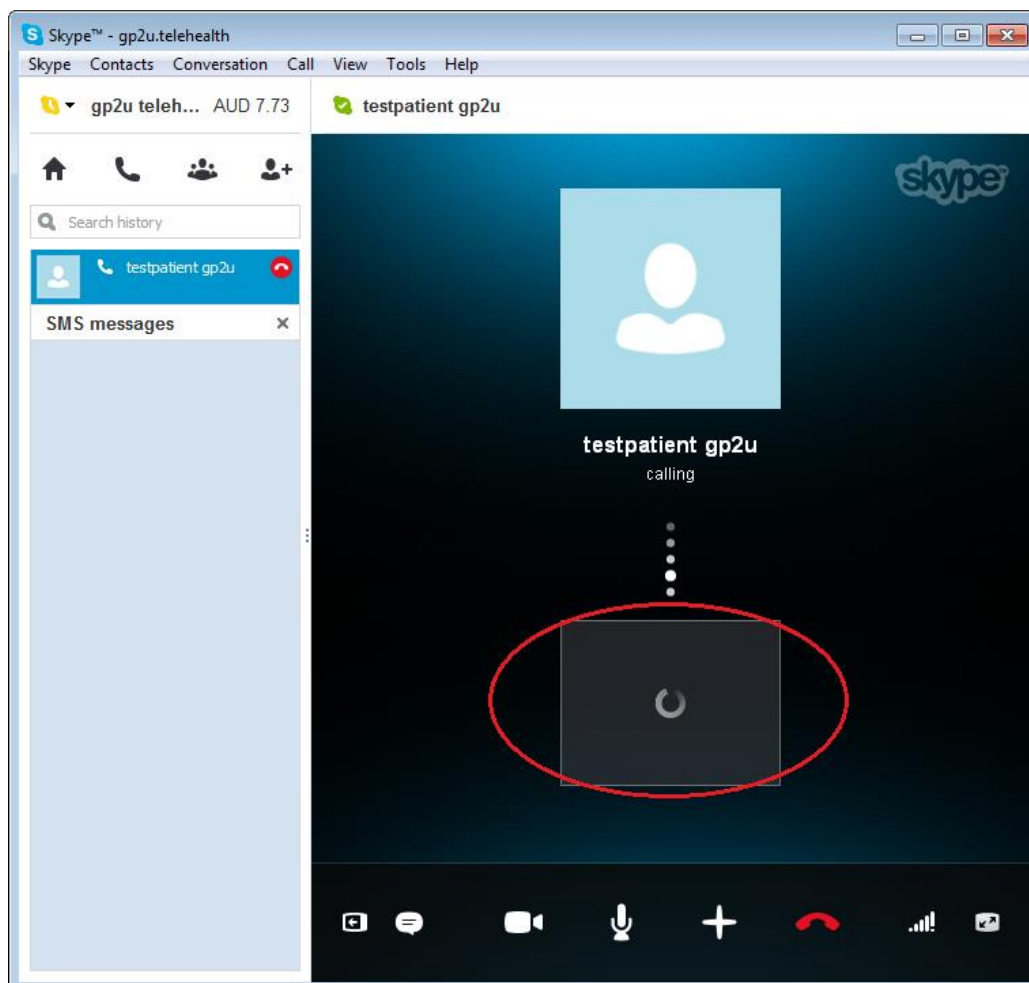

Drag the slider to the top to turn up the volume

Finally, you should **note that only one piece of software can be in control of your camera at a time.**

If you have say WebRTC or Facetime open and using the camera, then Skype cannot access it and vice versa.

Here is what Skype looks like when it cannot get hold of your camera:

WebRTC is a bit more helpful. It will give you an error message like this:

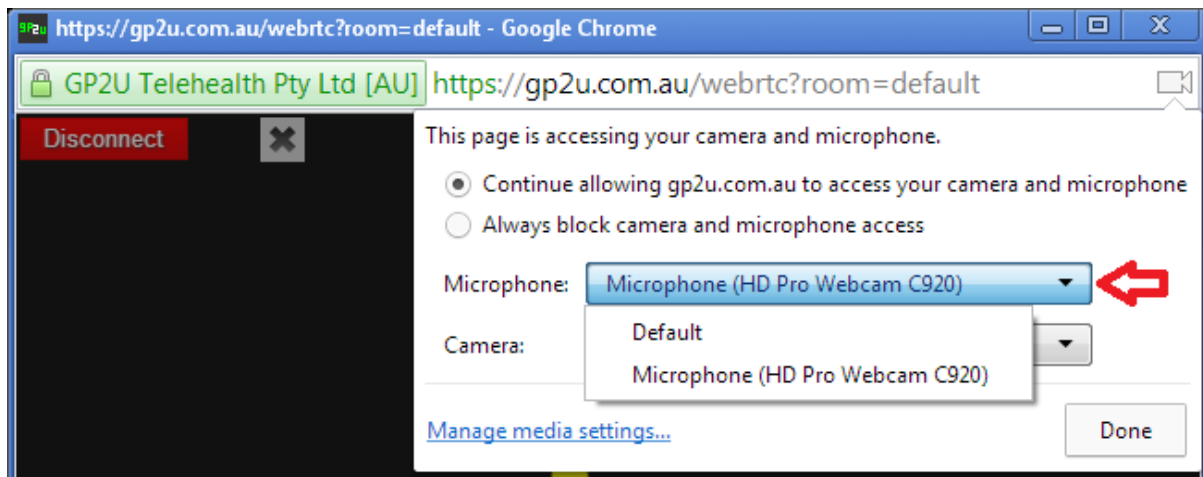

WebRTC also provides a handy link to your camera and microphone from the browser window. Simply click the camera icon top right near the star.....

Make sure camera/microphone access is allowed.

If things are not working select a different camera/microphone from the drop down list.

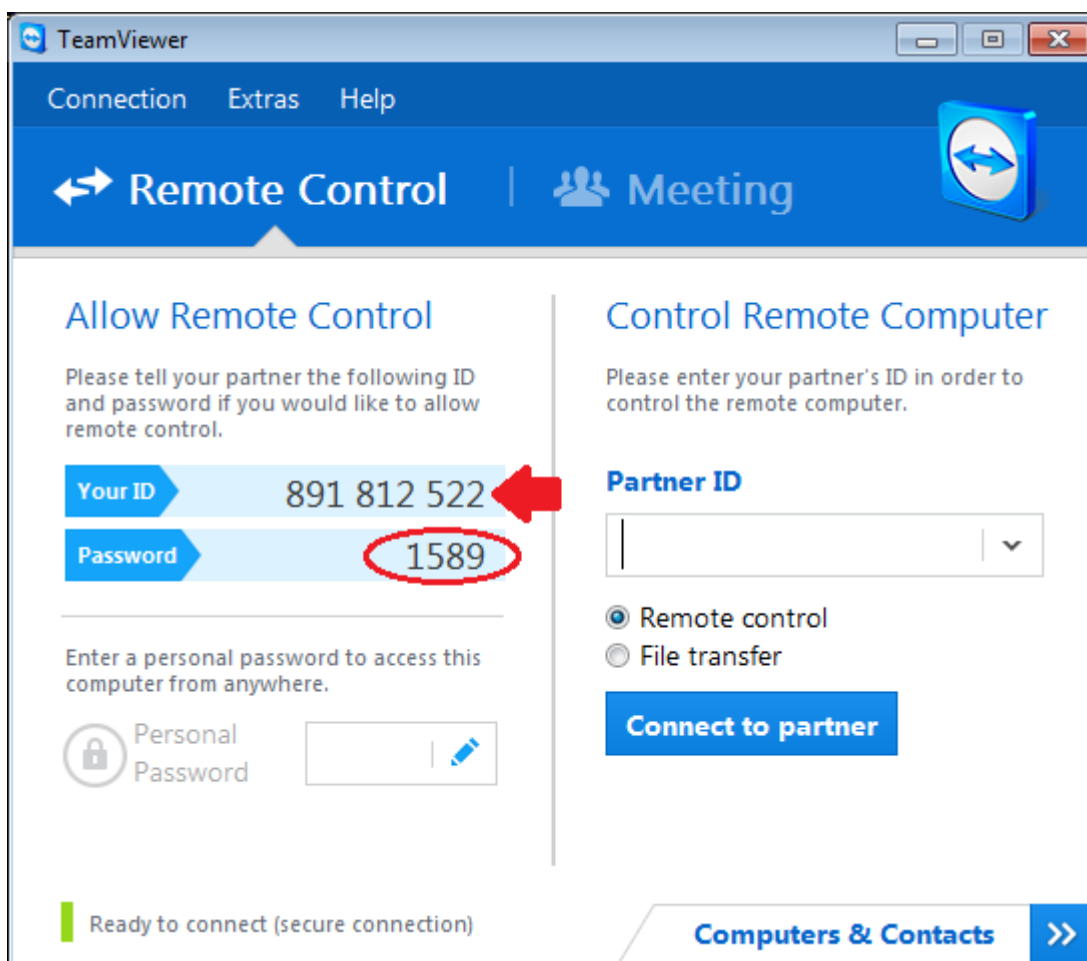

CALLING THE CAVALRY!

If your subscription includes the remote technical support option then you can have one of our technical support staff do things for you. To allow this to happen, you will need to download and install a piece of software called Teamviewer. This allows your computer to be configured remotely.

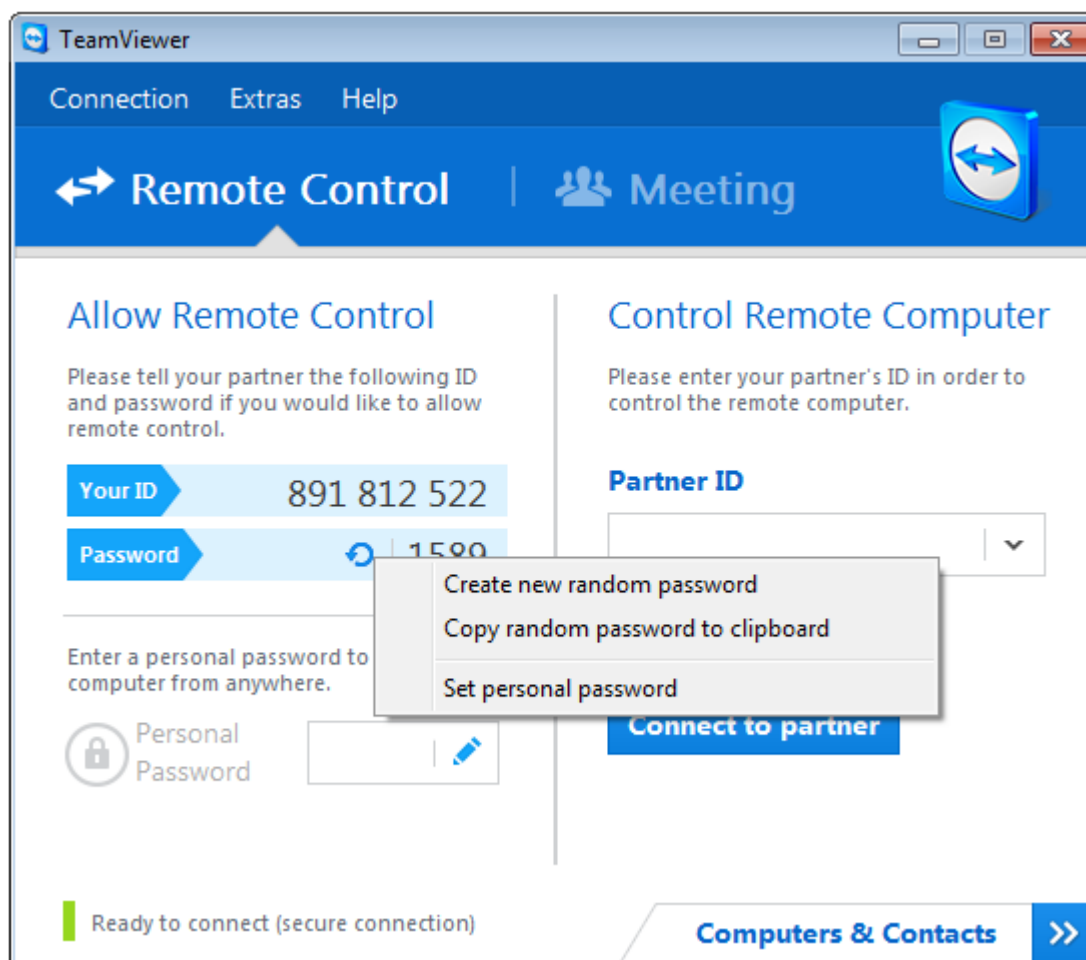

You can find the software here <http://www.teamviewer.com/en/index.aspx>

Once you have Teamviewer installed you will see something like this:

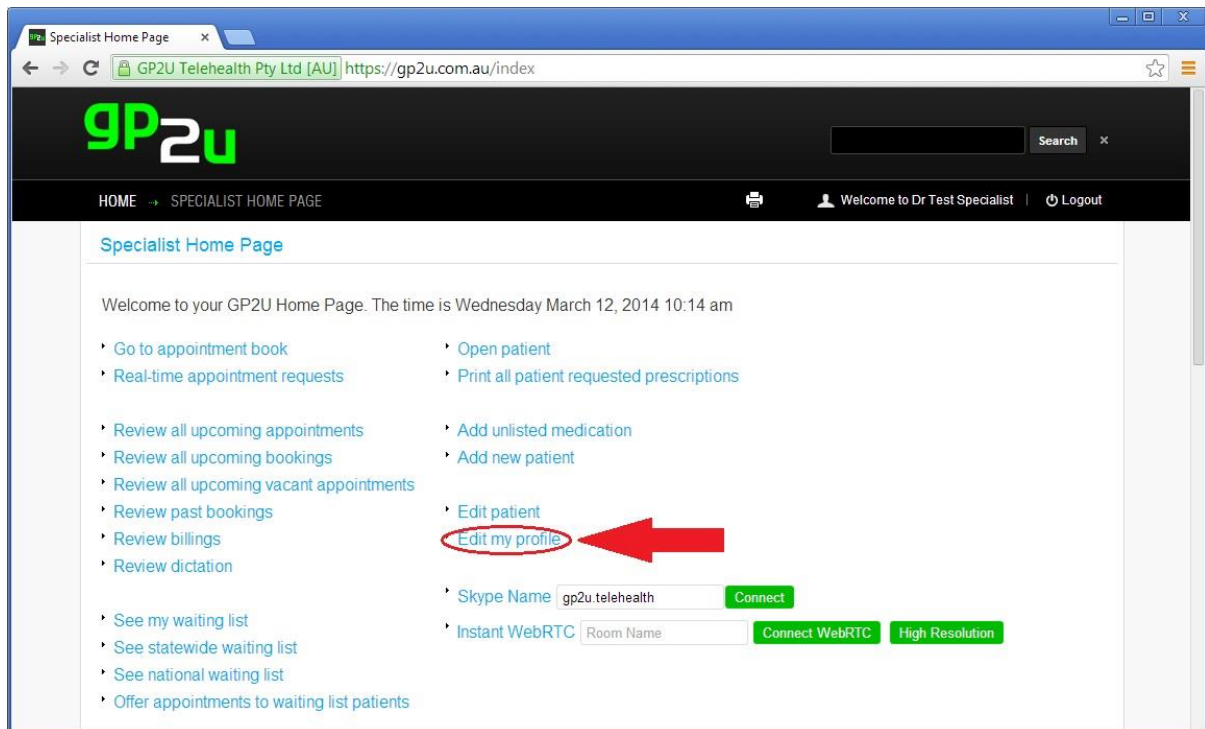

The technician will need to know your ID number to find your computer, and can only access your computer if you give them the password.

Also if you are worried about your privacy, as soon as you close teamviewer nobody can access your computer, even with your id and password. If you are paranoid simply change the password by mousing over it and selecting the option.....

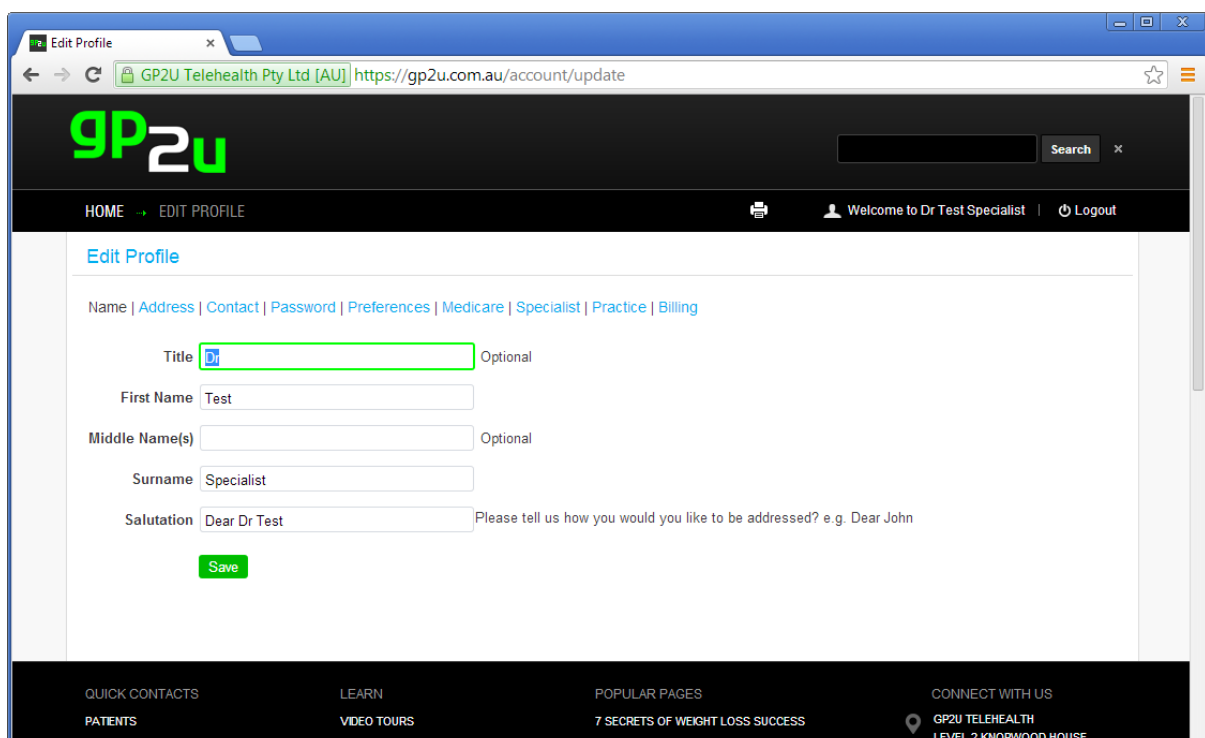

CHANGING YOUR DETAILS

From the home page of your account simply click on the link that says “Edit my profile”.

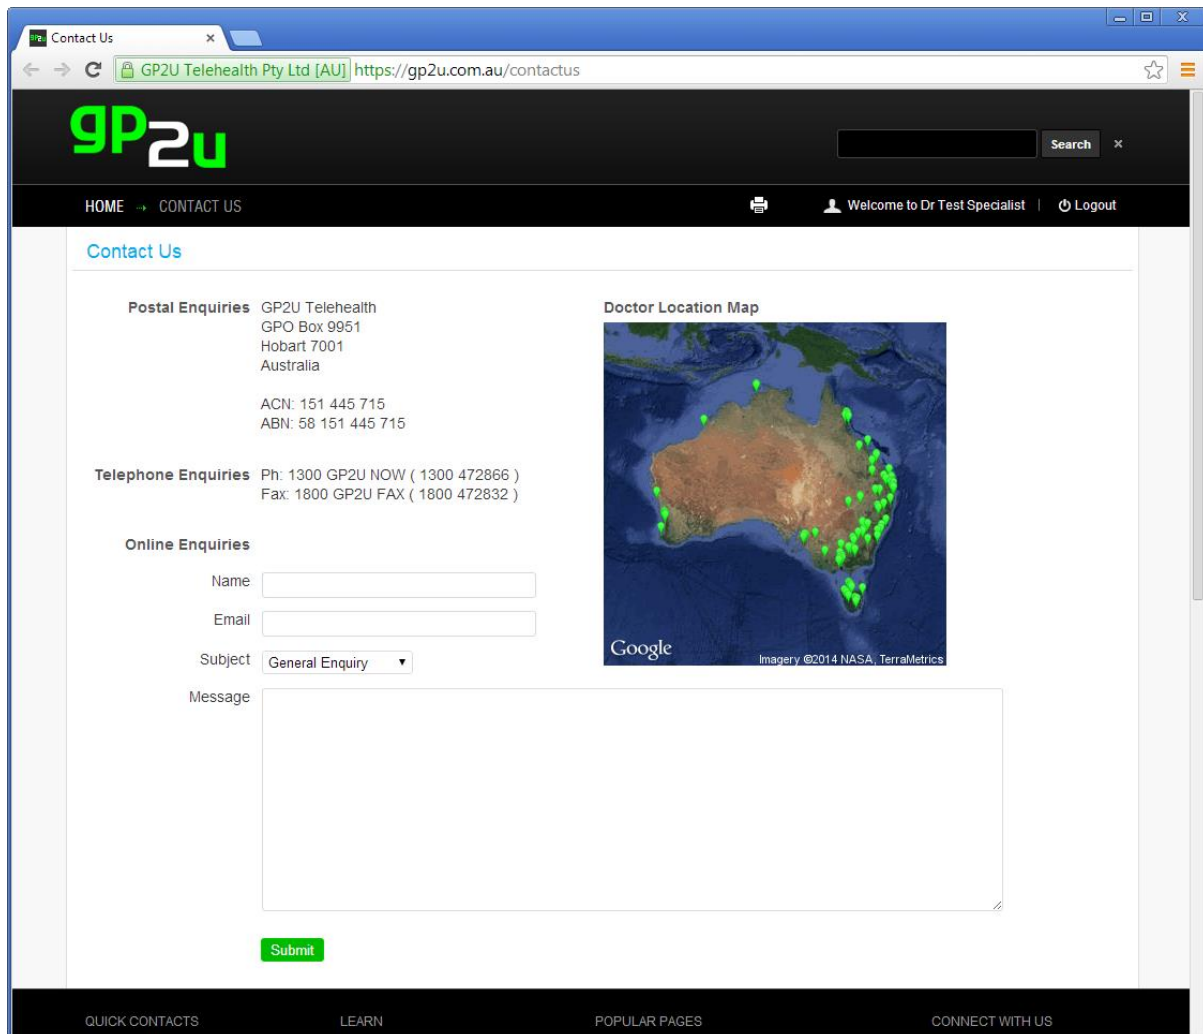

From here, you can change all your details.

CONTACTING US

To contact us simply go to the “contact us page” and select an option that suits you.

The screenshot shows a web browser window with the URL <https://gp2u.com.au/contactus>. The page features the GP2U logo in green and white. A search bar is located in the top right corner. Below the logo, there is a navigation bar with links to HOME and CONTACT US. The main content area is titled "Contact Us" and contains three sections: Postal Enquiries, Telephone Enquiries, and Online Enquiries. The Postal Enquiries section lists the address: GP2U Telehealth, GPO Box 9951, Hobart 7001, Australia, and provides contact numbers: ACN: 151 445 715, ABN: 58 151 445 715. The Telephone Enquiries section lists: Ph: 1300 GP2U NOW (1300 472866), Fax: 1800 GP2U FAX (1800 472832). The Online Enquiries section includes a form with fields for Name, Email, Subject (with a dropdown menu set to General Enquiry), and a large text area for the Message. A green Submit button is located below the message field. To the right of the form is a "Doctor Location Map" showing Australia with numerous green pins indicating doctor locations. The map is credited to Google Imagery ©2014 NASA, TerraMetrics. The footer contains links to QUICK CONTACTS, LEARN, POPULAR PAGES, and CONNECT WITH US.

FORGOTTEN YOUR PASSWORD?

If you forget your password, simply click on the “Forgotten your password?” link on your home page, just below the username/password fields.

This will send an email to your registered email address that lets you reset your password.

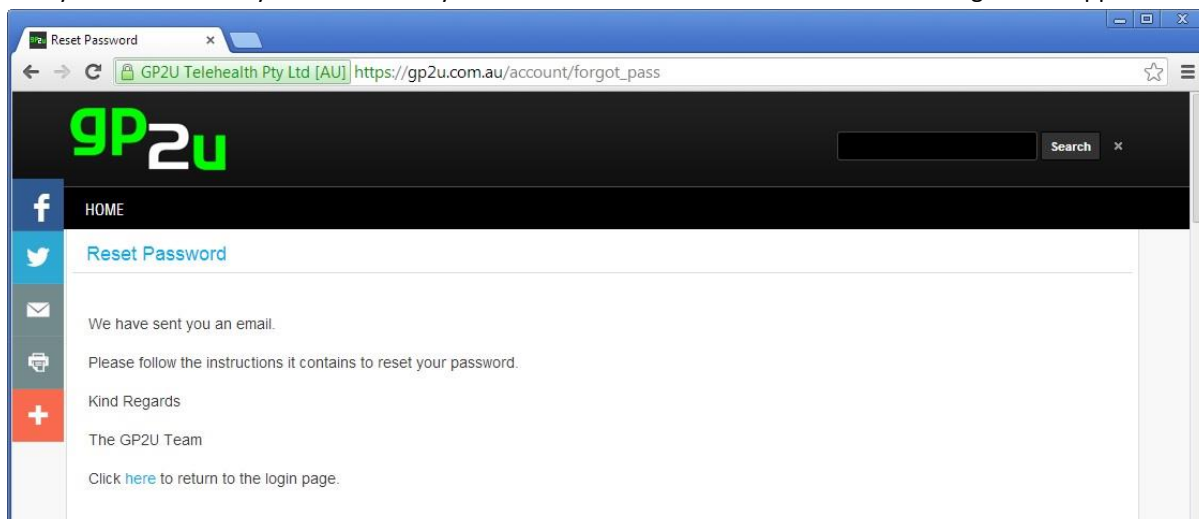

If for some reason you can’t access that email and are having trouble, just give us a call on 1300 472866.

And from here, just give us your Username or Email:

And you should check your email after you have clicked next. A screen like the following should appear next:

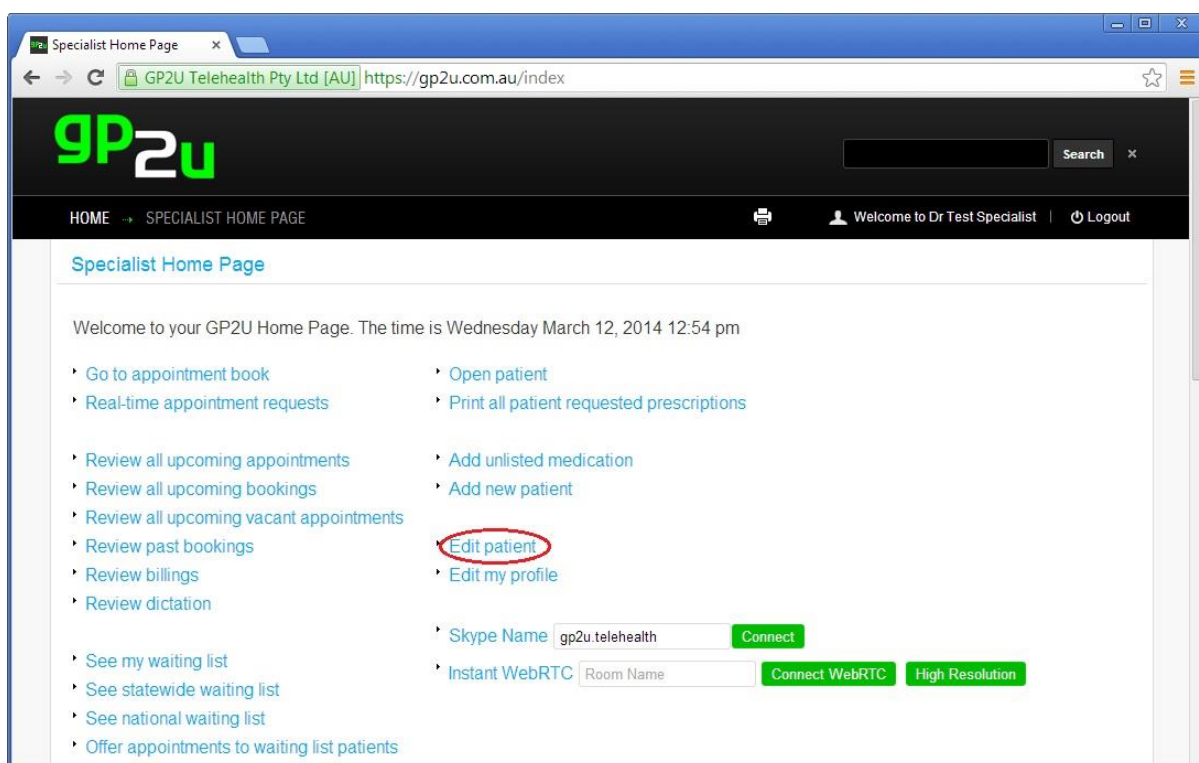

PATIENTS WHO HAVE FORGOTTEN THEIR PASSWORDS

Patients who have forgotten their passwords can use the same reset password link process shown above.

You can also reset their passwords for them should the need arise.

From your home page click the “Edit patient” link:

This will bring up the patient search screen.

Type in part of the patients name and select the patient by clicking on their name:

BOOKING YOUR FIRST APPOINTMENT

There are many ways for appointments to be booked and you may choose to use one or more of them.

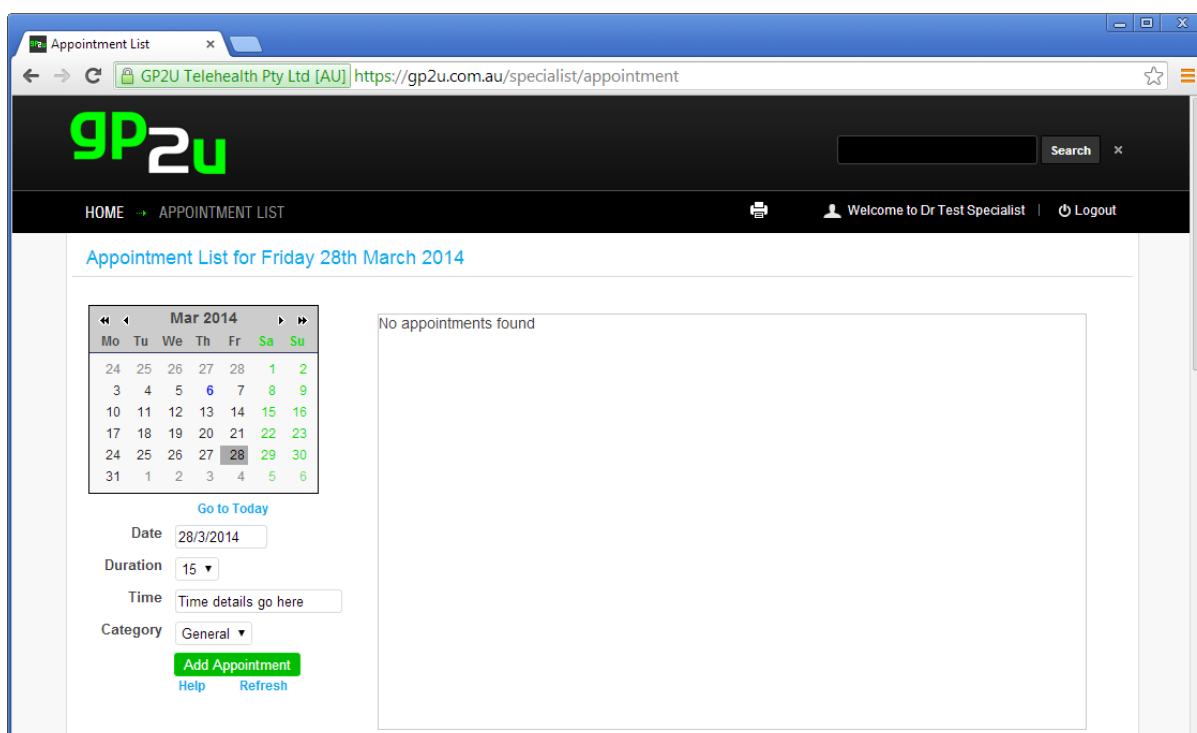

Everything rotates around the appointment book.

Like all the things you may wish to do with GP2U, you will find a direct link to it on your home page.

Click on this link to bring up the appointment book.

As you would expect, it opens on today's date and there are no appointments found.

Now let's book our first patient.

To book a patient you need an appointment slot to put them in.

For testing just put in (say) 9-10 for the time and click the "Add Appointment" button:

The screenshot shows the GP2U Appointment List interface. The header includes the GP2U logo, a search bar, and navigation links. The main content area displays the appointment list for Friday 28th March 2014. On the left, there is a calendar for March 2014 with the 28th selected. Below the calendar, there are input fields for Date (28/3/2014), Duration (15), Time (9-10), and Category (General). The 'Add Appointment' button is highlighted with a red circle, and a red arrow points to it. The right side of the interface shows 'No appointments found'.

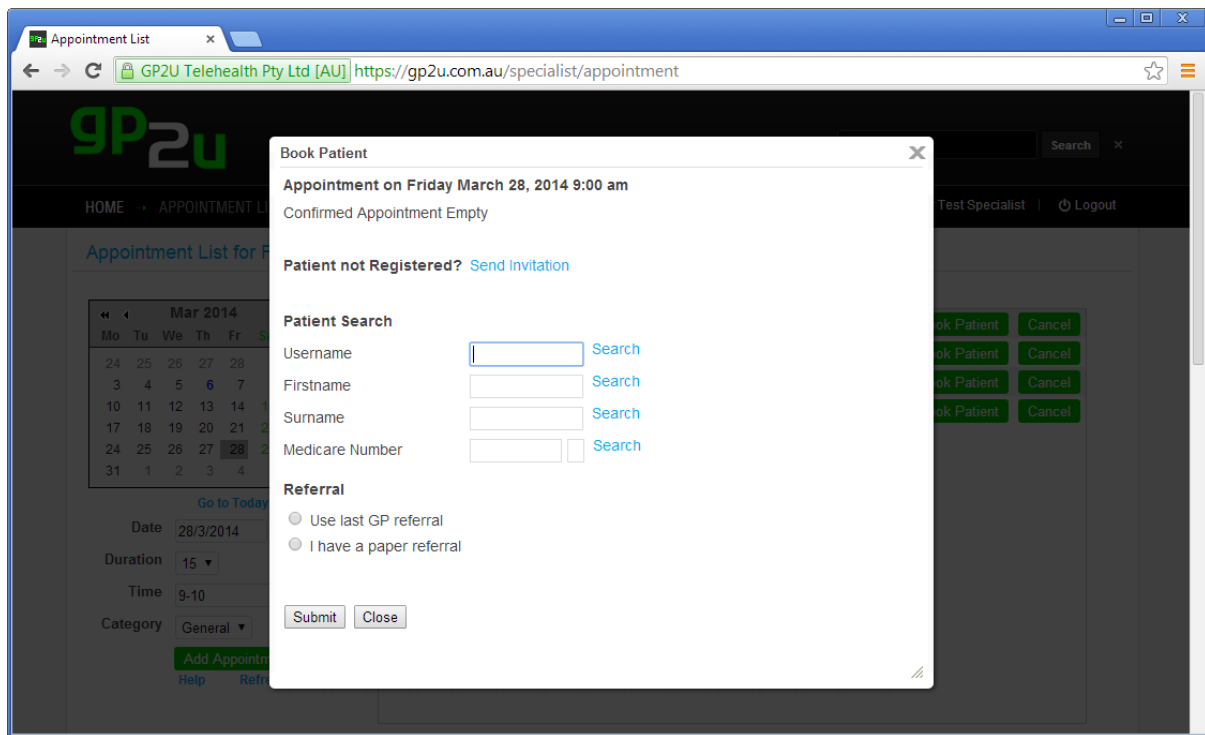

The system works out that if you want appointments from 9 to 10 and they are the default 15 minutes, we want appointments at 0900, 0915, 0930, & 0945, so what you will now see should look like this:

The screenshot shows the GP2U Appointment List interface after creating four appointments. The header and navigation links are the same. The main content area displays the appointment list for Friday 28th March 2014. On the left, there is a calendar for March 2014 with the 28th selected. Below the calendar, there are input fields for Date (28/3/2014), Duration (15), Time (9-10), and Category (General). The 'Add Appointment' button is highlighted with a red circle, and a red arrow points to it. The right side of the interface shows four appointment slots created for 9:00 am, 9:15 am, 9:30 am, and 9:45 am, each with a 'Book Patient' and 'Cancel' button.

Time	Duration	Category	Book Patient	Cancel
9:00 am	15m	Gen	Book Patient	Cancel
9:15 am	15m	Gen	Book Patient	Cancel
9:30 am	15m	Gen	Book Patient	Cancel
9:45 am	15m	Gen	Book Patient	Cancel

You can see that the 4 appointments have been created and we have "Book Patient" and "Cancel" buttons.

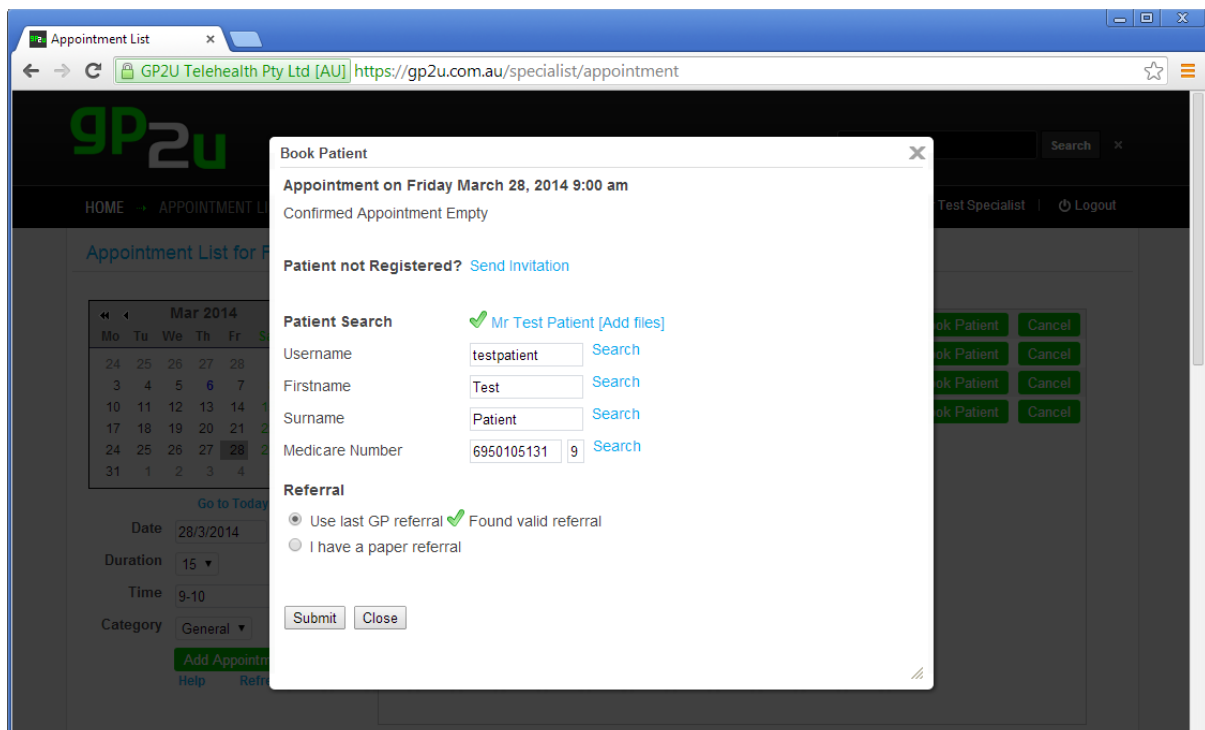

Let's click "Book Patient":

Type “testpatient” into the Username field and click the “Search” link next to that.

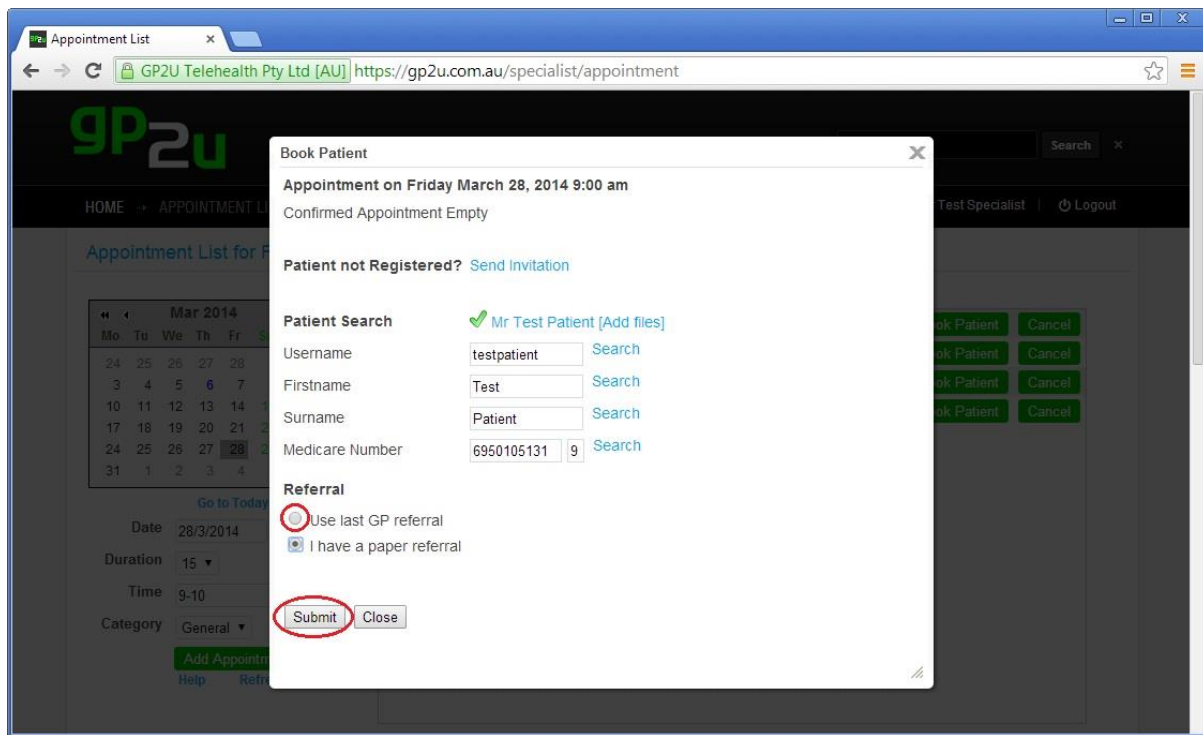

This is how we book patients that are already registered on the system. We can find patients by username, first name, last name or Medicare card number.

Next you will see something like this:

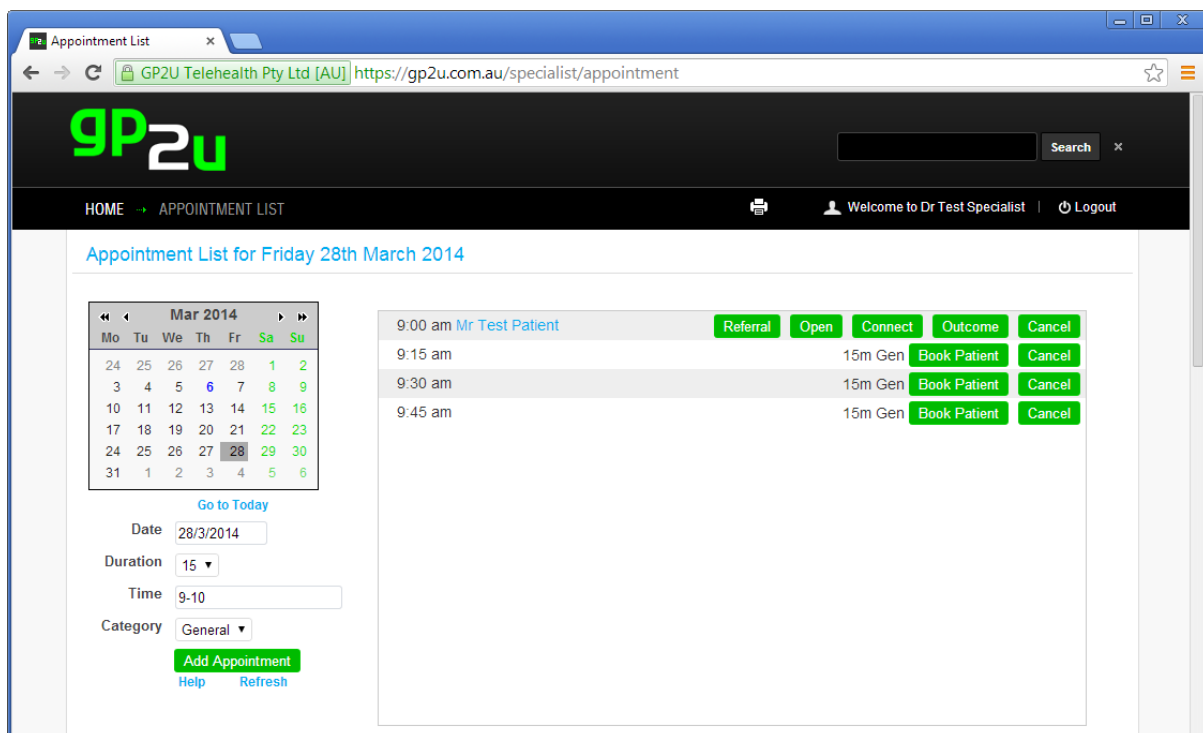

You will notice it says that no valid referral has been found.

Just click on the radio button next to “I have a paper referral” and click submit:

Now you will see this:

As you can see, we have the patient's name and several buttons.

They each have a purpose, which we will explain below but, what has also happened when we made the booking is –

“Test Patient” has been sent an email letting them know they have a booking.

The email looks like this:

Dear Test Patient

This email is to confirm the booking of your Telehealth appointment with Dr Test Specialist.

The appointment is scheduled for local time:

Patient: Friday March 28, 2014 12:00 pm
Specialist: Friday March 28, 2014 9:00 am

Dr Test Specialist
1 King Street Perth 6000
Ph: 0438350854

Please ensure you are available online 15 minutes prior to the commencement time.

If you plan to use WebRTC and the Virtual Waiting Room to connect please be aware that you need Internet Explorer, Chrome or Firefox (not Apple Safari) as your browser.

[Click here to connect.](#)

When you use WebRTC for the first time you will be prompted to allow access to your camera and microphone. Please see <https://gp2u.com.au/faq/webrtc.html> for details.

If for some reason that link does not work [try this emergency backup server.](#)

Kind Regards

The GP2U Team

GP2U Telehealth

Twitter [@GP2U_Telehealth](https://twitter.com/GP2U_Telehealth)
Web <https://gp2u.com.au/>

This e-mail and any attachments to it (the "Communication") is, unless otherwise stated, confidential, may contain copyright material and is for the use only of the intended recipient. If you receive the Communication in error, please notify the sender immediately by return e-mail, delete the Communication and the return e-mail, and do not read, copy, retransmit or otherwise deal with it. Any views expressed in the Communication are those of the individual sender only, unless expressly stated to be those of GP2U Telehealth Limited ABN 58 151 445 715, or any of its related entities.

You will notice that we quote the appointment time for both patient and specialist.

- This is because the patient may be in a different time zone so your "10 am" may be their "8 am".
- You don't have to worry about time zones because we always report times in terms of user local time.
- We also take care of day light savings issues.

You will also notice a link that says "Click here to connect".

- All the patient has to do is click this and they will automatically be logged in and taken to the Virtual Waiting Room, ready for you to connect to them.

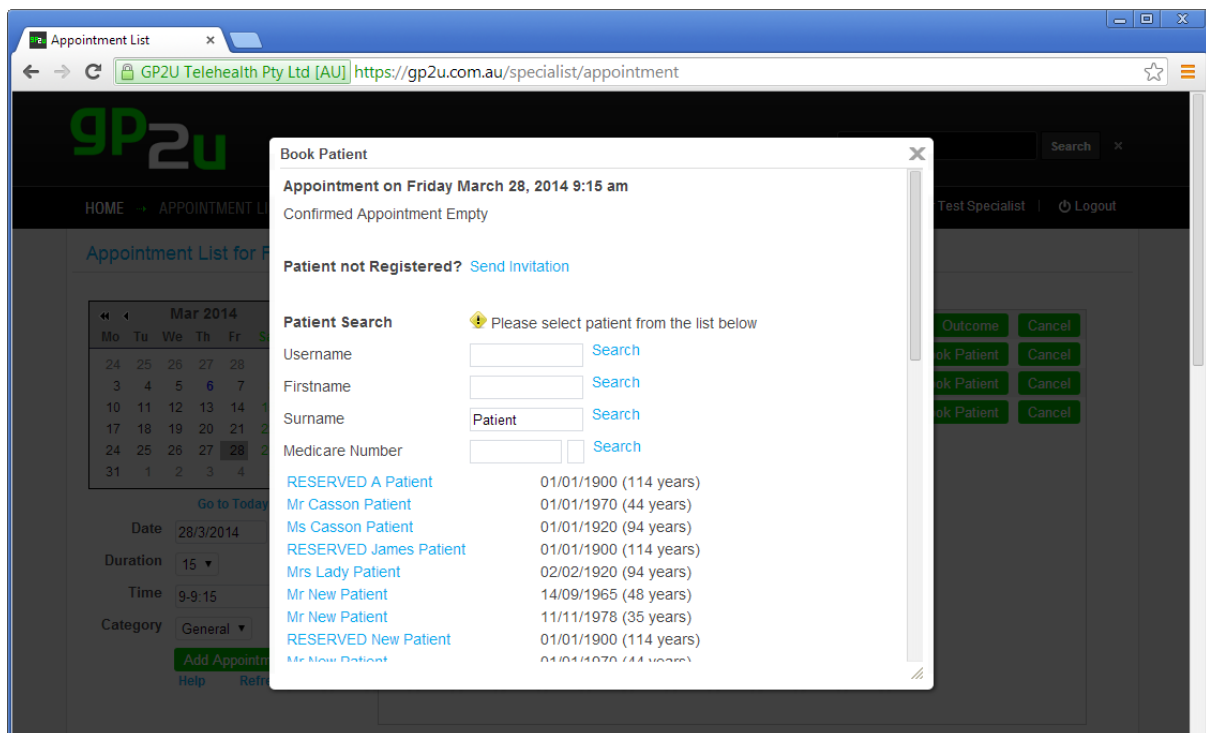

The email also provides other useful details.

Patients also get an automatic reminder email before the appointment, to minimise the risk of “no shows”.

In the “testpatient” example, because we searched by username (which is unique), we have only found one patient.

If we search by say first name and last name, we may find more than one patient.

Simply click on the correct patient to book them.

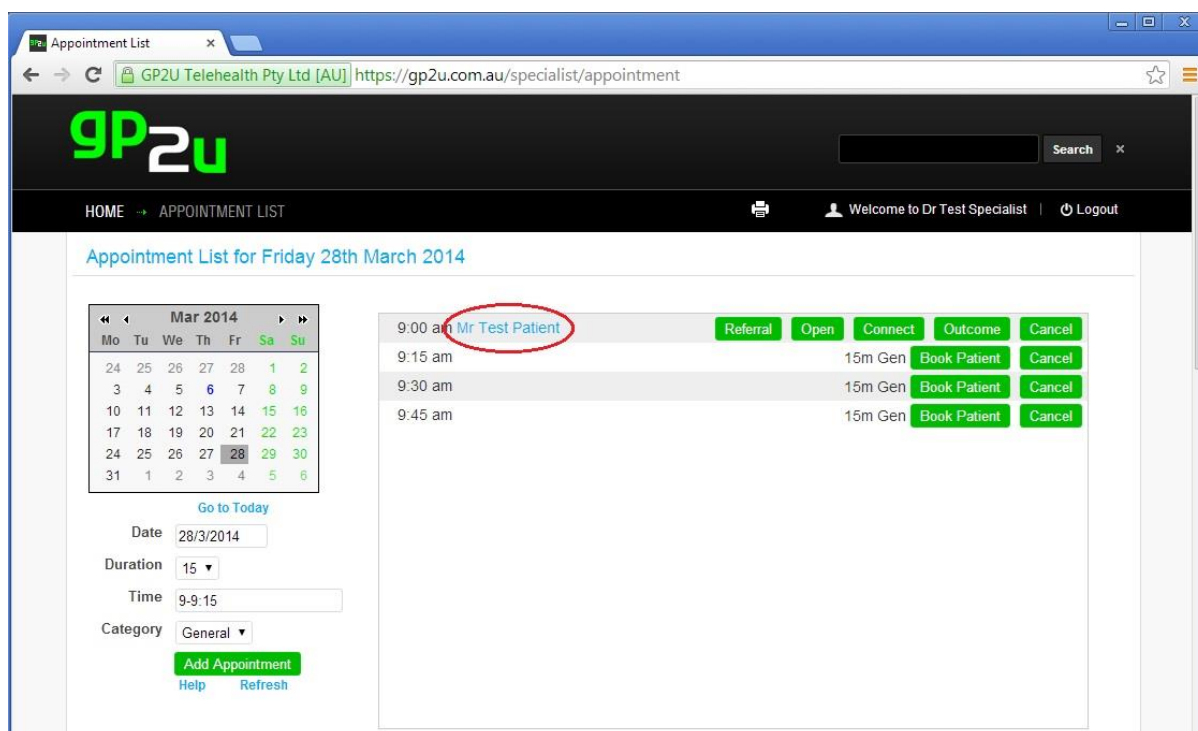

Don't worry, there are very simple ways of getting the patients into the system, and once they've been added.....

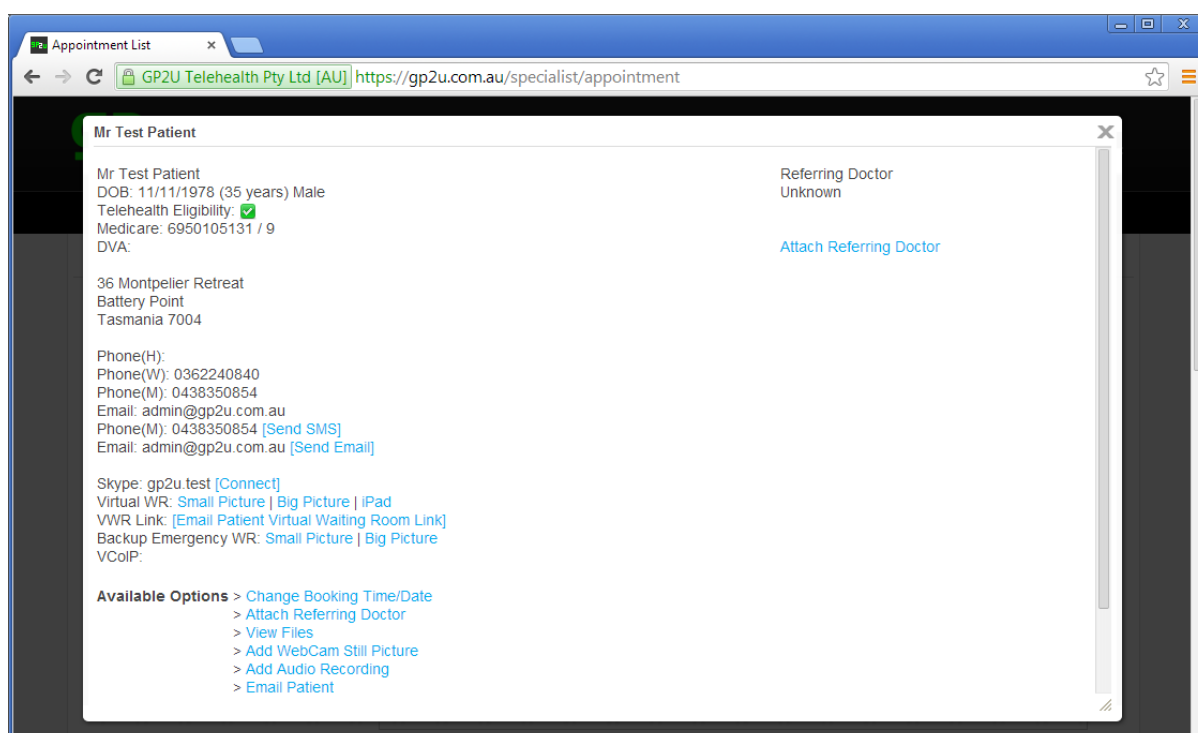

So let's get back to your appointment book:

PATIENT NAME

Let's start by clicking on the patient's name. This brings up details about them:

You will notice a whole series of links.

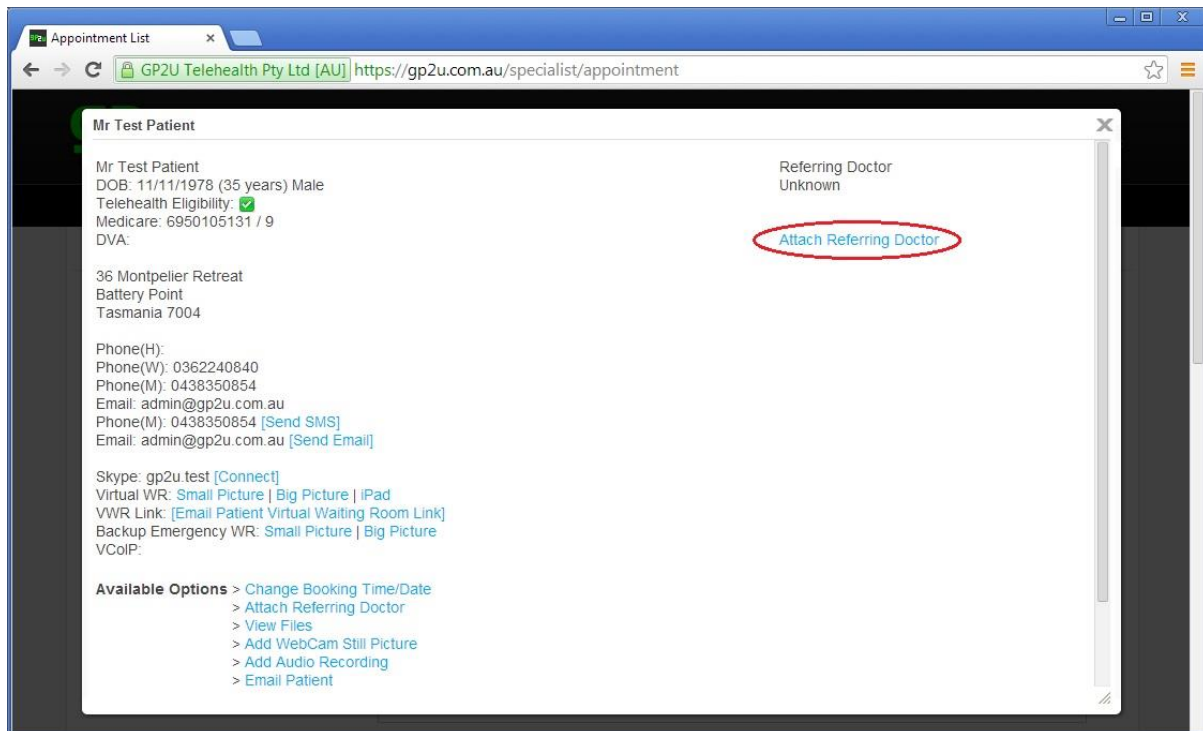

These all do what they say they do and are described in more detail later.

The one we will mention now is the “Attach Referring Doctor” link.

Because we earlier specified that a paper referral exists, the system has no idea about who the referring doctor is.

Click the “Attach Referring Doctor” link.

Mr Test Patient

Search For Referring Doctor

Unknown Doctor

Provider Number [Check Provider Number](#)

Username [Check Username](#)

Surname [Find Doctor](#)

We can search for doctors by provider number, username or surname.

Let's search for 2108426X and click the “Check Provider Number” link.

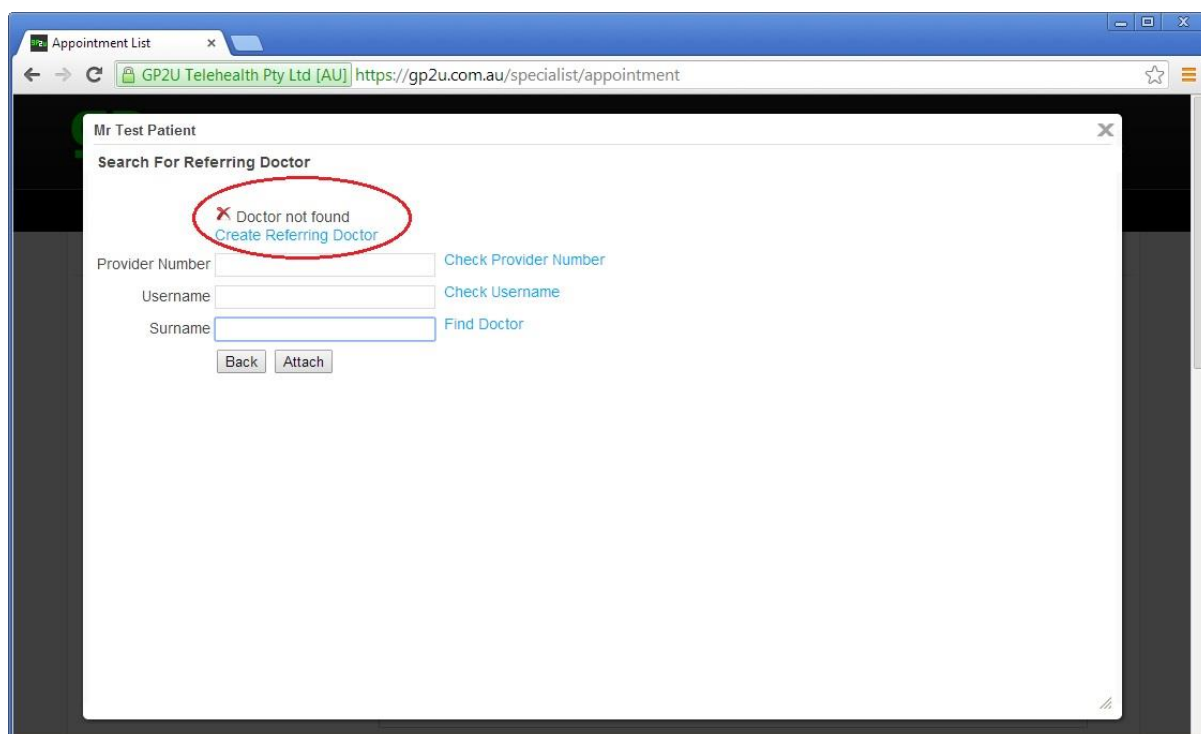

That will bring up this page:

The screenshot shows a web browser window with the URL <https://gp2u.com.au/specialist/appointment>. The page title is "Appointment List". The GP2U logo is in the top left. A search bar is in the top right. Below the logo, there is a navigation bar with "HOME" and "APPOINTMENT LIST". A user is logged in as "Welcome to Dr Test Specialist" with a "Logout" button. The main content area is titled "Mr Test Patient" and "Search For Referring Doctor". It shows a green checkmark and the text "Dr James Freeman 38 Montpelier Retreat TAS". Below this, there are input fields for "Provider Number" (2108426X), "Username" (drjames), and "Surname". To the right of each field is a link: "Check Provider Number", "Check Username", and "Find Doctor". At the bottom are "Back" and "Attach" buttons.

Now if we search for a GP but can't find them:

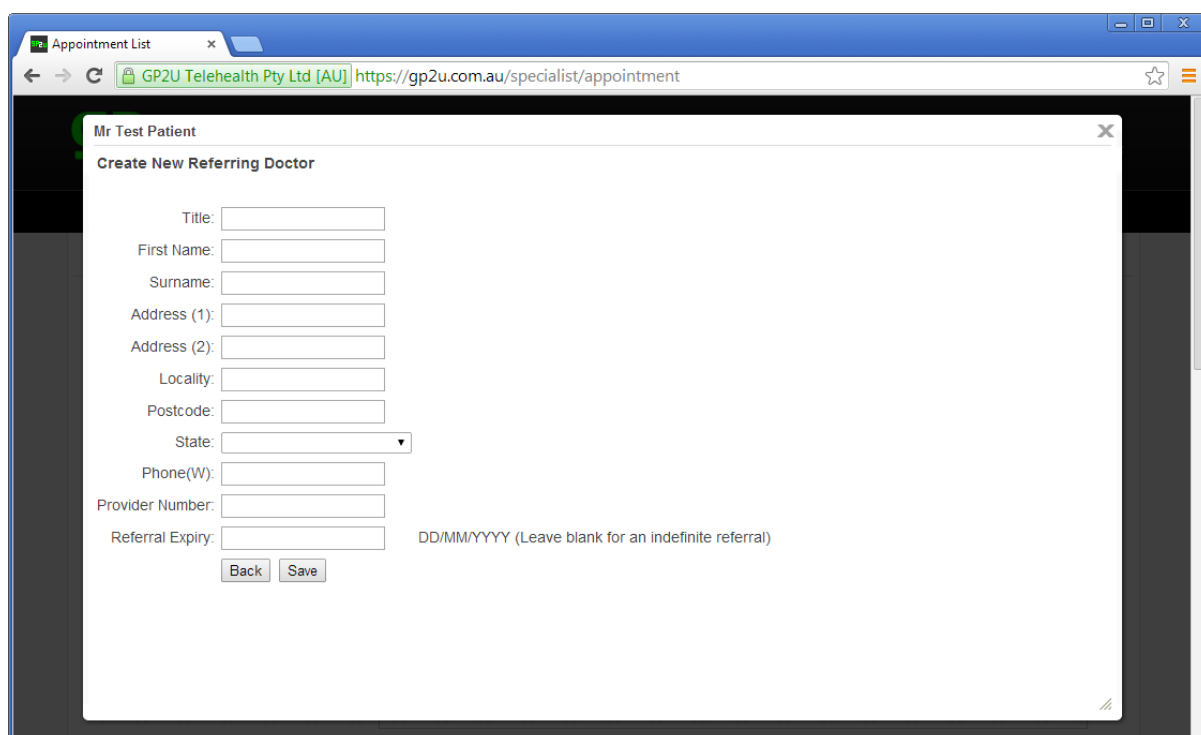

The screenshot shows the same web browser window as the previous one. The main content area is titled "Mr Test Patient" and "Search For Referring Doctor". It shows the text "Unknown Doctor". Below this, there are input fields for "Provider Number", "Username", and "Surname" (UnknownDr). To the right of each field is a link: "Check Provider Number", "Check Username", and "Find Doctor". At the bottom are "Back" and "Attach" buttons.

A new “Create Referring Doctor” link becomes available:

The screenshot shows a web browser window titled "Appointment List" with the URL "https://gp2u.com.au/specialist/appointment". Inside the browser, there is a modal window titled "Mr Test Patient" with a close button (X). The modal contains a section titled "Search For Referring Doctor". Within this section, the text "X Doctor not found" is displayed, with a red circle around it. Below this text is a link that says "Create Referring Doctor". There are also three input fields: "Provider Number", "Username", and "Surname", each with a corresponding "Check" or "Find" button to its right. At the bottom of the modal are "Back" and "Attach" buttons.

Click that link to see the following page:

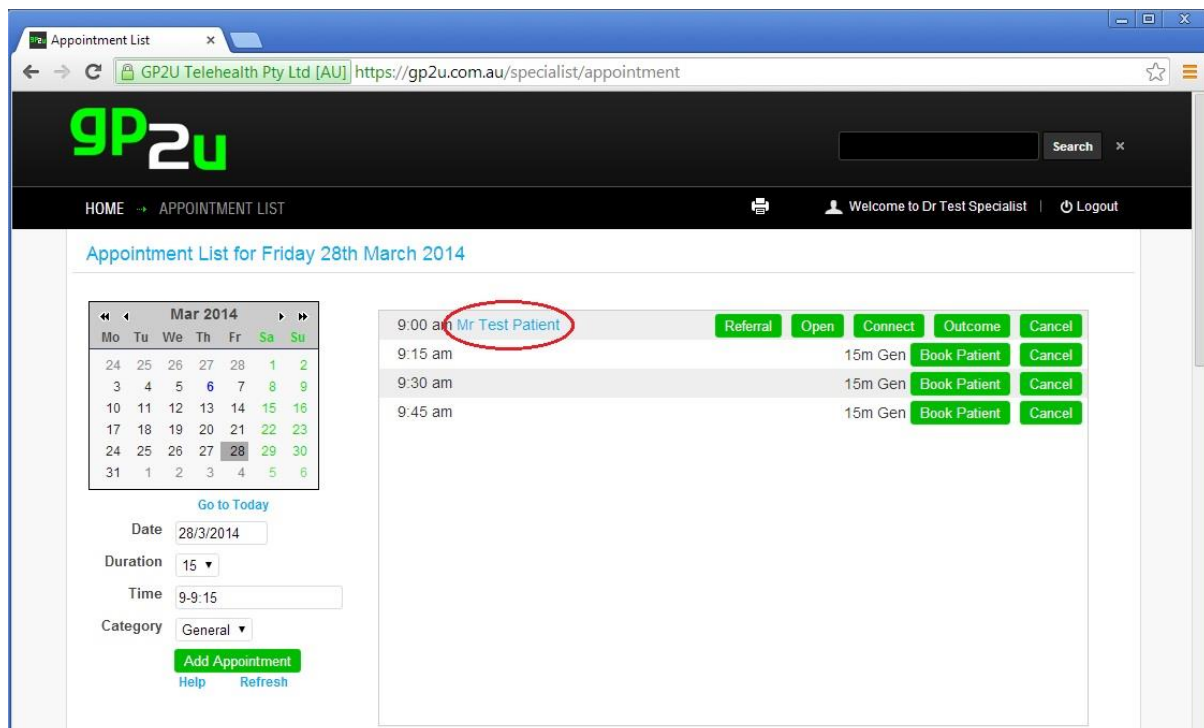

The screenshot shows the same web browser window, but the modal window now displays the "Create New Referring Doctor" form. The form includes several input fields: "Title", "First Name", "Surname", "Address (1)", "Address (2)", "Locality", "Postcode", "State" (a dropdown menu), "Phone(W)", "Provider Number", and "Referral Expiry". There is a note next to the "Referral Expiry" field that says "DD/MM/YYYY (Leave blank for an indefinite referral)". At the bottom of the form are "Back" and "Save" buttons.

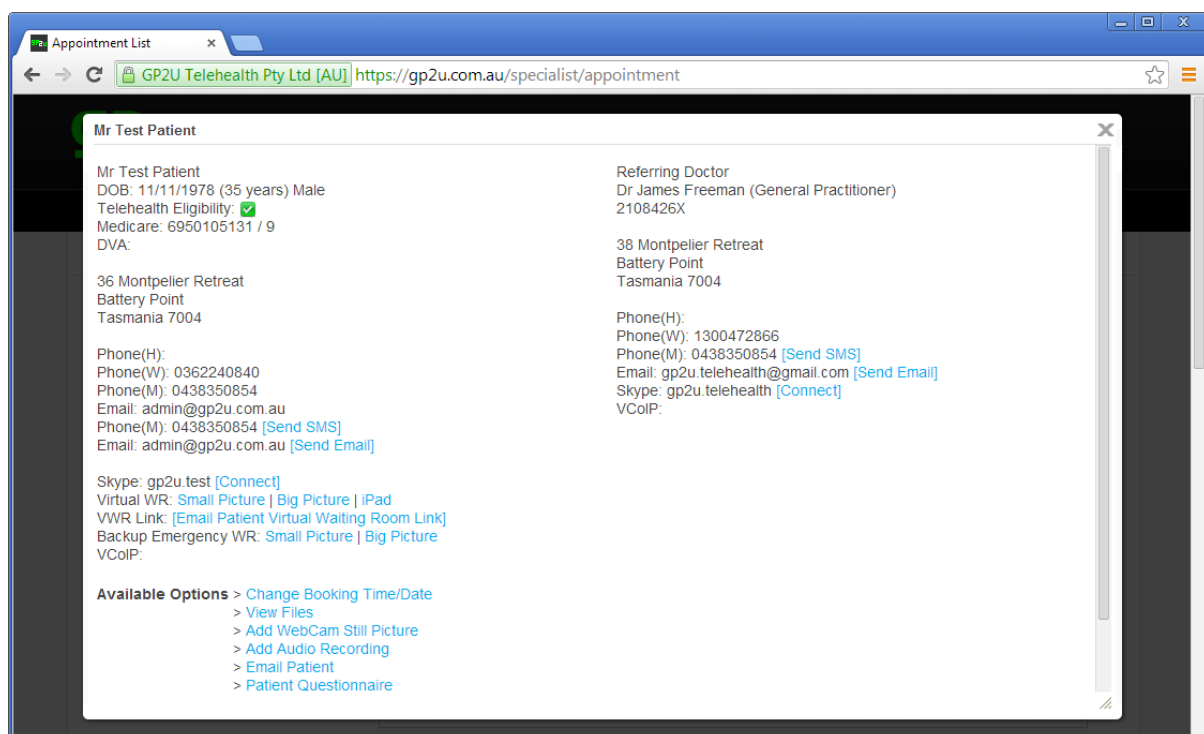

Adding the doctor in at this point will ensure we can find them easily next time.

We collect enough details to make sure letters and reports can reach them.

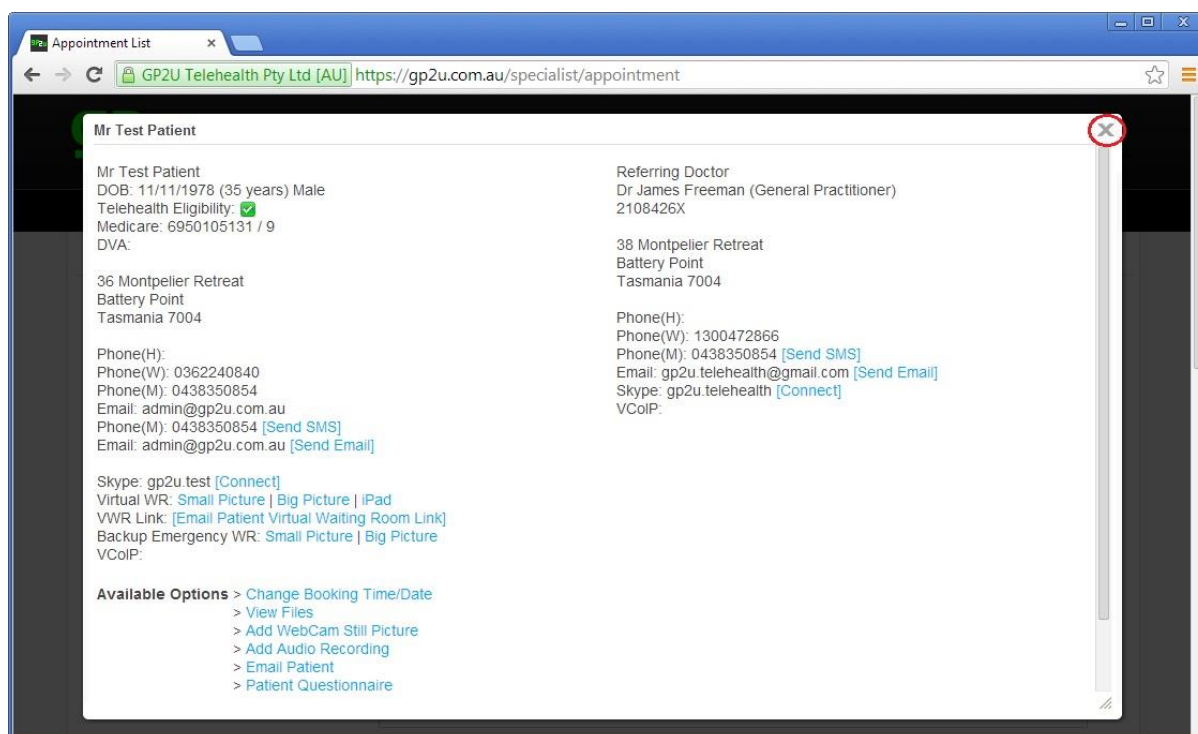

Once the doctor is attached, click on the patient's name:

This brings up all the referring doctors details

Click in the “X” in the top right hand corner to close this window.

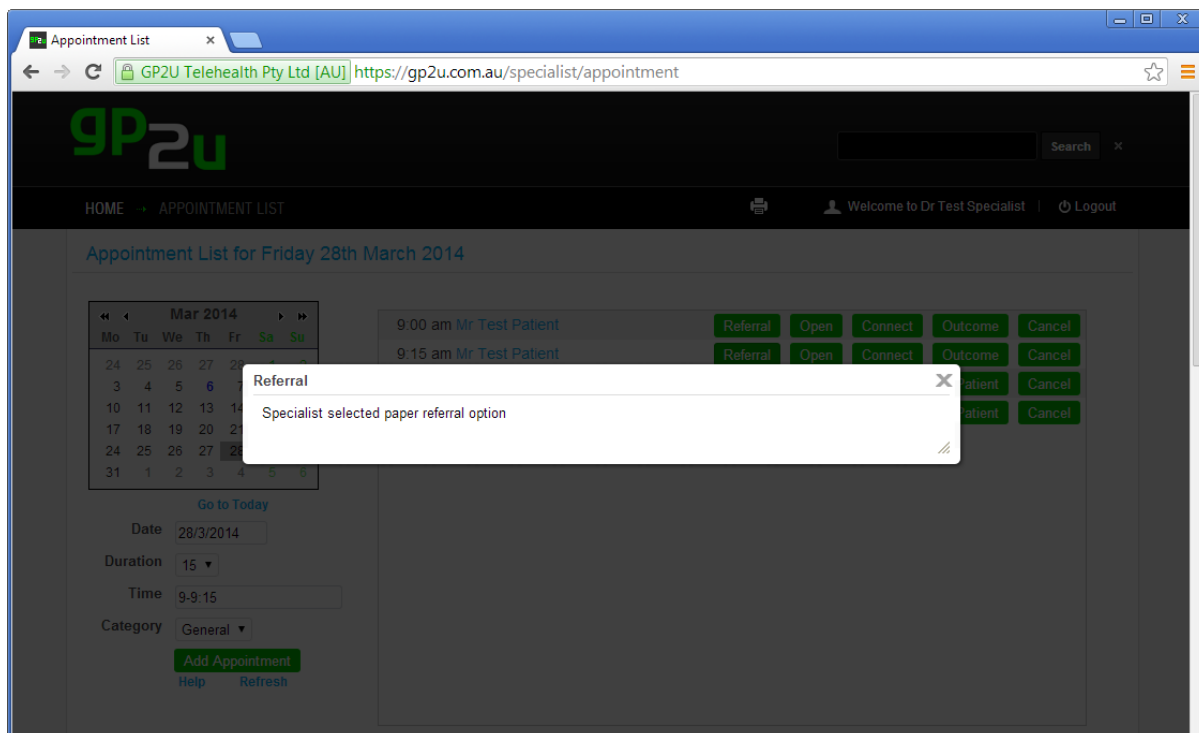

You can also click anywhere outside these pop up windows to close them.

REFERRAL BUTTON

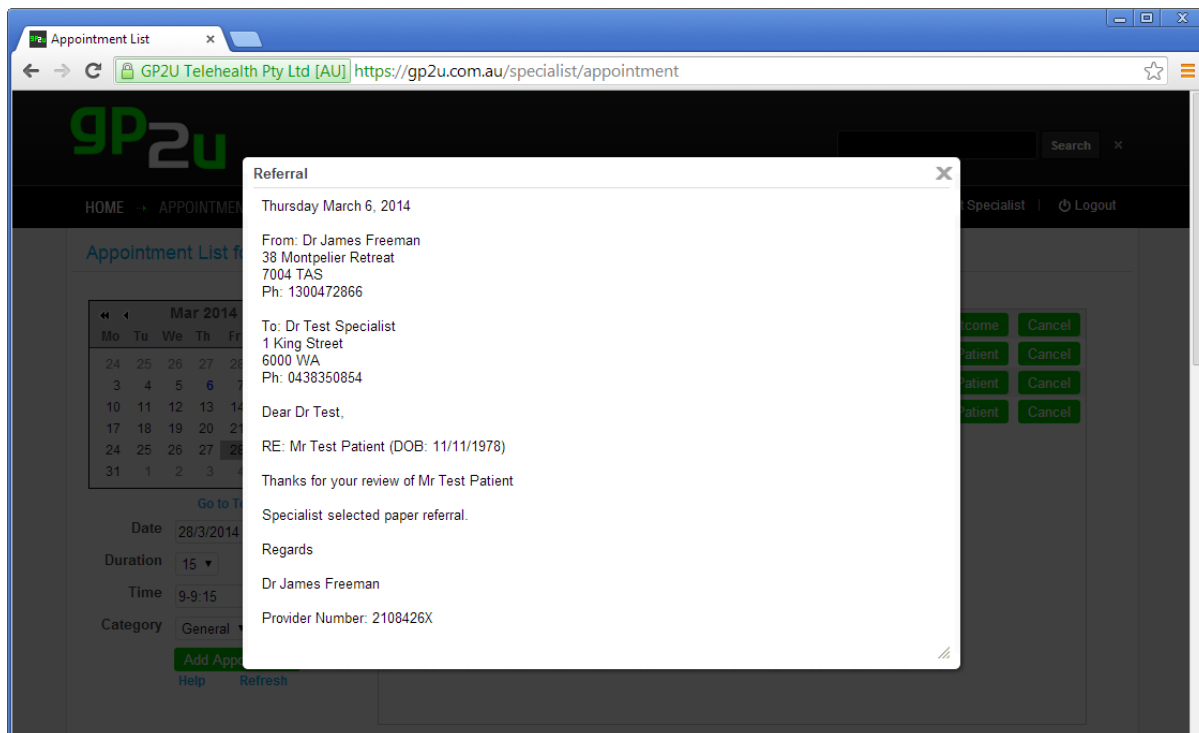

Now let's click in the buttons.

The referral button show you the patients referral.

In this case we see that the paper referral option has been selected.

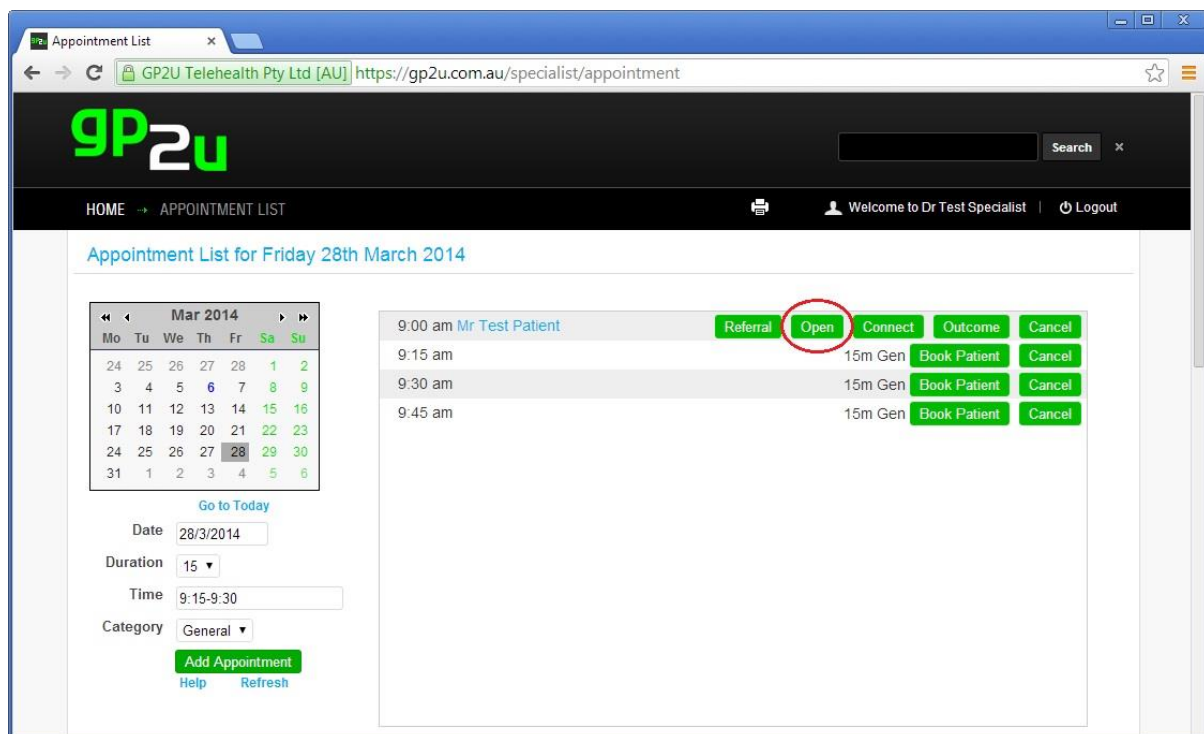

When a GP books a patient directly through GP2U you will see a referral like this:

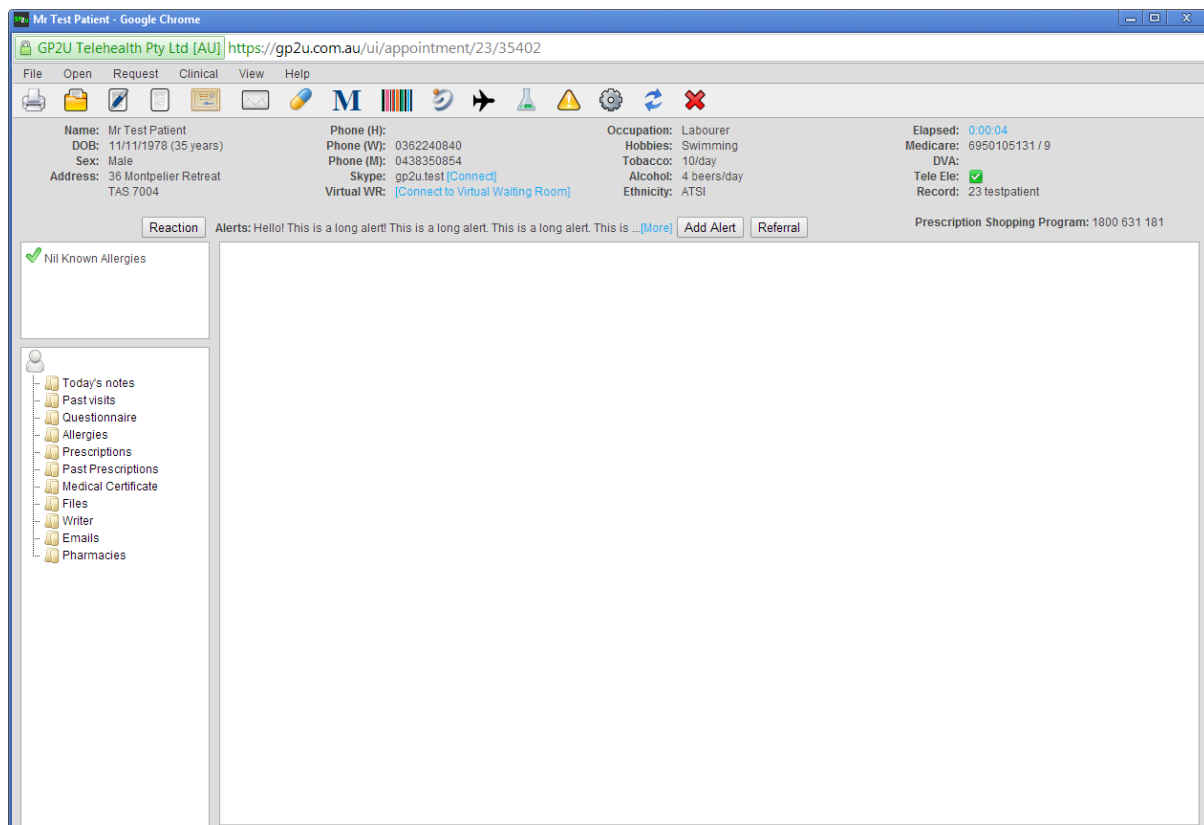

OPEN BUTTON

Next we have the open button.

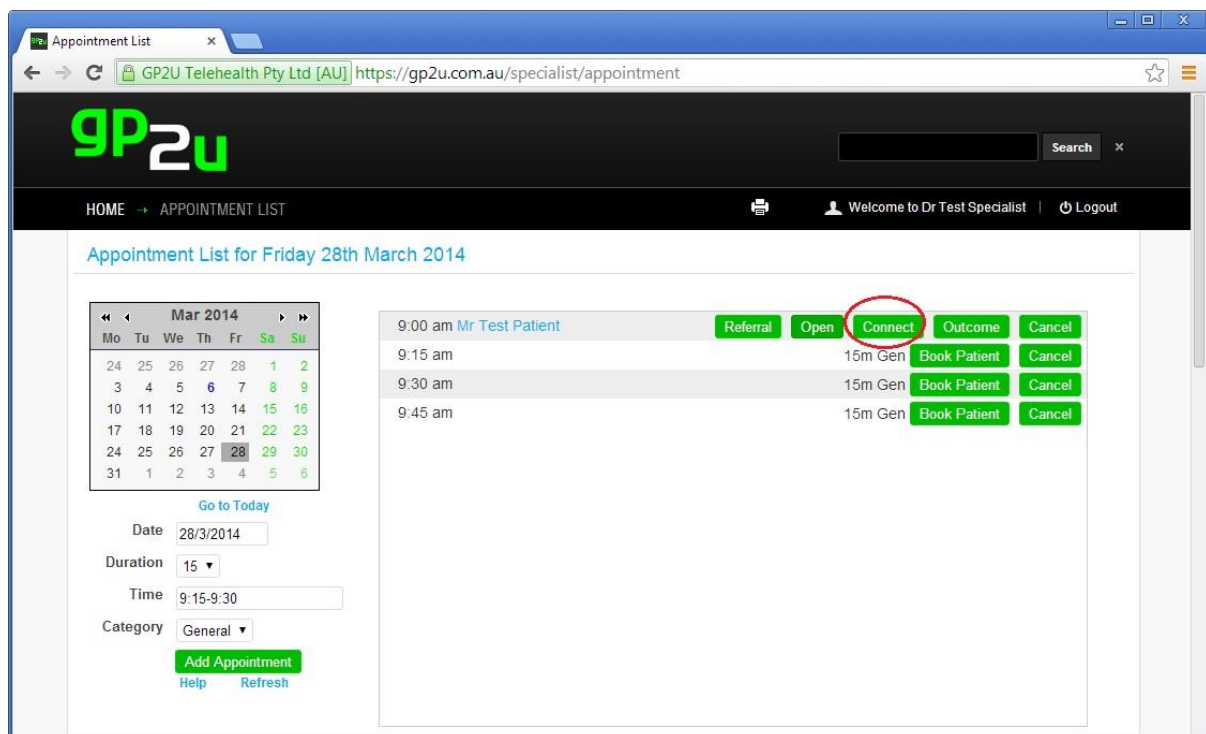

This pops up a window that will probably look familiar. Here you can keep notes, prescribe medications, etc.

Prescriptions made through here will be immediately available to the patient.

CONNECT BUTTON

The “Connect” button does what you expect.

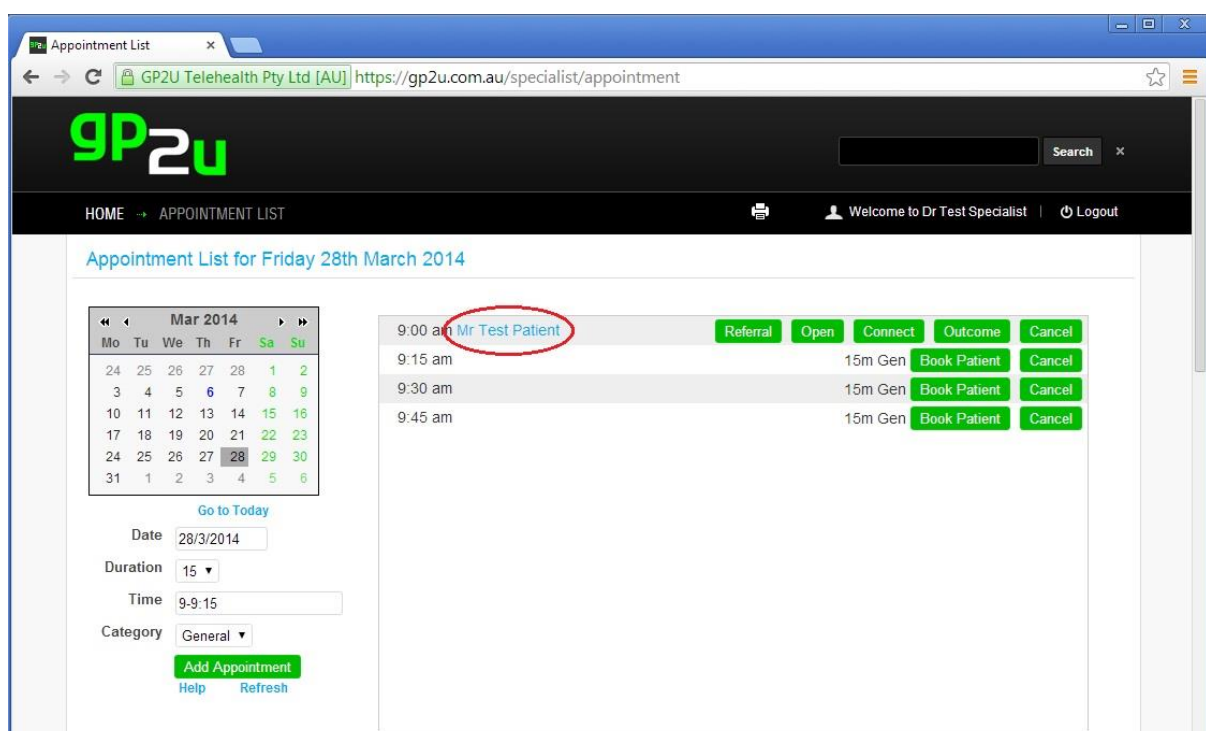

If the patient has a registered Skype address it tries to connect to that.

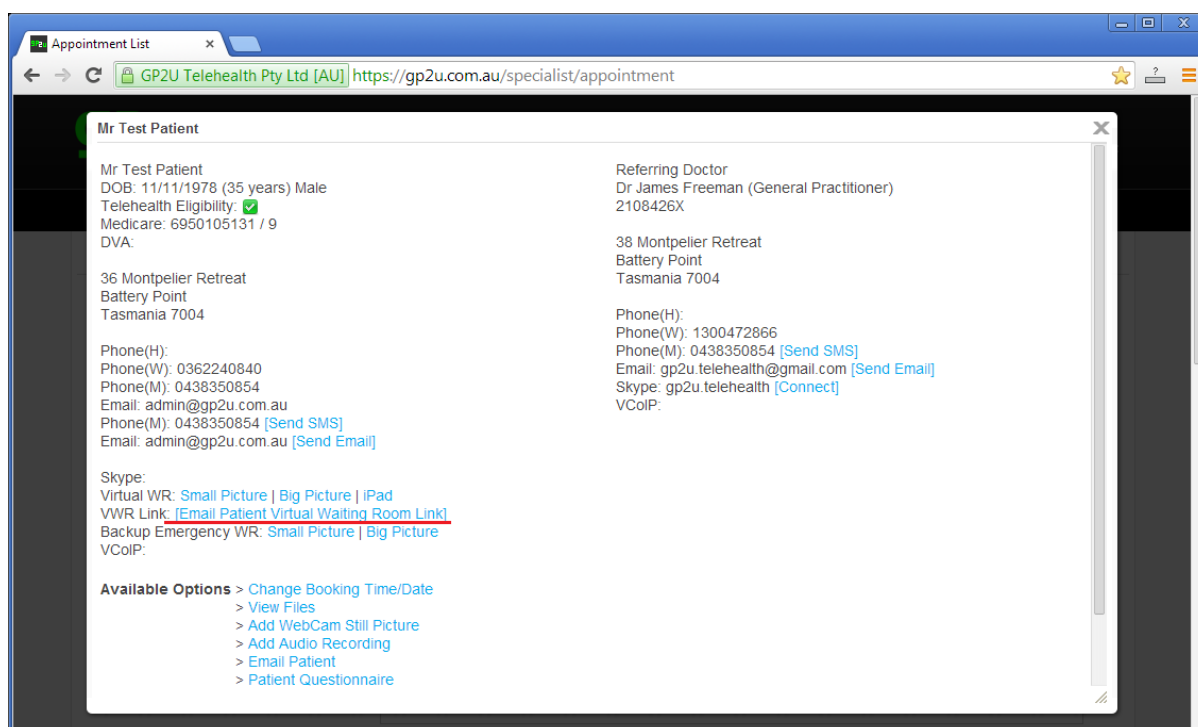

If they don't, the system automatically tries to connect to the Virtual Waiting Room.

If you find a problem connecting with Skype:

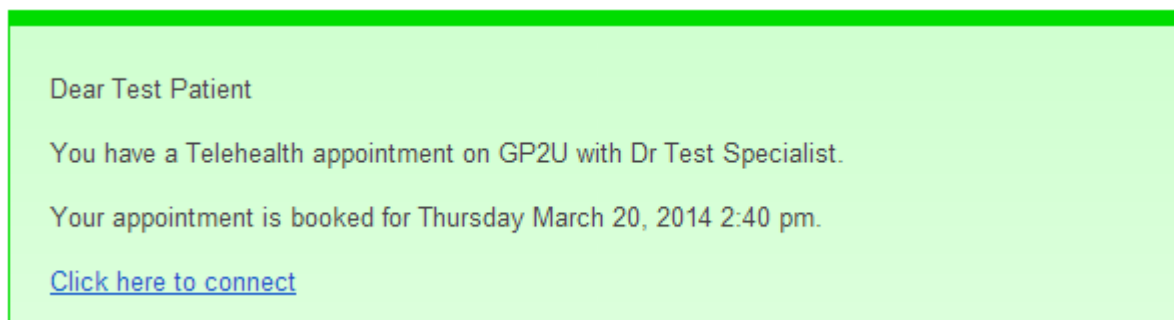

Click on the patient's name and use the Virtual WR link to connect to them there.

If the patient can't login, or has deleted the original appointment email you can resend the Virtual Waiting Room link to the patient using the email shown below:

This will send an email to the patient like this:

All the patient then needs to do is click the email link to be taken to the Virtual Waiting Room, ready for you to connect to them.

And of course there are magazines in the waiting room!

Seriously!

See what it looks like from the patient perspective on the next page.....

SETTING PRIVATE BILLING DETAILS:

If you click on the “Specialist” tab of “Edit Profile” you can set a variety of options.

The screenshot shows the 'Edit Profile' page with the 'Billing' tab selected. The breadcrumb trail is 'HOME > EDIT PROFILE'. The 'Specialist' tab in the navigation menu is circled in red. The page content includes instructions on setting private billing fees and a 'Save' button. A green checkmark and the text 'Profile Updated' are visible at the bottom.

Set your private billing fees here. Only items for which you select a private billing fee will appear in your personal item number list. Each of your usual item numbers has an associated Telehealth item number and schedule fee as shown.

To use this page simply type your private fee into the relevant red box. To set the schedule fee as your private fee just type 1 into the red box.

If you bulk bill Medicare pays 85% of each schedule fee, however the bulk bill bonus becomes payable. Medicare pays this bonus automatically each quarter. Regardless of whether you bulk bill or not Medicare pays a quarterly Telehealth service incentive for each service you provide.

Profile Updated

The screenshot shows the 'Edit Profile' page with the 'Specialist' tab selected. The breadcrumb trail is 'HOME > EDIT PROFILE'. The 'Specialist' tab in the navigation menu is highlighted. The form contains fields for Specialty (Nuclear Medicine), AHPRA, Insurer, Policy Number, Working with children (No), Reg Provider Number, Provider Number (2409581B), Default Billing (Bulk Bill), Appointment Length (15), Bank (ANZ), BSB (123456), Account Number (0987654321), Account Name (Dr Test Spec), and Bill Header Text (Dr Test Specialist, 123 Specialist Way, Hobart). There are also buttons for 'Choose File' for photo and signature, and a 'Preview Invoice' link.

You may wish to set your preferences for default billing and the default appointment length.

While we are on this page let's have a look at how we set up private billing.

Private billing is done via invoice.

The “Bill Header Text” is what appears on this invoice, immediately below the words “TAX INVOICE”.

Here you need to put the details you want to appear, such as the doctor/practice name and address and ABN (if required).

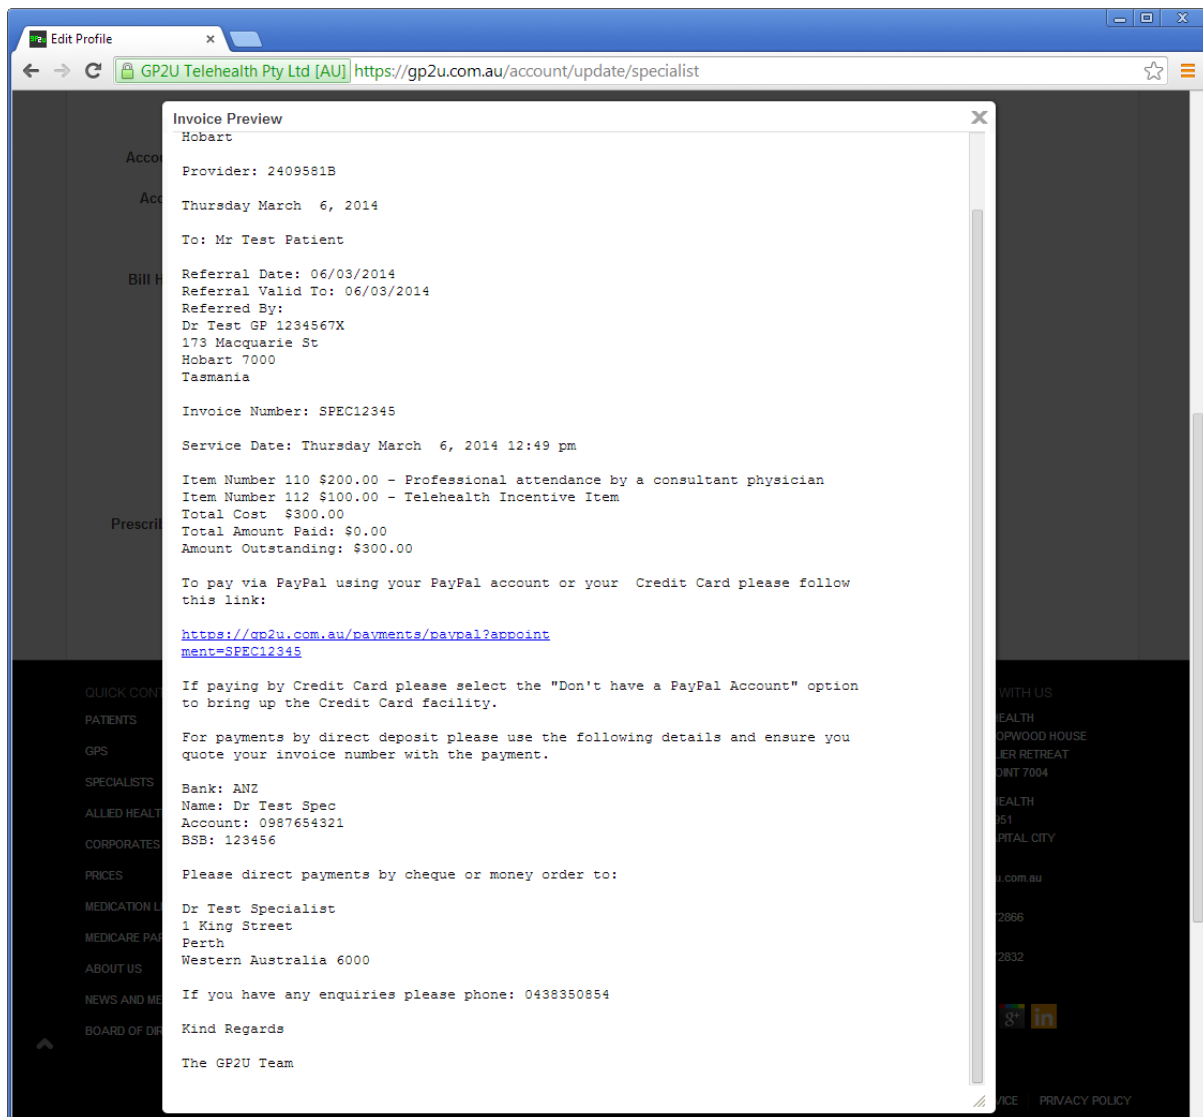

To provide the patient with the options of paying by direct deposit, we also need your bank details for the invoice.

We automatically provide the option to pay by credit card or Paypal.

You can preview the invoice by clicking on the “Preview Invoice” link.

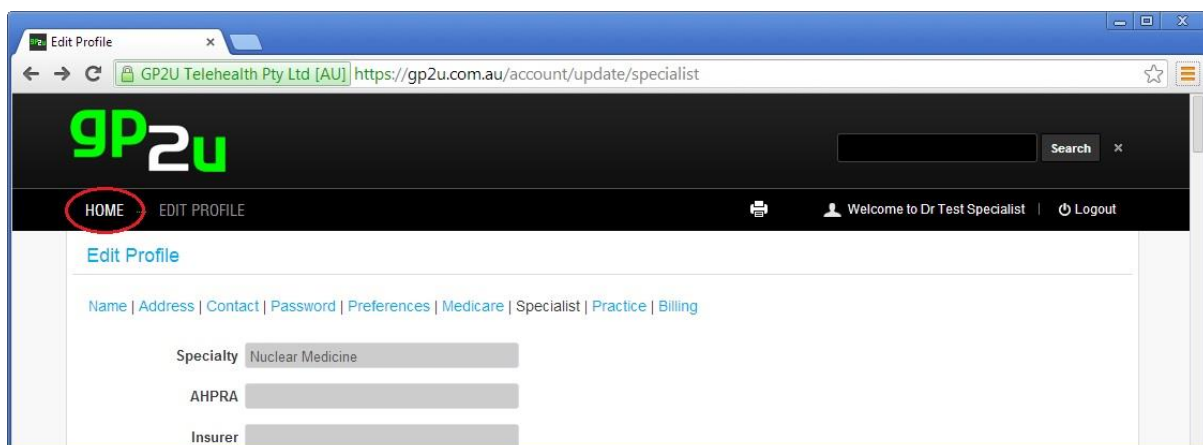

The screenshot shows a web browser window with the address bar displaying "GP2U Telehealth Pty Ltd [AU] https://gp2u.com.au/account/update/specialist". The page title is "Edit Profile". The form contains the following fields and elements:

- BSB: 123456
- Account Number: 0987654321
- Account Name: Dr Test Spec
- Bill Header Text: Dr Test Specialist, 123 Specialist Way, Hobart
- Photo: No photo uploaded, with a "Choose File" button and "No file chosen" text.
- Signature: View signature, with a "Choose File" button and "No file chosen" text.
- X Offset: 0
- Y Offset: 0
- Prescriber Number: (empty field)
- Quals: MBBS
- A green "Save" button.
- A green checkmark icon followed by the text "Profile Updated".
- A blue link "Preview Invoice" circled in red.

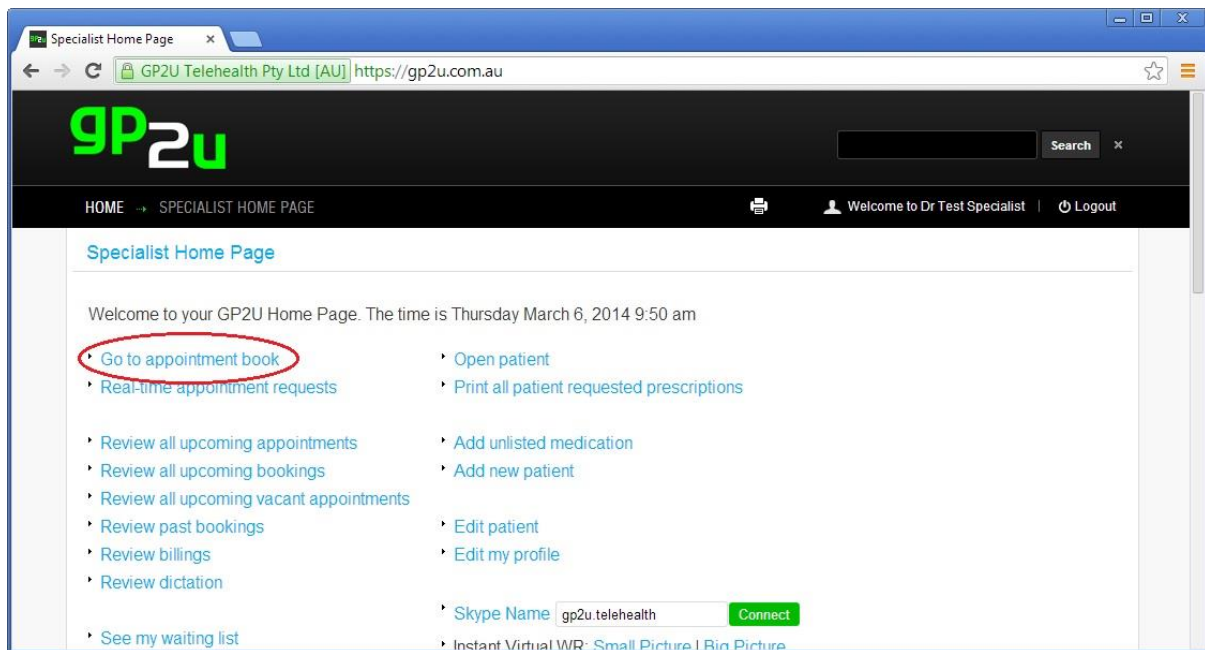

Now let's go back to the appointment book.

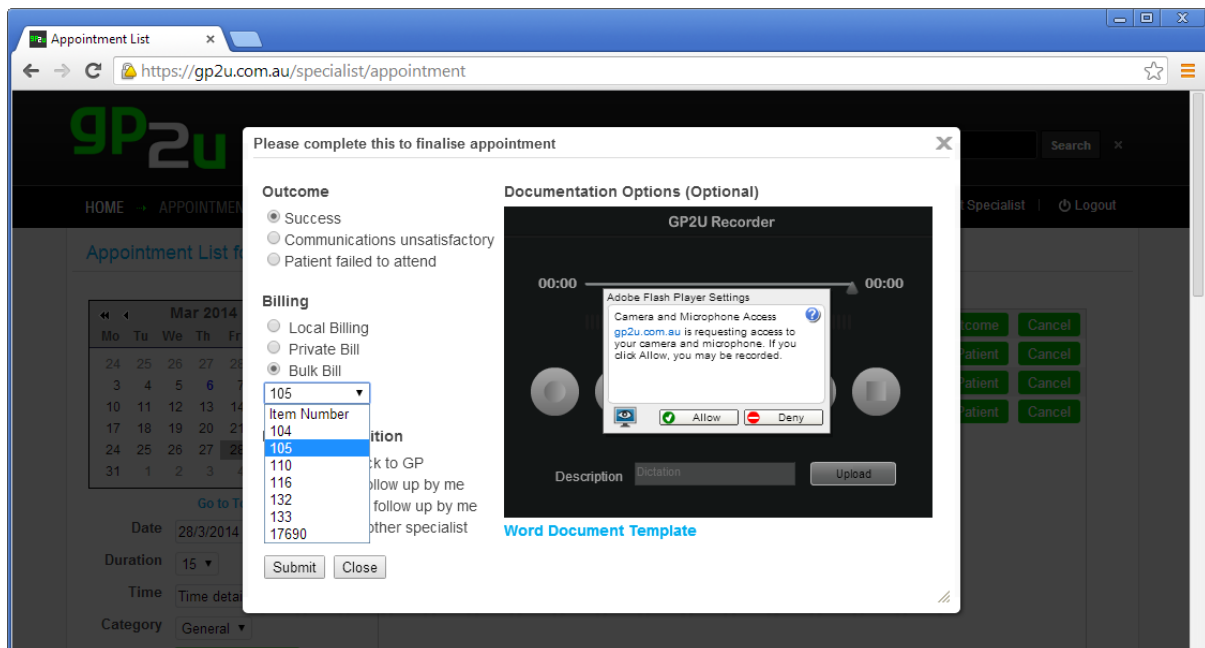

Simply click the "Home" link up the top left:

Then click on the "Go to appointment book" link again.

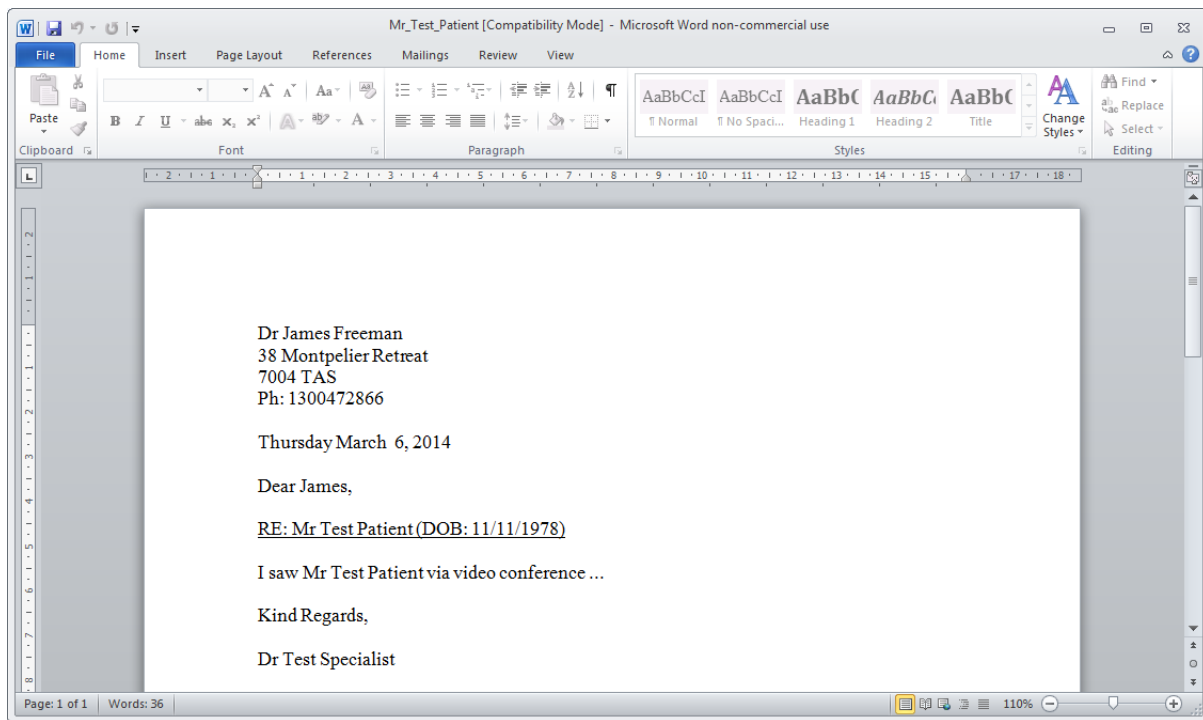

Now when you click the “Outcome” button you will see:

All you need to do is select your item number and any other appropriate options.

Then click “Submit”.

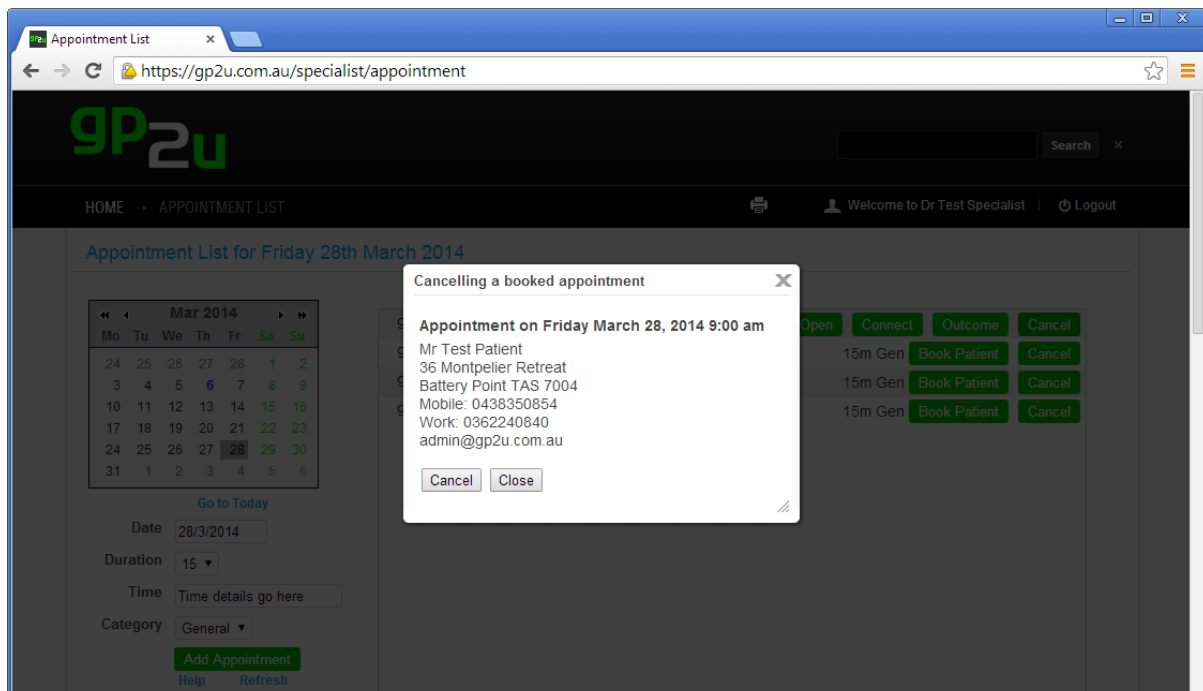

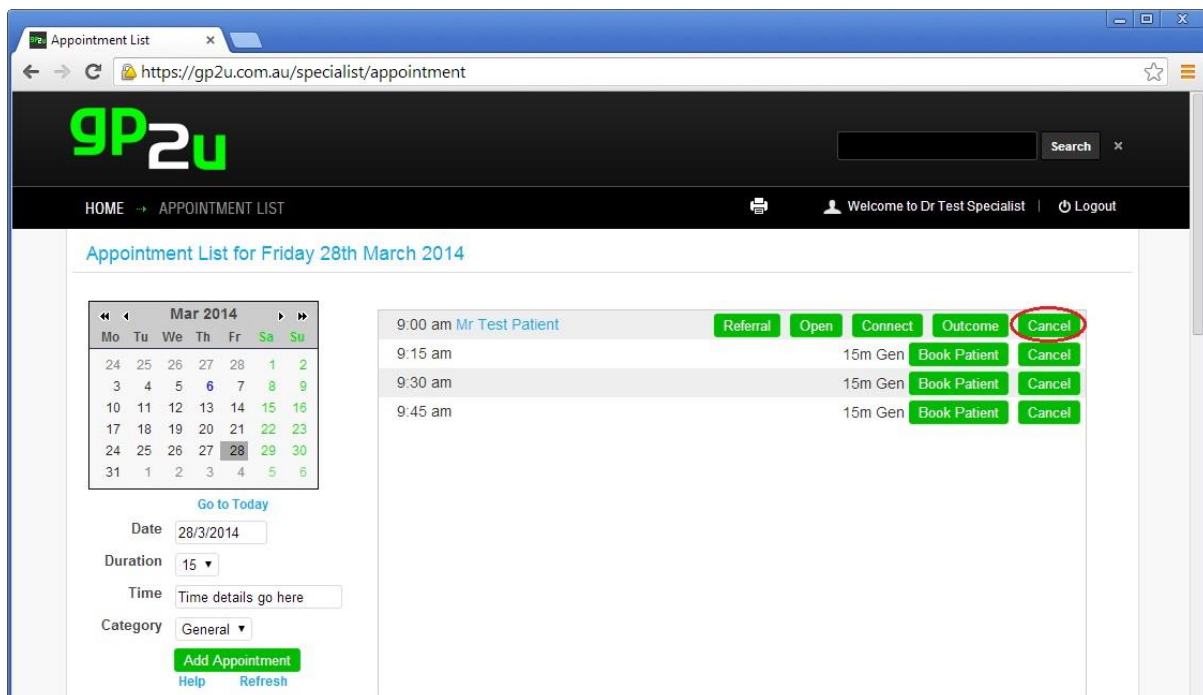

Note that the blue link called “Word Document Template” provides you with a letter template pre-populated with the referring doctor and patient details.

CANCEL BUTTON

The “Cancel” button cancels the appointment.

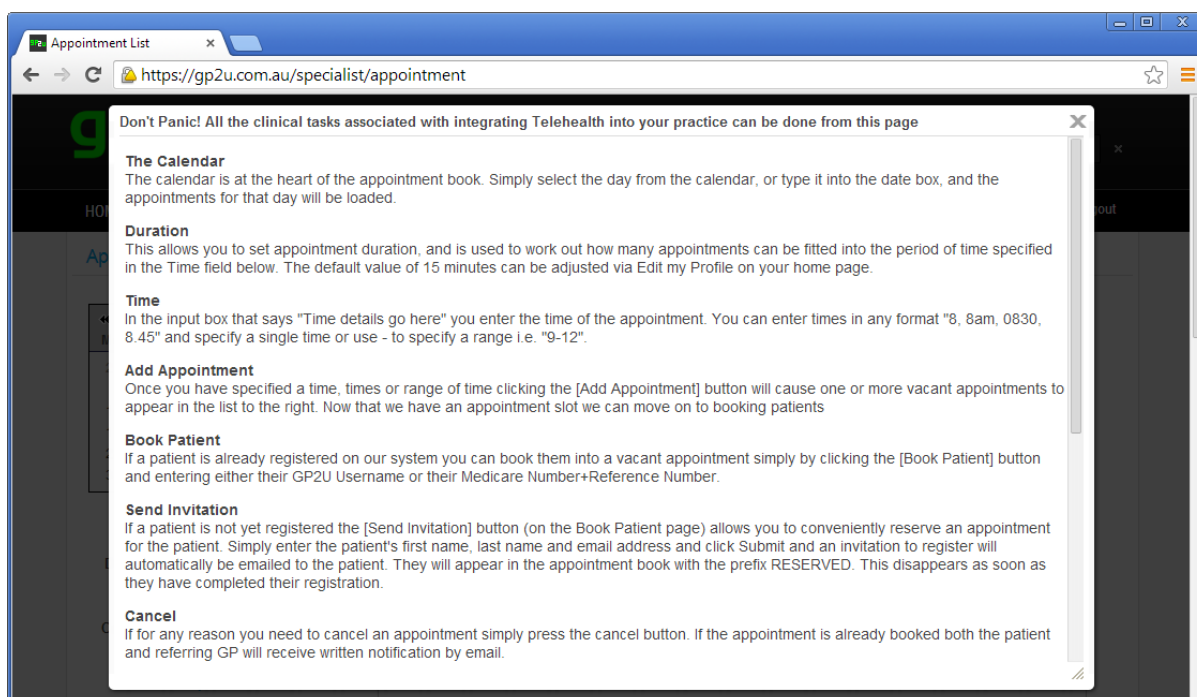

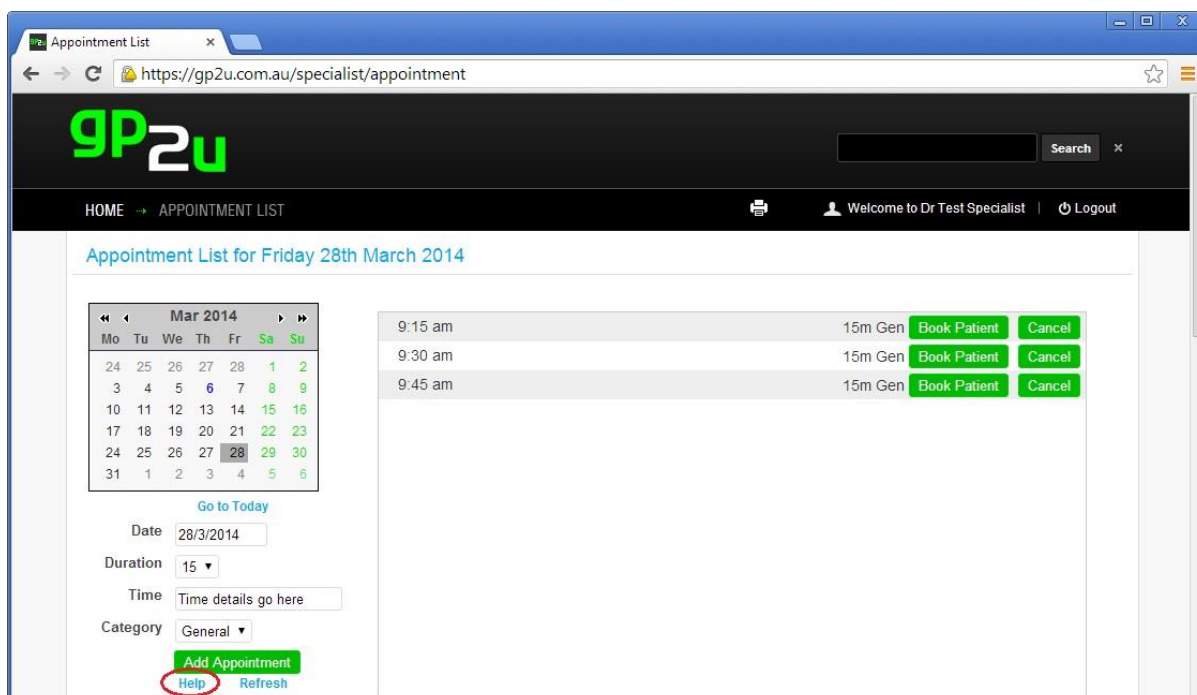

Automatically generated email is sent to the patient (and the referring GP).

HELP LINK

Just below the “Add Appointment” button you will see a link called “Help”.

It will provide you with details about everything on the page.

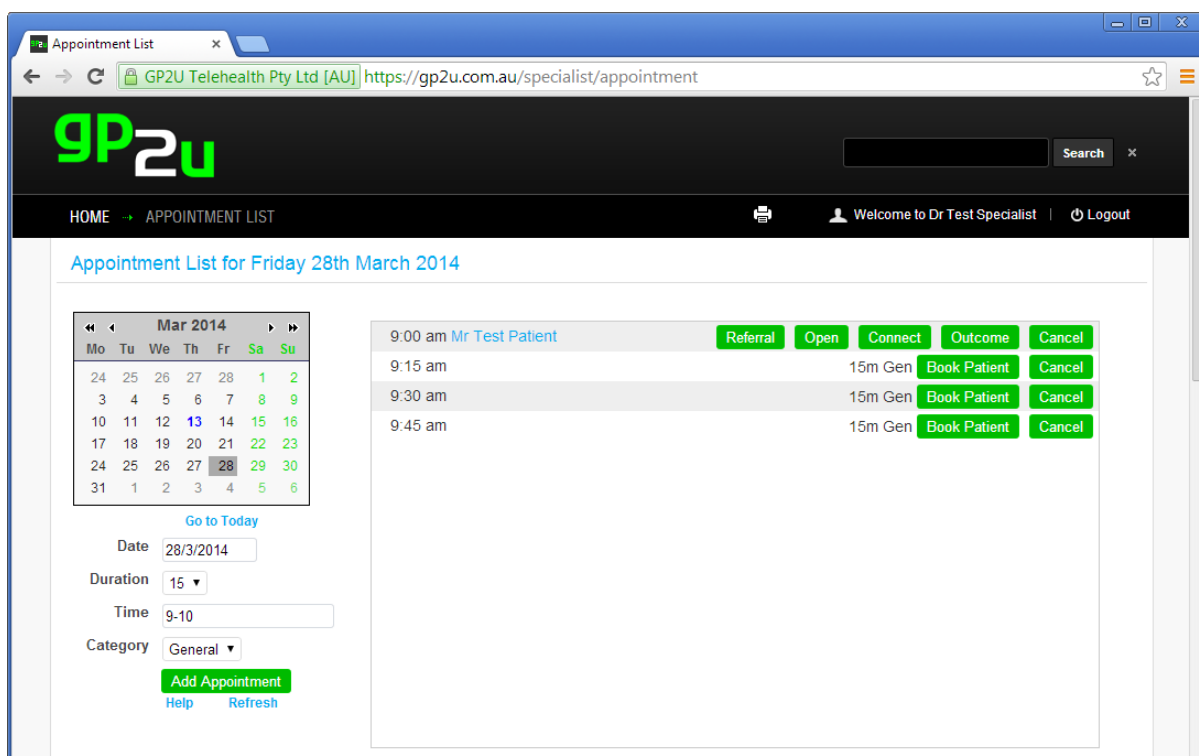

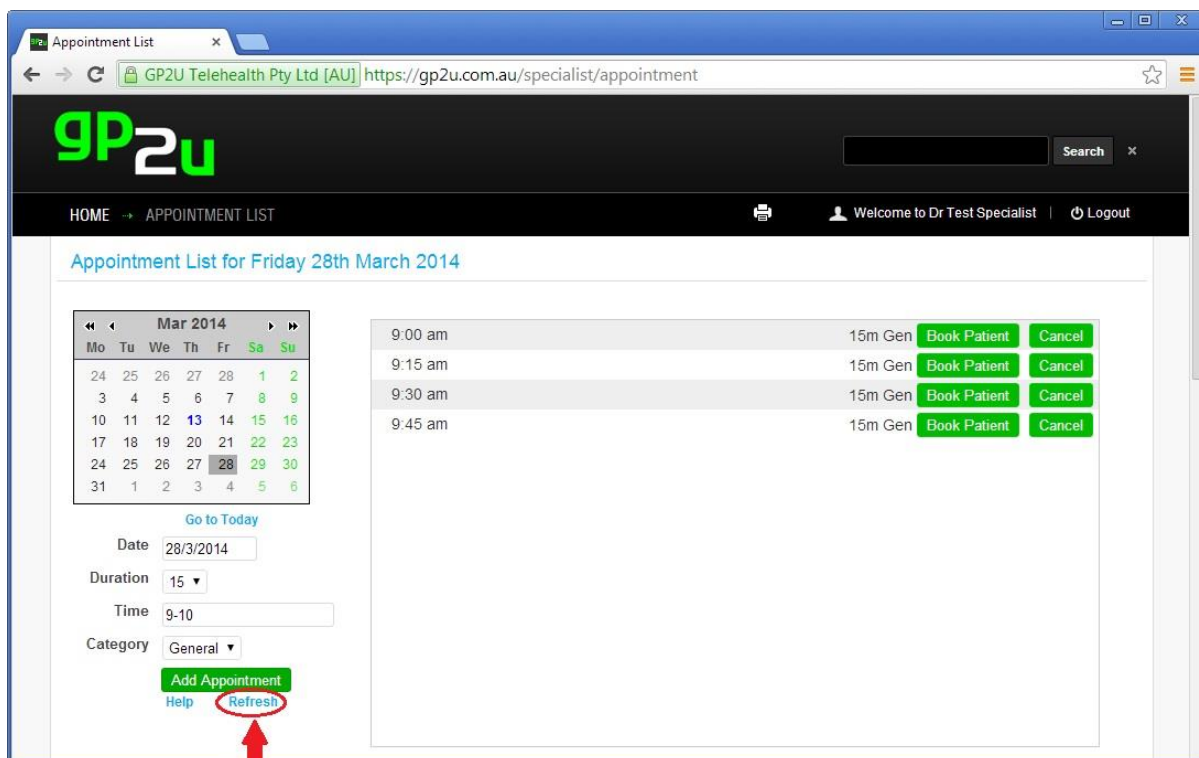

REFRESH LINK

When the appointment book displays, it shows the appointments and patient details as they existed at the time the page was displayed.

If someone books an appointment, this will not show up until you either leave the appointment book and go back or Click on the “Refresh” button below the “Add Appointment” button.

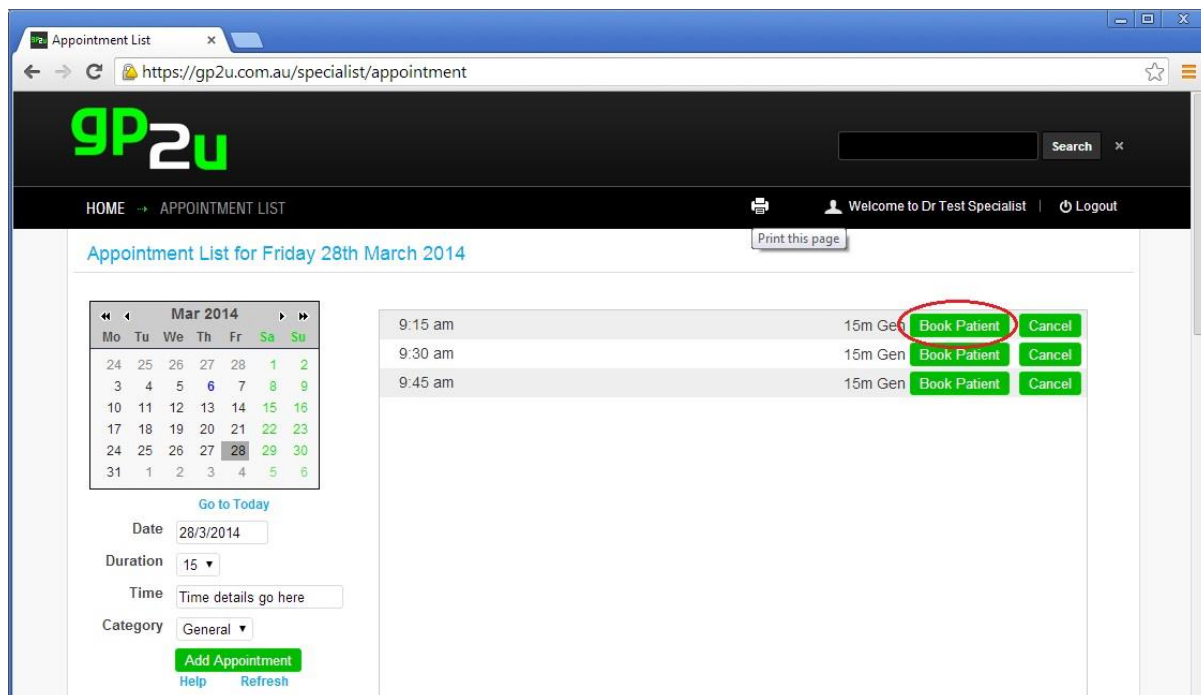

Similarly, if the patient say adds their Skype name in, your page will not reflect that until it is refreshed.

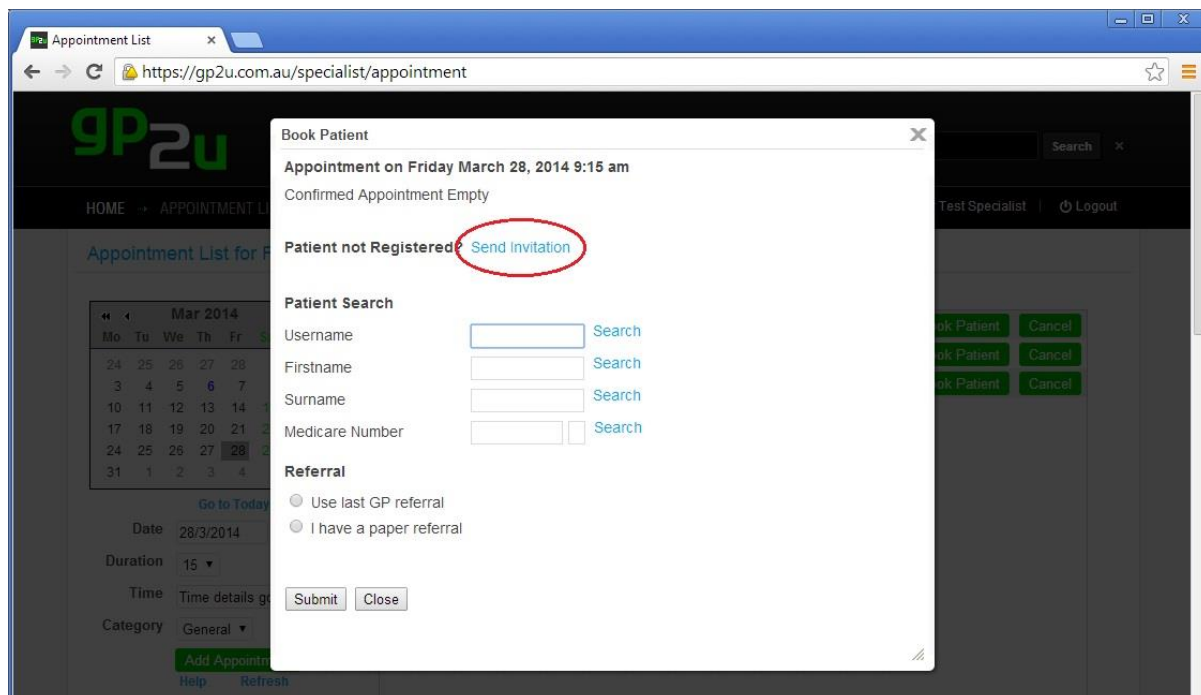

BOOKING NEW PATIENTS

One of the commonest ways specialists become involved in Telehealth is to book an existing patient who needs review into an appointment. Doing this is very quick and easy. Simply make an appointment slot on the desired date and time.

Click the “Book Patient” button.

Instead of searching for the patient (as we did previously) click on the “Send Invitation” link:

Book Patient

Appointment on Friday March 28, 2014 9:15 am
Confirmed Appointment Empty

Patient Information

First Name

Last Name

Email

Confirm Email

Referring Doctor (Optional)

Makes appointment visible to specified doctor

Provider Number [Check Provider Number](#)

Username [Check Username](#)

Surname [Find Doctor](#)

You will notice we have filled in the patient’s first name, last name and email address.

When you press “Submit” this will automatically send the patient an email inviting them to complete their registration.

Before we do that, let’s attach the referring GP:

We can search for GPs by provider number, username or surname.

Here we have entered 2108426X and clicked ‘search’ to find a GP.

You can skip this step and add the GP later if desired.

Book Patient

Appointment on Friday March 28, 2014 9:15 am
Confirmed Appointment Empty

Patient Information

First Name

Last Name

Email

Confirm Email

Referring Doctor (Optional)

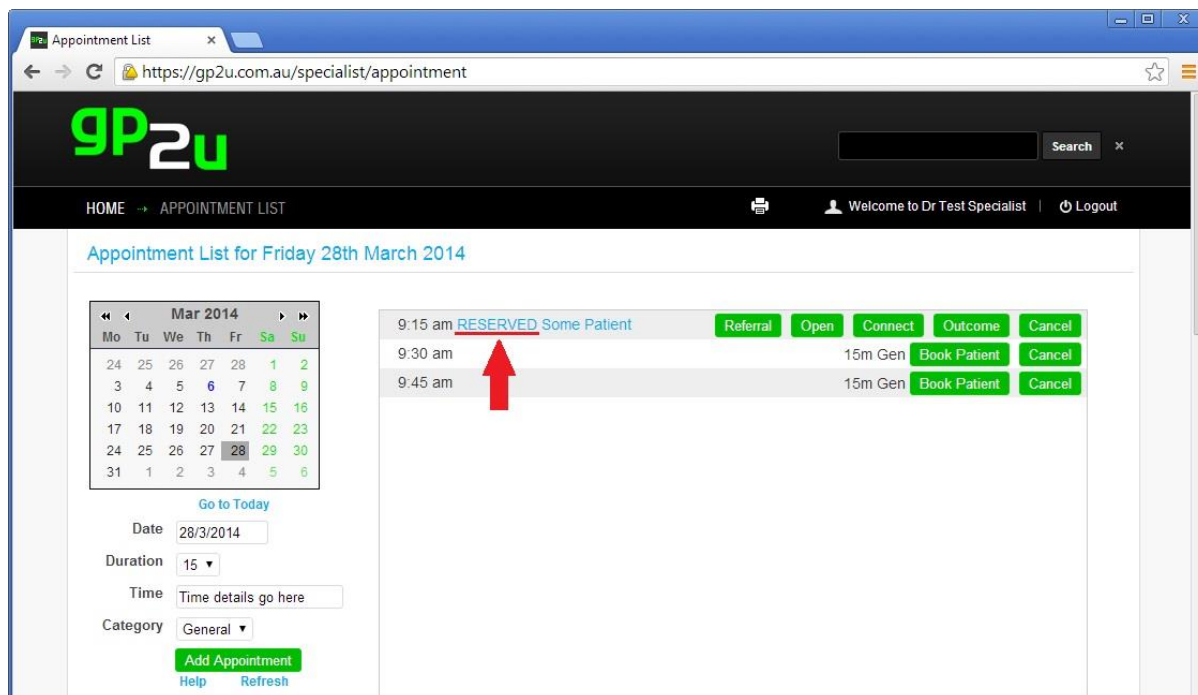

✓ Dr Rio Doctor 152-158 St George's Terrace WA

Provider Number [Check Provider Number](#)

Username [Check Username](#)

Surname [Find Doctor](#)

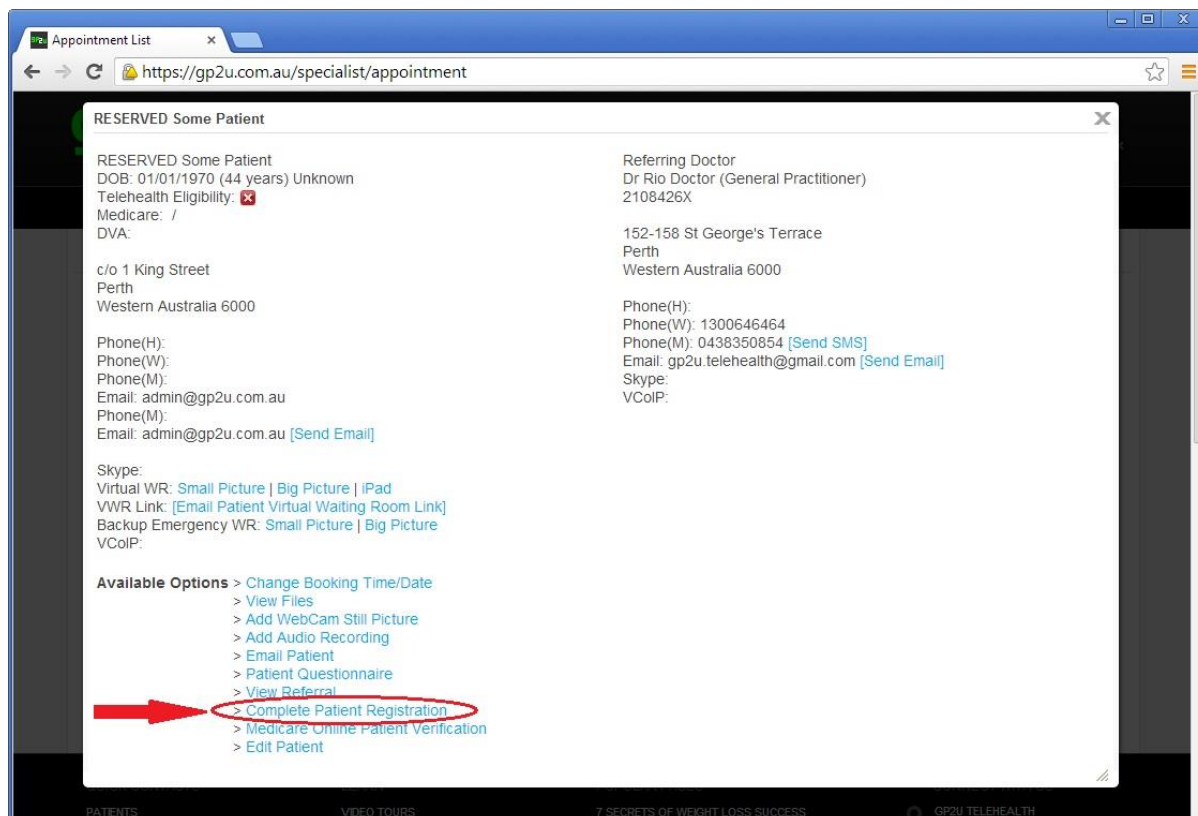

Now what you will see in the appointment book will look like this:

The “RESERVED” flag lets you know the patient has yet to complete their registration.

You or your staff can complete their registration for them.

Simply click on the name and use the “Complete Patient Registration” link.

If you have attached a GP, they will have access to this link as well.

PUBLIC AND PRIVATE APPOINTMENTS

The GP2U system lets you create several appointment types.

Appointments are either “Private” – only you can see them, or “Public” in which case, both GPs and Patients (with a valid referral in the system) can both see and book them remotely.

You select the type of appointment you wish to create using the drop down list:

In the input box that says "Time details go here" -

Enter the time of the appointment.

You can enter times in any format –

"8, 8am, 0830, 8.45" and specify a single time or use - to specify a range i.e. "9-12".

Once you have selected the following –

Date
Duration
Time(s) and
Category

Click “Add Appointment”.

The “New” and “Review” categories –

Indicate to GPs booking appointments that this appointment is suitable for patients that fit that category.

The “General” category –

Is a “catch all.”.

Note: Appointments in any of the above 3 categories become visible to GPs as soon as you create them.

The “Private” appointment category – creates appointments only you can see and book.

To make sure all our GPs know you are offering Telehealth, it's not a bad idea to offer a few appointments over the next month or two. This will help keep you visible.

PATIENT TELEHEALTH ELIGIBILITY

The patient's Telehealth eligibility status is available in several areas.

If you open the patient on the right hand side of the demographic data you will see a green tick or red-cross next to "Tele Ele"

Elapsed: 0:00:06

Medicare: 6950105131 / 9

DVA:

Tele Ele: 

Record: 23 testpatient

Prescription Shopping Program: 1800 631 181

If you click on the patient name in the appointment book you can see it there:

Mr Test Patient

Mr Test Patient

DOB: 11/11/1978 (34 years) Male

Telehealth Eligibility: 

Medicare: 6950105131 / 9

DVA:

And finally, it's also in the upcoming and past appointment lists although you will have to scroll to the right to see it.....

Mar 28, 2014 04:00 pm (Fri)	60 min	Gen	Ms test patient	11 Collins Street Melbourne 3000	VIC	✓	2725	✗

We geocode both your location and the patient’s location and then automatically calculate the distance between you so you can make sure you are compliant with the requirement.

The green tick under the “Tele” heading indicates the patient is in a Telehealth eligible region, and a red cross means they are not in an eligible region. The question mark icon indicates we don’t have an address for that patient yet.

Please note that we use the patient’s registered address to perform these checks and the patient may still be eligible if travelling, in an AMS, RACS etc.

REVIEW ALL UPCOMING BOOKINGS

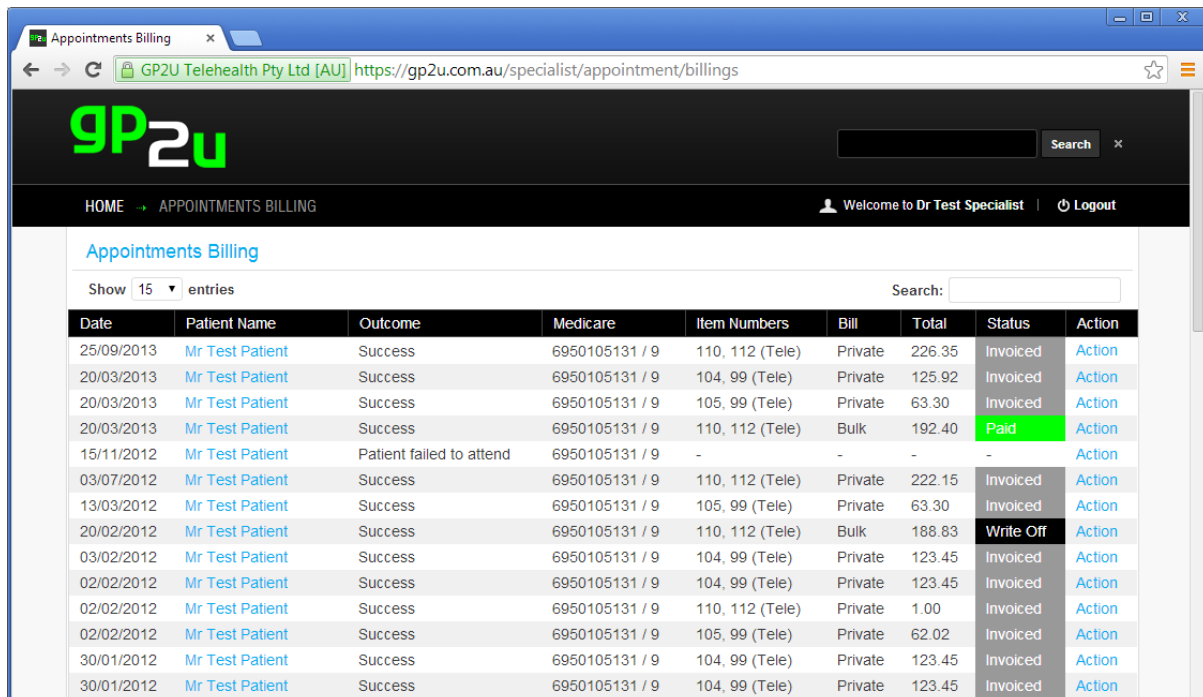

This link provides exactly the same information as the “Upcoming Appointments” table described above except we filter the view to show only those appointments that have patients booked.

REVIEW PAST BOOKINGS

Similar to the upcoming bookings view, this shows past appointments.

REVIEW BILLINGS

Here you will find a record of your billings. As you can see, we show a number of details

The screenshot shows a web browser window with the URL <https://gp2u.com.au/specialist/appointment/billings>. The page header includes the GP2U logo, a search bar, and navigation links for HOME and APPointments BILLING. The user is logged in as 'Dr Test Specialist'. The main content area displays a table of billing records for 'Mr Test Patient'.

Date	Patient Name	Outcome	Medicare	Item Numbers	Bill	Total	Status	Action
25/09/2013	Mr Test Patient	Success	6950105131 / 9	110, 112 (Tele)	Private	226.35	Invoiced	Action

03/07/2012	Mr Test Patient	Success	6950105131 / 9	110, 112 (Tele)	Private	222.15	Invoiced	Action
13/03/2012	Mr Test Patient	Success	6950105131 / 9	105, 99 (Tele)	Private	63.30	Invoiced	Action
20/02/2012	Mr Test Patient	Success	6950105131 / 9	110, 112 (Tele)	Bulk	188.83	Write Off	Action
03/02/2012	Mr Test Patient	Success	6950105131 / 9	104, 99 (Tele)	Private	123.45	Invoiced	Action
02/02/2012	Mr Test Patient	Success	6950105131 / 9	104, 99 (Tele)	Private	123.45	Invoiced	Action
02/02/2012	Mr Test Patient	Success	6950105131 / 9	110, 112 (Tele)	Private	1.00	Invoiced	Action
02/02/2012	Mr Test Patient	Success	6950105131 / 9	105, 99 (Tele)	Private	62.02	Invoiced	Action
30/01/2012	Mr Test Patient	Success	6950105131 / 9	104, 99 (Tele)	Private	123.45	Invoiced	Action
30/01/2012	Mr Test Patient	Success	6950105131 / 9	104, 99 (Tele)	Private	123.45	Invoiced	Action

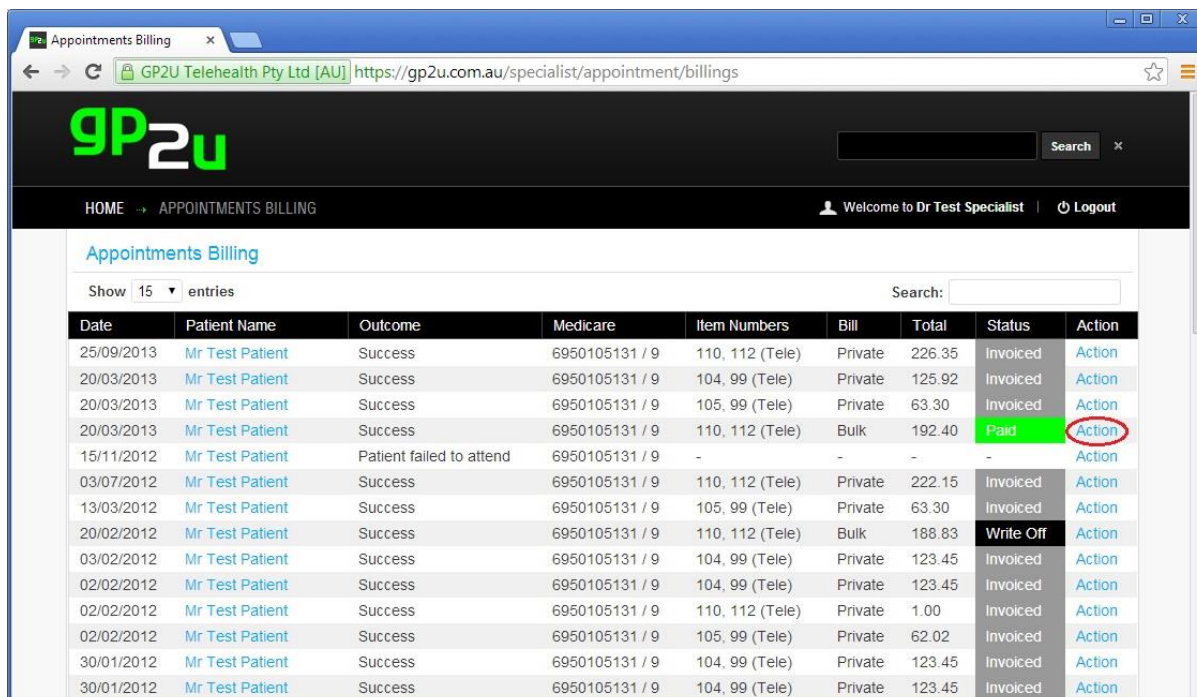

Bills can be marked in a number of ways.

When you first bulk bill a patient you see the status as being “Pending”. Each morning (about 4 am) we query the Medicare servers for both processing and payment reports.

If the bill has been paid, the system automatically marks it as paid.

Similarly, if the billing has failed it is marked with a red error message.

The “Action” link allows you to do various things associated with the patient’s bill.

As you can see, we have a number of links that set the billing status manually.

We also provide links to get the Medicare processing and payment reports.

In the event a bill fails, you also have the ability to resubmit the claim here, perhaps having corrected the patient’s Medicare card details or after selecting an alternate item number.

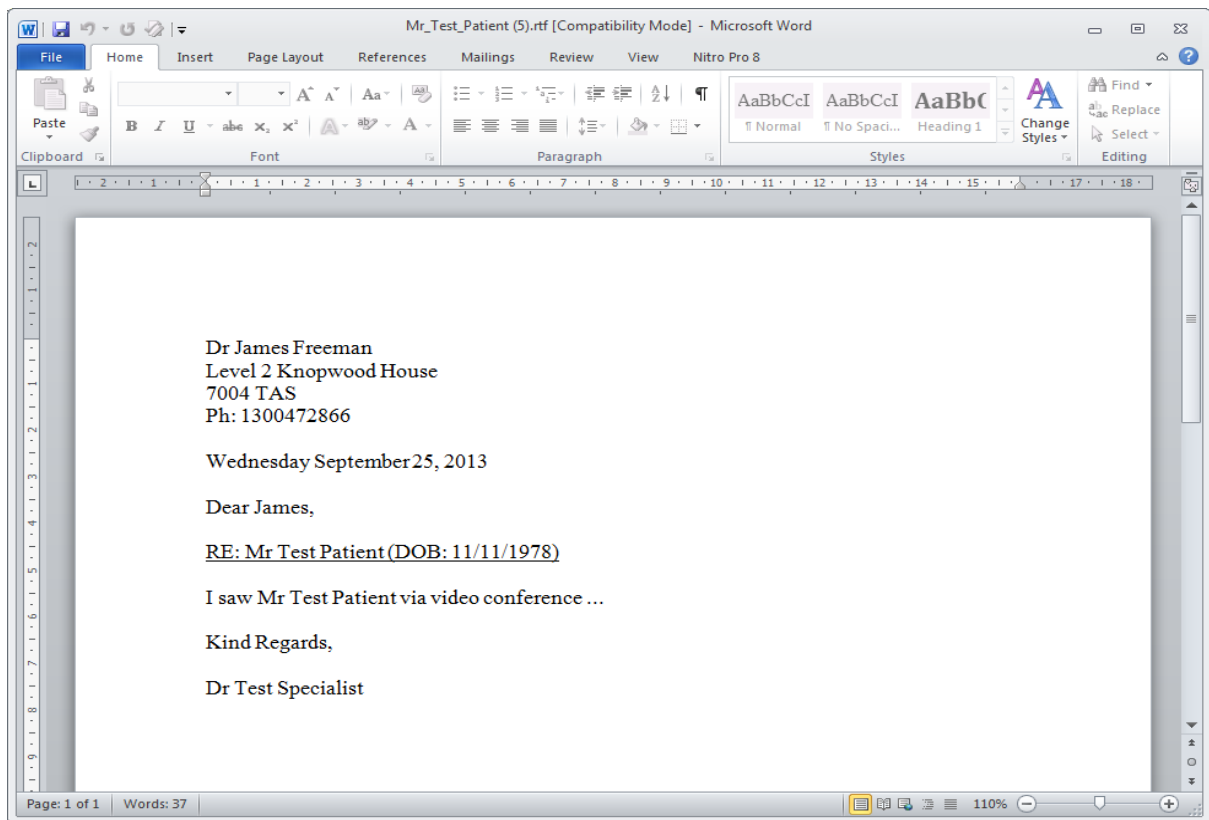

REVIEW DICTATION

You may have noticed that there is a Dictaphone built into the “Outcome” widget in the Appointment Book. You can access these dictations here and forward them on to your secretary or a transcription service.

For your convenience a word document template is supplied.

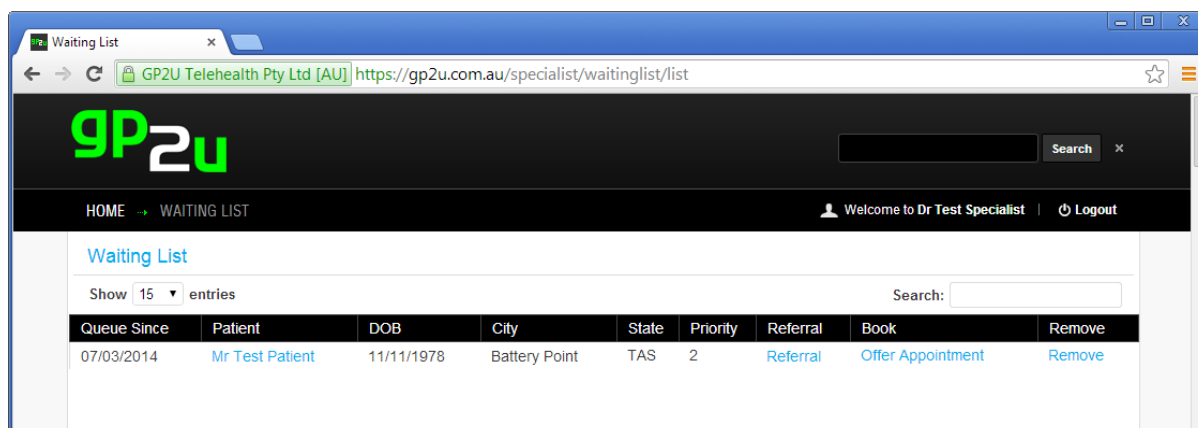

This already has many of the details of a standard response letter filled in like the GP address, patient's details, etc.

This is the same template you can access from the “Outcome” widget

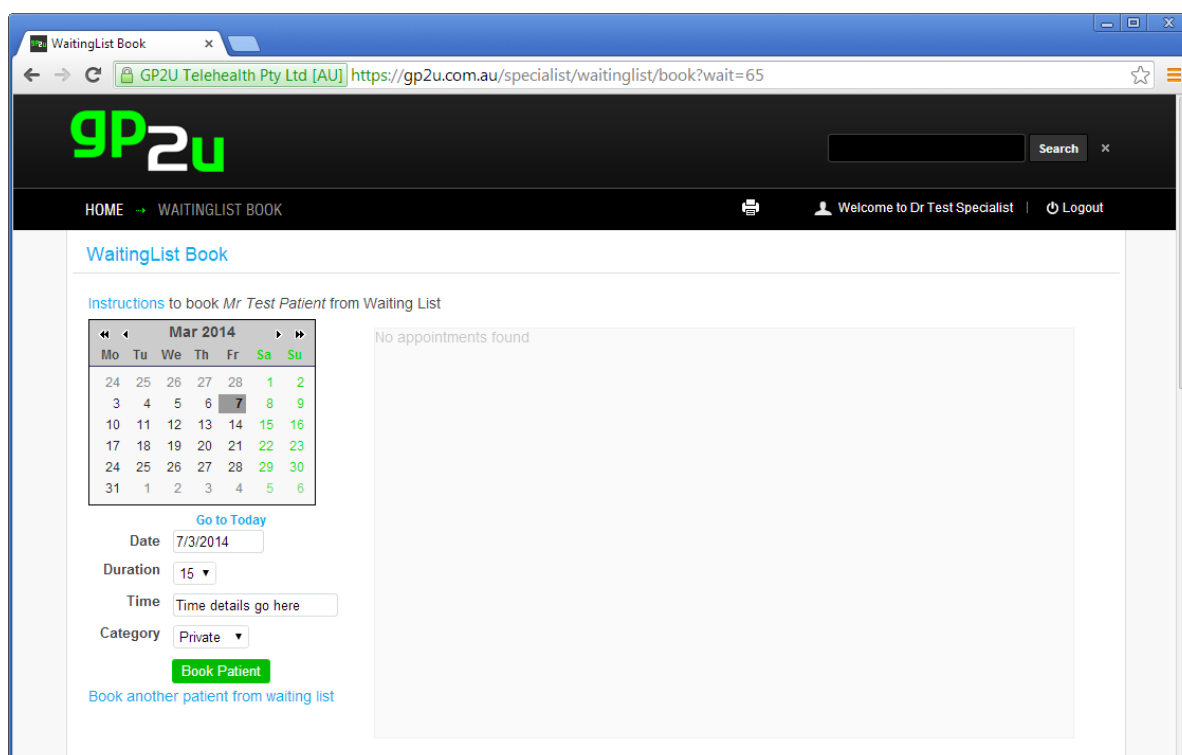

SEE MY WAITING LIST

If you don't have any appointments available, and a GP wishes to, they can add patients to your waiting list. These patients appear here.

You can see the patient details, read the referral, offer an appointment or remove the patient from the waiting list by following the links.

If you click on the "Offer Appointment" link you will see a page like this which shows your appointment book, along with any bookings.

Simply select a time. (We have chosen 3:00 PM)

3:00 pm Waiting List Offer

15m Pvt Book Patient Cancel

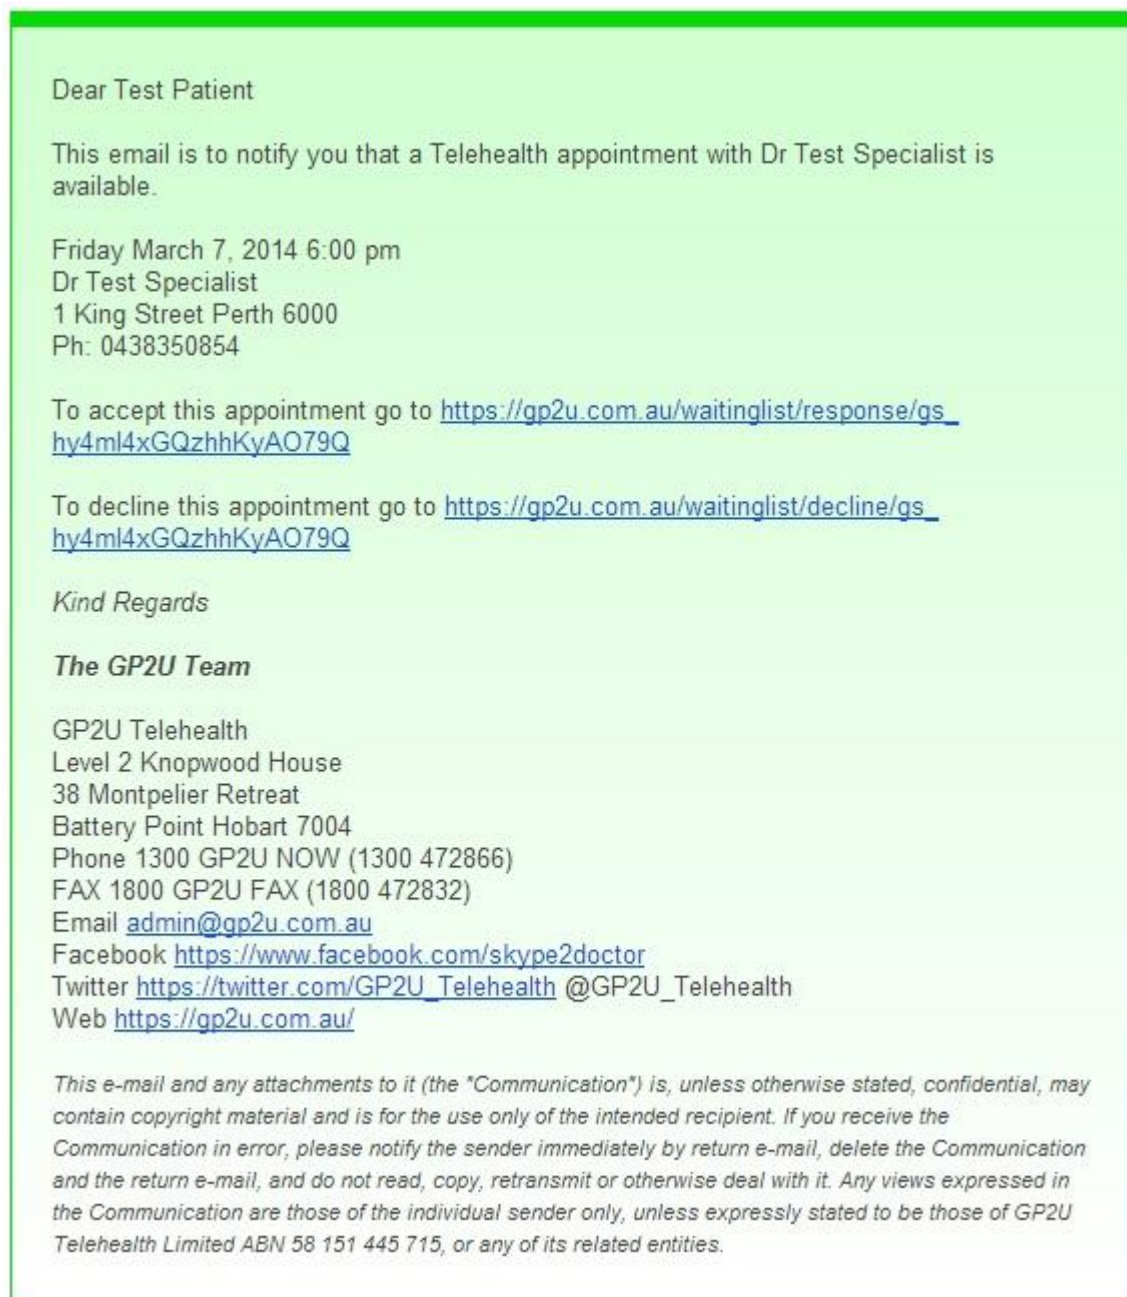

As you can see, the appointment appears as a waiting list offer.

You can click on this to see the patient's details and the referral.

When you offer an appointment, the patient gets an email with the appointment offer.

This email contains 2 links. One to accept the appointment and one to decline it:

If they accept the offer they then appear as a normal appointment and both the patient and referring GP are notified.

If they decline the offer then they are put back on your waiting list.

SEE STATEWIDE WAITING LIST

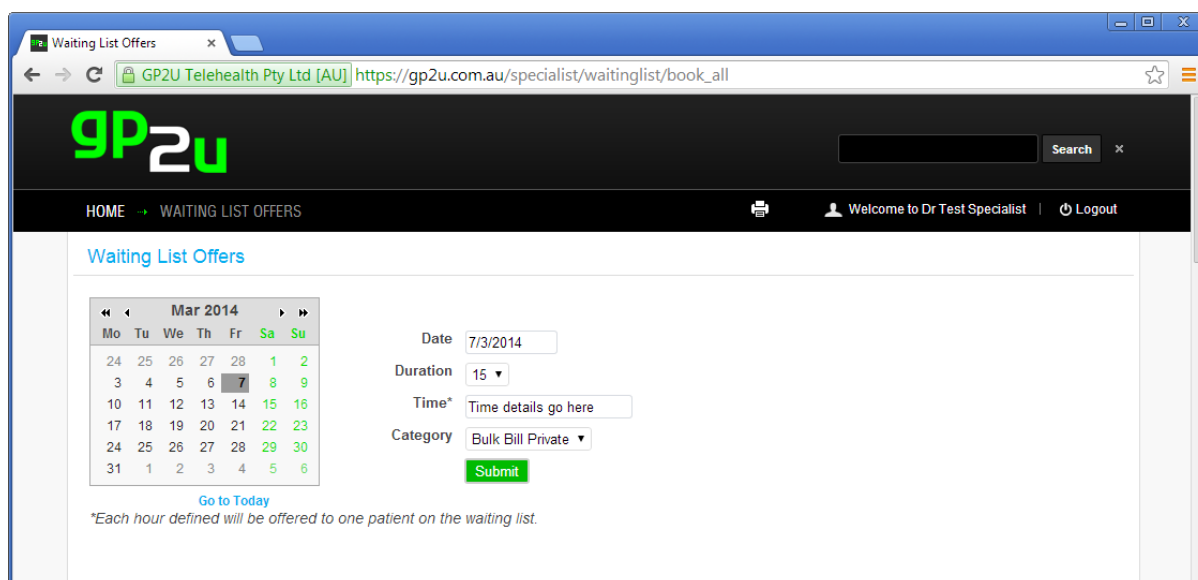

This works the same way as your personal waiting list but is open to any doctor in your speciality and state.

SEE NATIONAL WAITING LIST

This works the same way as your personal waiting list but is open to any doctor in your speciality..

OFFER APPOINTMENTS TO WAITING LIST PATIENTS

Using this you can automatically offer appointments to one or more patients.

Here you can open any patient's record.

Please note that for privacy purposes, all patient record access is logged and this access log is available to the patient for their review.

To find a patient just type in some of their details, the list will shorten as you add more detail.

Once you find the patient you are looking for, just click on the row that contains them:

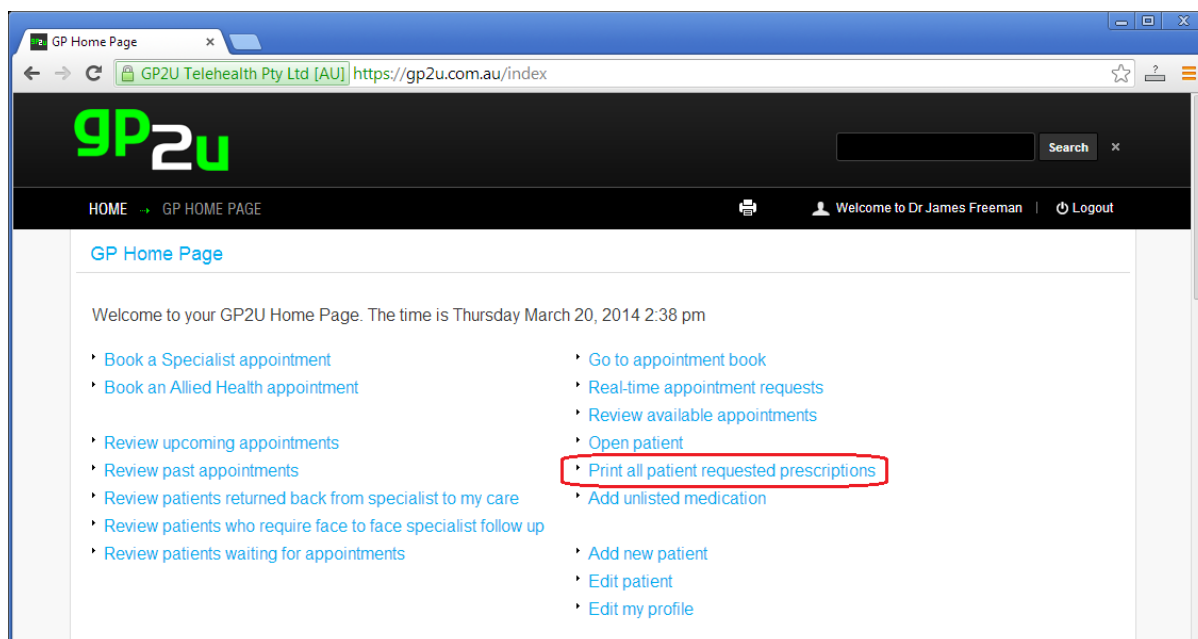

This will open their record in a cloud based patient management system that looks and functions similarly to Best Practice / Medical Director.

Discussion of how to use this is covered in another document.

It basically works as you expect with a few nifty features related to Telehealth; for example, if you prescribe a medication in the usual way, this is immediately available to the patient to FAX through to a pharmacy of their choice.

PRINT ALL PATIENT REQUESTED PRESCRIPTIONS

In the patient management system, if you prescribe a medication the patient has the choice about where that goes.

If you click on the link, a PDF comes up with all these prescriptions.

All you need to do is print this on PBS paper, sign the scripts, and put them in window-faced envelopes and into the mail.

The correct destination address is automatically put in, so if the patient has requested the script be posted to them, that is the address that appears.

If they requested that the script, goes to a specific pharmacy, that is the address that appears.

The only tricky bit here is making sure these scripts are printed full size.

Right click on the script and select "Print"

Please make sure you remove the tick where it says “Fit to page”.

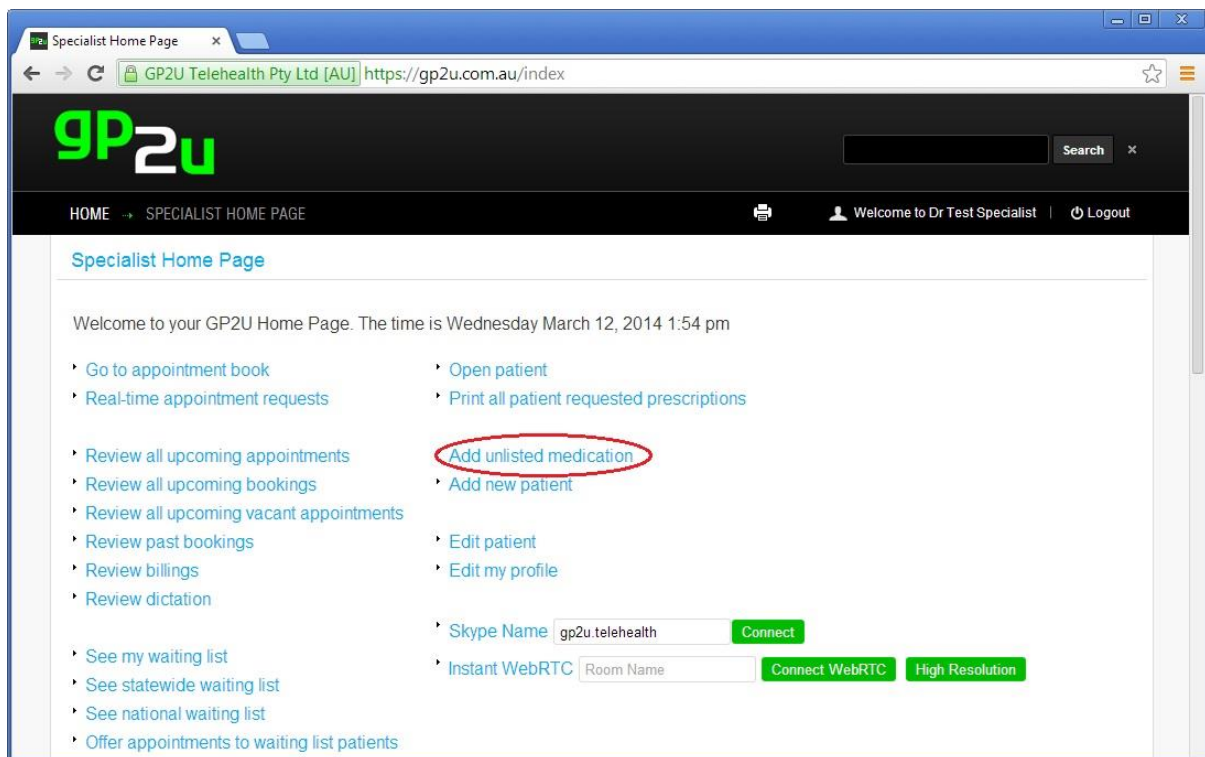

You will see the script get slightly larger.

If you don't do this, things will be slightly out of alignment, still legible but ugly.....

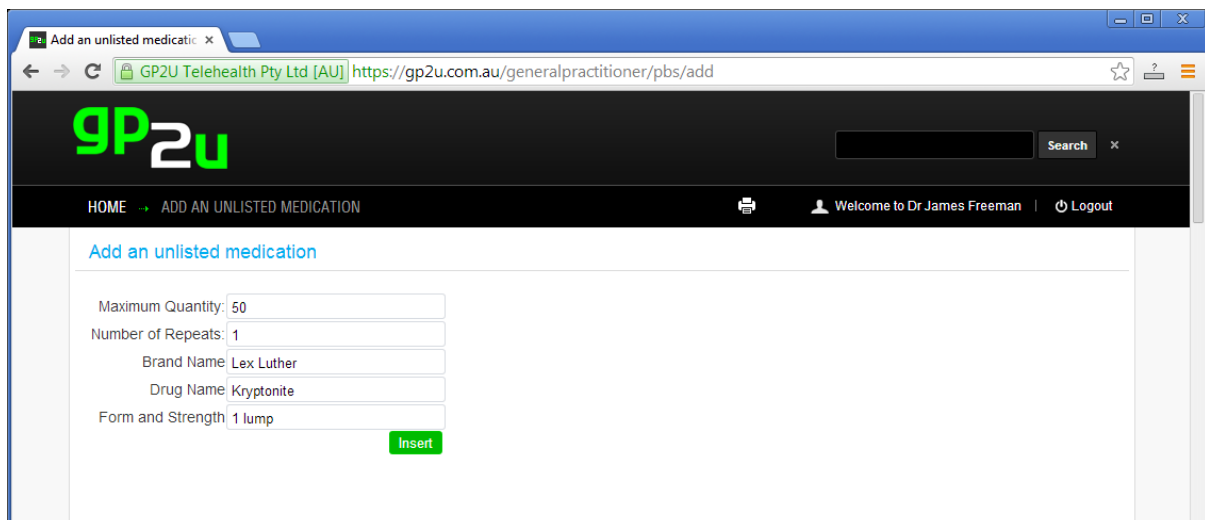

ADD UNLISTED MEDICATION

We have all the PBS medications in our database and many others. Be that as it may, you may wish to prescribe something that you can't find (because it's not there!)

Click on the "Add unlisted medication" link:

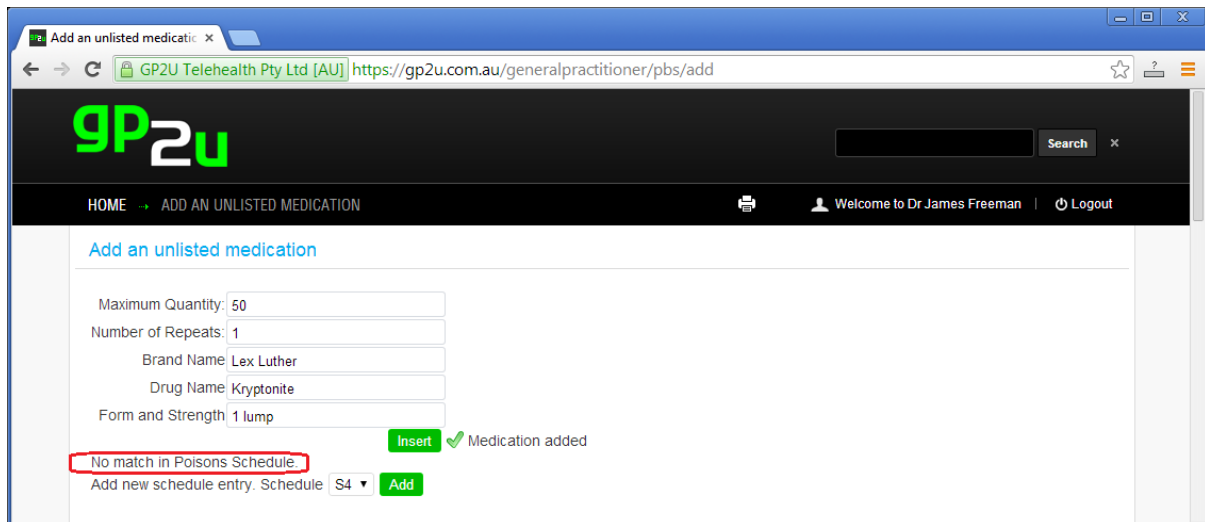

Simply fill in the details as shown:

Click on "Insert".

This will bring up a page like this:

GP2U Telehealth Pty Ltd [AU] https://gp2u.com.au/generalpractitioner/pbs/add

gp2u

HOME → ADD AN UNLISTED MEDICATION

Welcome to Dr James Freeman | Logout

Add an unlisted medication

Maximum Quantity: 50
Number of Repeats: 1
Brand Name: Lex Luther
Drug Name: Kryptonite
Form and Strength: 1 lump

Insert ✓ Medication added

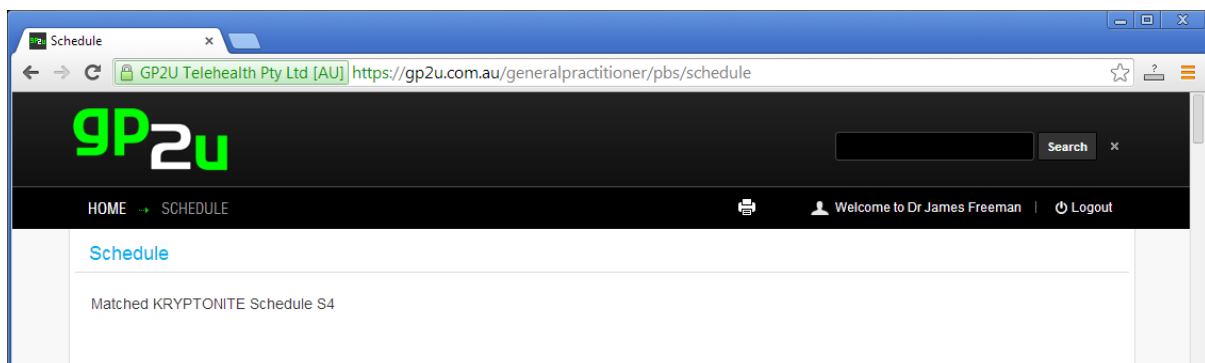

No match in Poisons Schedule

Add new schedule entry. Schedule: S4 Add

You will see we can't find a match for "Kryptonite" in the Poisons Schedule.

The default setting is S4 but select S2, S3, S4 or S8 as appropriate and click "Add".

This will insert Kryptonite into the poisons schedule as an S4 and bring up a page like this:

GP2U Telehealth Pty Ltd [AU] https://gp2u.com.au/generalpractitioner/pbs/schedule

gp2u

HOME → SCHEDULE

Welcome to Dr James Freeman | Logout

Schedule

Matched KRYPTONITE Schedule S4

Now you will find you can prescribe Kryptonite.....

HOW PATIENTS USE GP2U

Once the basic infrastructure is in place, it's quite straightforward for both GPs and patients to use this to book appointments.

Prior to booking an appointment, we need patients to register so we can gather in the demographic details like name, address and Medicare card number.

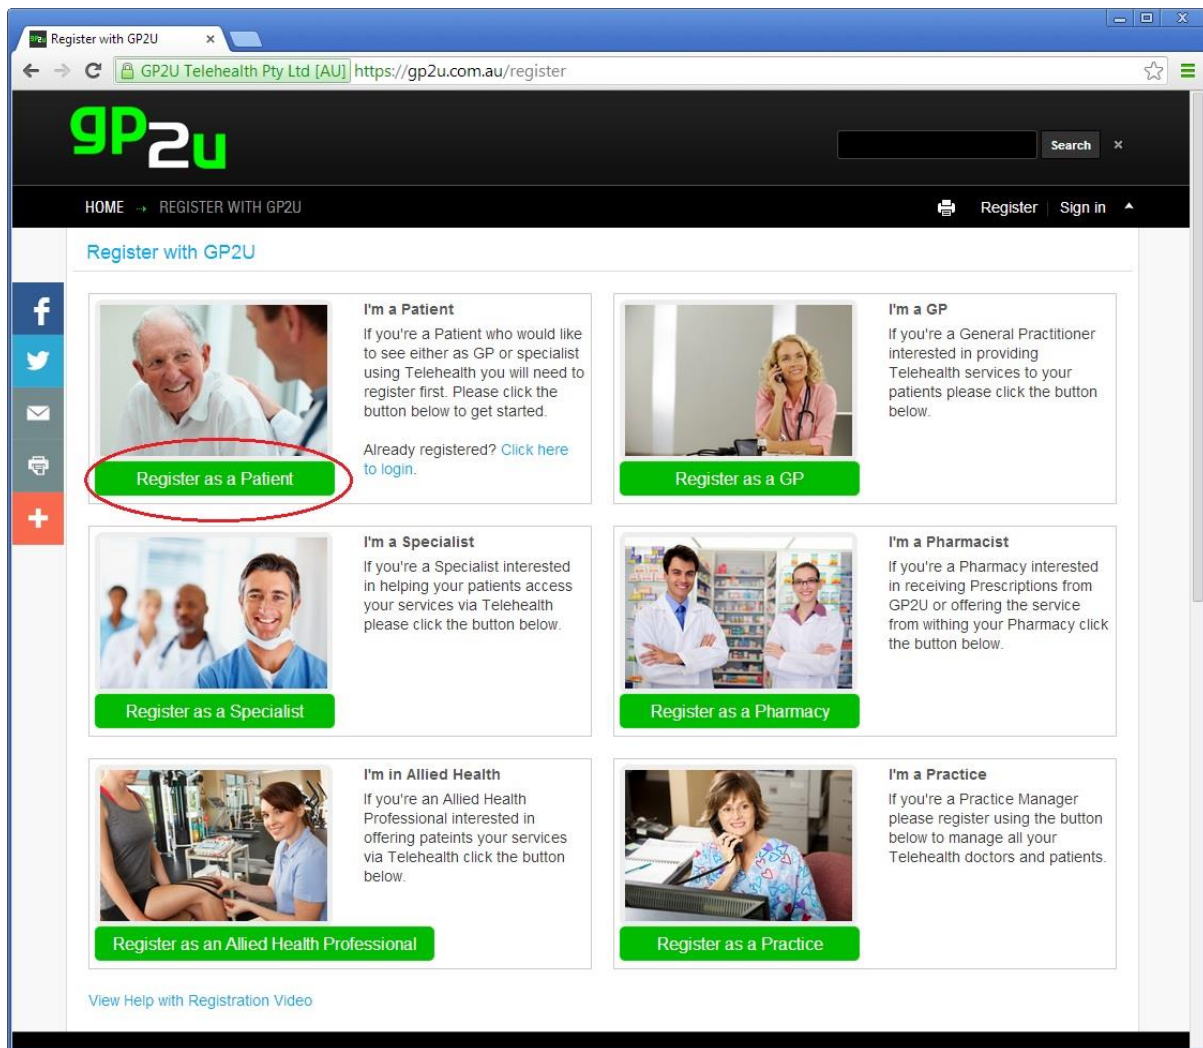

We need these details for Medicare billing, notes, prescriptions, etc. Unfortunately the current state of e-Health is that there is not a unified patient demographic record so we need to duplicate things here.

The registration process for patients is virtually identical to that for specialists.

It consists of 5 steps, takes about a minute, and is free.

Patients get to the registration from our home page:

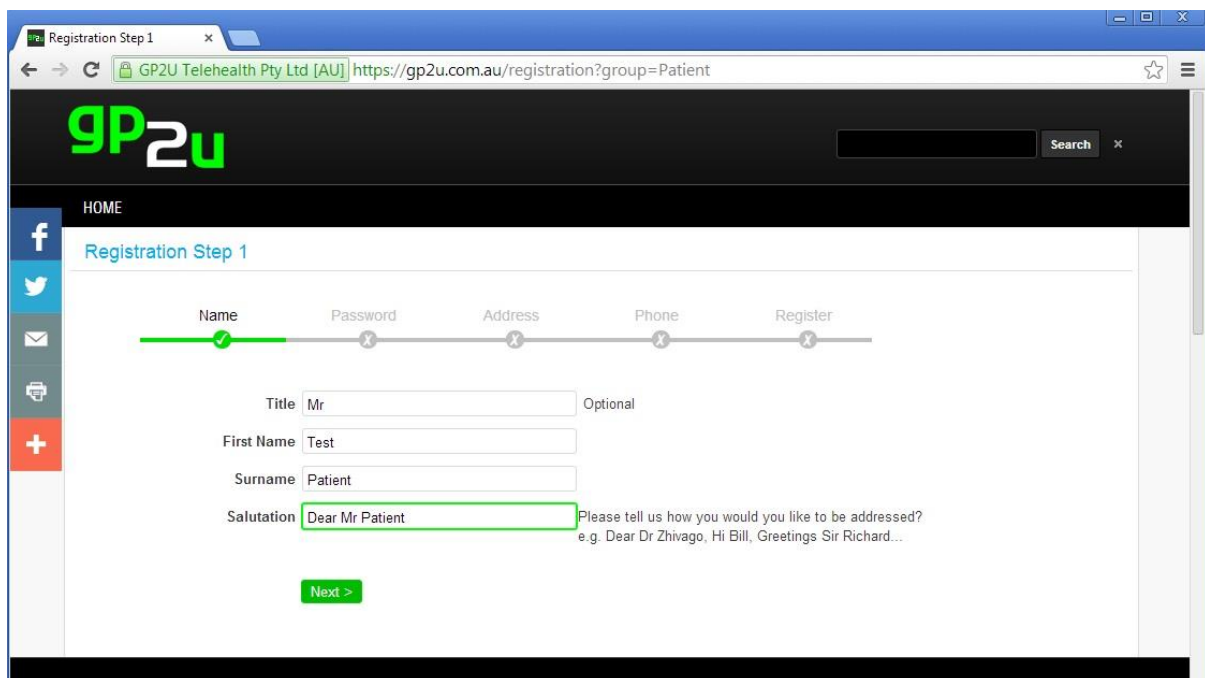

SEND INVITATION ENTRY POINT

Please note if you offer a patient an appointment via the “Send Invitation”, when they click the link, they enter the registration process, with all the details we have already entered.

5 REGISTRATION STEPS

Step 1 is the patient's name:

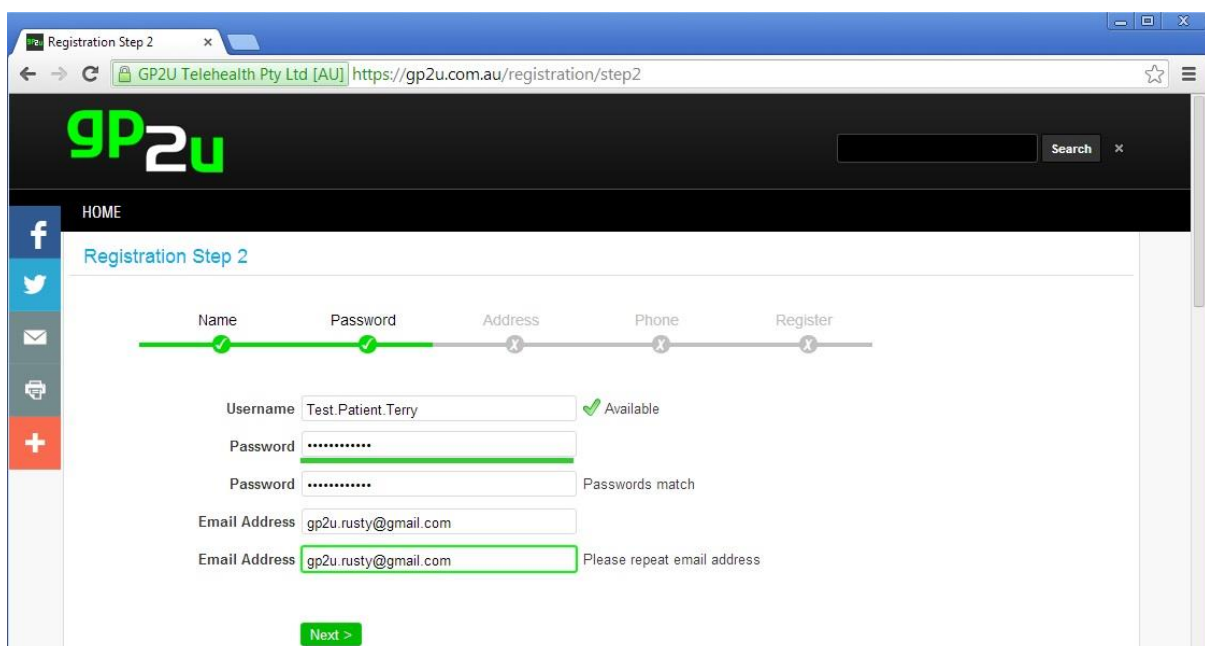

The screenshot shows the 'Registration Step 1' page on the GP2U website. The browser address bar shows 'https://gp2u.com.au/registration?group=Patient'. The page features the GP2U logo and a search bar. A progress bar at the top indicates the steps: Name (completed with a green checkmark), Password, Address, Phone, and Register (all with grey 'X' marks). The form fields include: Title (Mr), First Name (Test), Surname (Patient), and Salutation (Dear Mr Patient). A green 'Next >' button is at the bottom.

Step 2 gets patients to invent a username and password.

This lets them login to their account.

We don't have silly rules that passwords must contain one uppercase letter, one lower case letter, one number and one non alphanumeric character but do insist on a minimum level of complexity.

The screenshot shows the 'Registration Step 2' page on the GP2U website. The browser address bar shows 'https://gp2u.com.au/registration/step2'. The progress bar now shows 'Name' and 'Password' as completed steps with green checkmarks. The form fields include: Username (Test.Patient.Terry, marked as 'Available' with a green checkmark), Password (two fields, both masked with dots, with a 'Passwords match' confirmation), Email Address (gp2u.rusty@gmail.com), and a second Email Address field (gp2u.rusty@gmail.com) with a prompt 'Please repeat email address'. A green 'Next >' button is at the bottom.

Step 3 is the patient address details:

The screenshot shows the 'Registration Step 3' page on the GP2U website. The page has a dark header with the GP2U logo and a search bar. A progress bar at the top indicates that 'Name', 'Password', and 'Address' are completed (marked with green checkmarks), while 'Phone' and 'Register' are not (marked with red X's). The 'Address' section contains the following fields: 'Address (1)' with the value '36 Montpelier Retreat', 'Address (2)' (Optional), 'City/Town' with the value 'Hobart' (Optional), 'Postcode' with the value '7000', 'State' with a dropdown menu showing 'Tasmania' (with a note 'Australia Only'), 'Country' with a dropdown menu showing 'Australia', and 'Time Zone' with a dropdown menu showing 'Hobart [GMT+10.0]'. A green 'Next >' button is at the bottom.

Step 4 is the patient contact details.

Please leave the Skype name blank as per the prompt.

The screenshot shows the 'Registration Step 4' page on the GP2U website. The progress bar at the top indicates that 'Name', 'Password', 'Address', and 'Phone' are completed (marked with green checkmarks), while 'Register' is not (marked with a red X). The 'Phone' section contains the following fields: 'Phone (Work)' with the value '1300472866' (with a note 'At least one work, home or mobile phone is required.'), 'Phone (Home)', and 'Phone (Mobile)'. The 'Skype Name' field is highlighted with a green border and contains the text 'Please leave blank if in pharmacy' (Optional). A red arrow points to the 'Skype Name' field. A green 'Next >' button is at the bottom.

Step 5 is the Medicare details.

Ticking the terms and conditions box is mandatory.

Ticking the “Automatically confirm registration” checkbox means the patient will not have to log into their email to click on the usual “Click here to confirm we have your correct email address” link.

The screenshot shows the 'Registration Step 5' form on the GP2U website. The browser address bar shows 'https://gp2u.com.au/registration/step5'. The page has a dark header with the GP2U logo and a search bar. A progress bar at the top indicates that 'Name', 'Password', 'Address', 'Phone', and 'Register' steps are completed, with green checkmarks. The form fields include: 'Date of Birth' (12/12/1973), 'Gender' (Male), 'Medicare Card Number' (with a visual of a Medicare card), 'Individual's Ref Number', and 'DVA Number'. Below these fields are three checkboxes: 'I do not have a Medicare or DVA card' (unchecked), 'I have read and agree to the Terms of Service and Privacy Policy.' (checked), and 'Automatically confirm my registration. My email is gp2u.rusty@gmail.com' (checked). A green 'Register Me!' button is at the bottom.

And here is the confirmation page:

The screenshot shows the 'Thank You for Registering' page on the GP2U website. The browser address bar shows 'https://gp2u.com.au/registration/register'. The page has a dark header with the GP2U logo and a search bar. The main content area is titled 'Thank You for Registering' and contains the following text: 'Dear Mr Patient,', 'Thank you for taking the time to register.', 'We have sent a confirmation email to gp2u.rusty@gmail.com.', 'Your account has been automatically confirmed so you can now login.', 'Your username is Test.Patient.Terry', 'Click [here](#) to go to the login page.', 'If you do not see anything from GP2U in your inbox within the next 5 minutes please check your junk/spam folder(s).', 'Click [here](#) to return to our home page.', 'Kind Regards', and 'The GP2U Team'. The footer contains links for 'QUICK CONTACTS', 'PATIENTS', 'LEARN', 'VIDEO TOURS', 'POPULAR PAGES', '7 SECRETS OF WEIGHT LOSS SUCCESS', and 'CONNECT WITH US'.

Now that the patient is registered they can login.

Patients can only see and book specialist appointments if they have a valid referral in the system.

What this means is that their first booking must be made either by you, your practice or a referring GP.

Once there is a referral in the system they can book one of your open appointments themselves.

Patients login from the GP2U home page:

THE PATIENT HOME PAGE

The patient's home page looks like this:

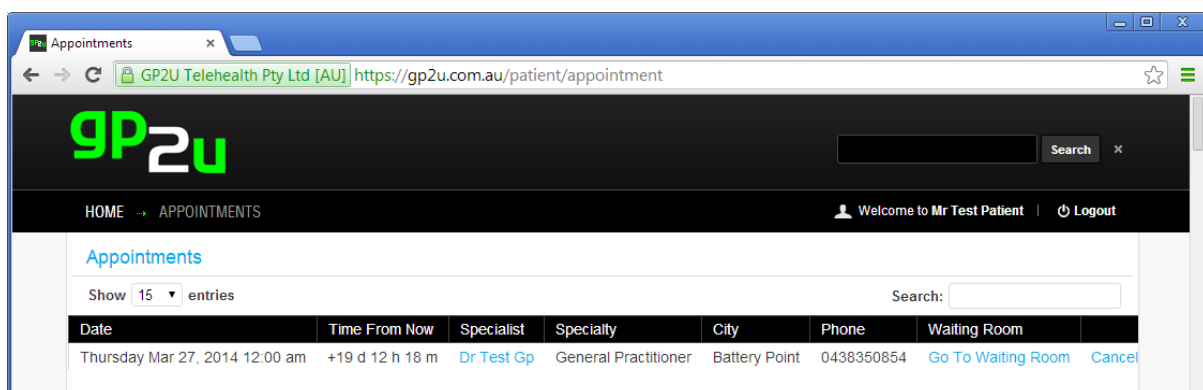

BOOKING APPOINTMENTS

In the first section of links you can see that patients have the ability to book Specialist, GP and Allied Health appointments.

CHECKING APPOINTMENTS

In this section, patients have the ability to check upcoming and past appointments as well as waiting list entries

Here is what the patient sees if they click on the “Check my upcoming appointments” link:

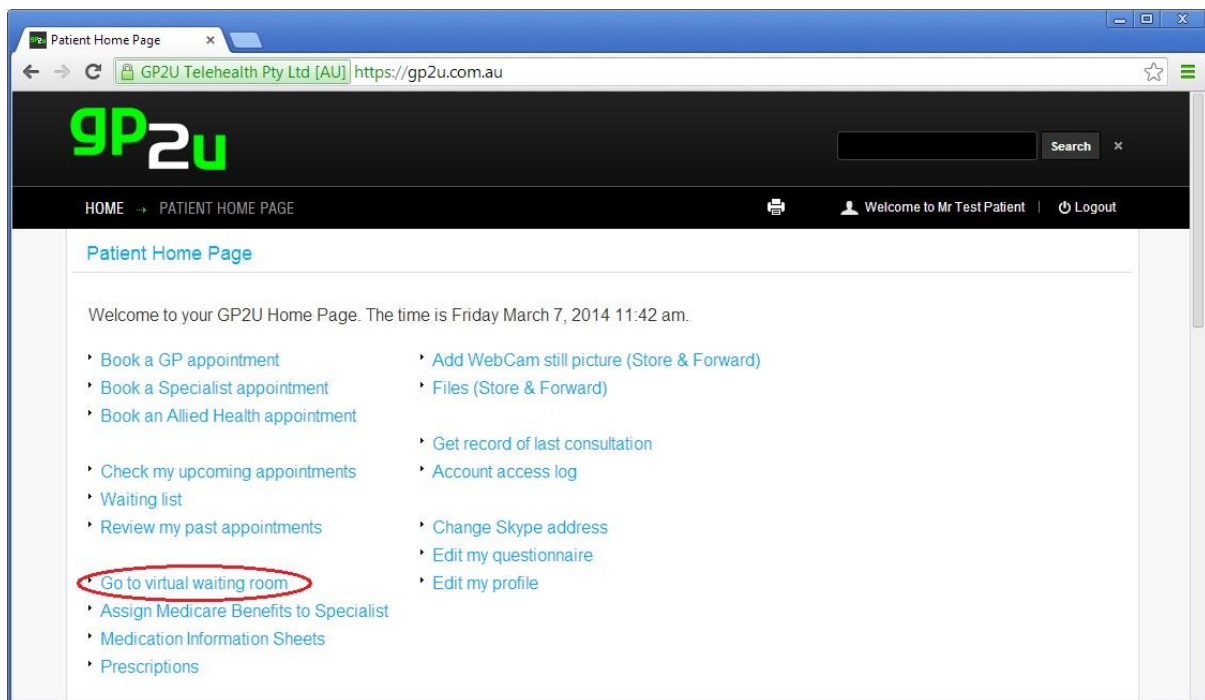

You may notice the link to the Virtual Waiting Room and a button that allows patients to cancel appointments (you will be sent an email if that happens and the patient will be removed from that appointment).

VIRTUAL WAITING ROOM

Patients can get to the Virtual Waiting Room from either:

“Check my upcoming appointments” section or from their home page.

The appearance of the Virtual Waiting Room differs, depending on whether or not the patient has elected to use Skype or WebRTC.

WebRTC view:

The screenshot shows a web browser window with the address bar displaying "GP2U Telehealth Pty Ltd [AU]" and the URL "https://gp2u.com.au/patient/appointment/waiting_room". The page features the GP2U logo in green and white. A navigation bar includes "HOME" and "WELCOME TO THE VIRTUAL WAITING ROOM", along with a search bar, a printer icon, and a user greeting "Welcome to Mr Test Patient" with a "Logout" link. The main content area is titled "Welcome To The Virtual Waiting Room" and contains the following text: "You are booked for a 15 minute appointment with Nuclear Medicine Dr Test Specialist at 02:00 pm on March 21, 2014" and "Your appointment is due in 3:51:22 and ⚠ your doctor is running early by 5:03:14 Click here to [Refresh Doctor's Ontime Status](#)." Below this text is a large video player. In the top-left corner of the video player is a small video feed of a man with a beard, with a "Disconnect" button above it. The rest of the video player is black with four colored dots (green, yellow, red, blue) arranged in a diamond shape. Below the video player are links for "Popout WebRTC Low Res | Big Picture" and "Backup WebRTC Low Res | Big Picture". A paragraph of text follows: "If you have not previously completed it you may wish to fill in the [patient questionnaire](#). The answers to these questions provide valuable background and will help your doctor to provide the best possible treatment for you. Information you enter is accessible only to you and your treating doctor(s) and securely stored using RSA encryption." Below this text are "Pause | Resume" links. At the bottom of the page is a footer for "The West Australian" with a logo and a navigation menu including "Sign In or Sign Up", "About Us", "Newsletters", "Home Delivery", "What's New", "Place an Ad", "Events", "Competitions", and "Privacy Policy". There is also a search bar and a "Search Web" button.

If the patient has a Skype address registered the Virtual Waiting Room will look like this:

The screenshot shows a web browser window with the address bar displaying "GP2U Telehealth Pty Ltd [AU] https://gp2u.com.au/patient/appointment/waiting_room". The page has a dark header with the GP2U logo and a search bar. Below the header, a navigation bar includes "HOME", "WELCOME TO THE VIRTUAL WAITING ROOM", a printer icon, and a user profile section for "Welcome to Mr Test Patient" with a "Logout" button.

The main content area is titled "Welcome To The Virtual Waiting Room". It contains the following text:

You are booked for a 15 minute appointment with General Practitioner Dr Test Gp at 12:00 am on March 27, 2014

Your appointment is due in **19 days 11:56:29** and ☒ your doctor is running on time. Click here to [Refresh Doctor's Ontime Status](#).

[Popout WebRTC Low Res](#) | [Big Picture](#)

[Backup WebRTC Low Res](#) | [Big Picture](#)

You are expected to be logged in to Skype using the Skype name **lorraine.gp2u**. Your doctor will connect to you as soon as they are free. We value your time and while we always try to run on time sometimes circumstances beyond our control prevent that from happening. We appreciate your patience should this occur.

❌ You do not currently appear online in Skype. Please open Skype and check your status. You do this by selecting **Skype | Online Status** from the menus as shown in [this screenshot](#). Please click Offline, followed by Online. At the same time ensure your Skype name (lorraine.gp2u) appears in the title bar where you see gp2u.telehealth in the screenshot.

Once you have done that click [Refresh Skype Status](#).

If you still do not show up as being online please logout of your Skype account, log back in and click the refresh link above.

If you are still not showing up as online you may need to change a Privacy setting in Skype. To do this open Skype and from the menu select **Tools | Options | Privacy Settings** to bring up the [Skype Privacy Settings Page](#). Tick the box as shown in the picture and click **Save**. If you still do not show up as online you are probably logged in to Skype as the wrong user. Please double check you are logged in to Skype as lorraine.gp2u.

If you have not previously completed it you may wish to fill in the [patient questionnaire](#). The answers to these questions provide valuable background and will help your doctor to provide the best possible treatment for you. Information you enter is accessible only to you and your treating doctor(s) and securely stored using RSA encryption.

[Pause](#) | [Resume](#)

Below the text is a carousel of images. The first image is titled "The Australian" and shows a newspaper front page with a "DIGITAL PASS \$1 for the first 28 days" offer. Other images in the carousel include a Discovery Channel video player, a "TOP50/SPORT/2013" list, and a "Glimmer of hope for Labor MPs" article.

You may notice that we tell them that they are expected to be logged into Skype as a specific user and also let them know if we can see them online.

There is a link provided to the WebRTC video conferencing utility for use in case Skype is not behaving.

Please note that there is the one-off requirement for the patient to click the “Allow” button to allow the use of their camera and microphone as documented earlier.

You (the doctor) will appear on the screen where the “Waiting to connect...” text is.

ASSIGN MEDICARE BENEFITS TO SPECIALIST

Under the Health Insurance Act, Medicare pays the patient, rather than you.

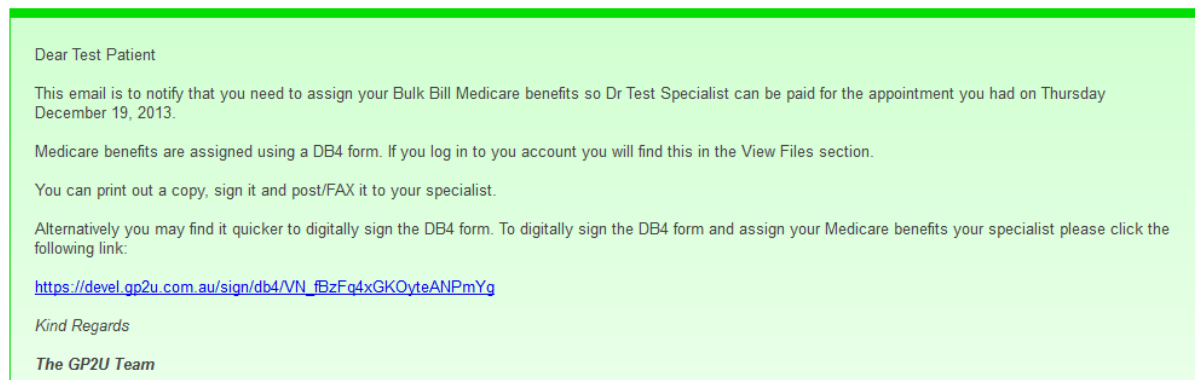

For bulk billing to occur, the patient assigns their benefit to you.

This is achieved via what is known as a DB4 form.

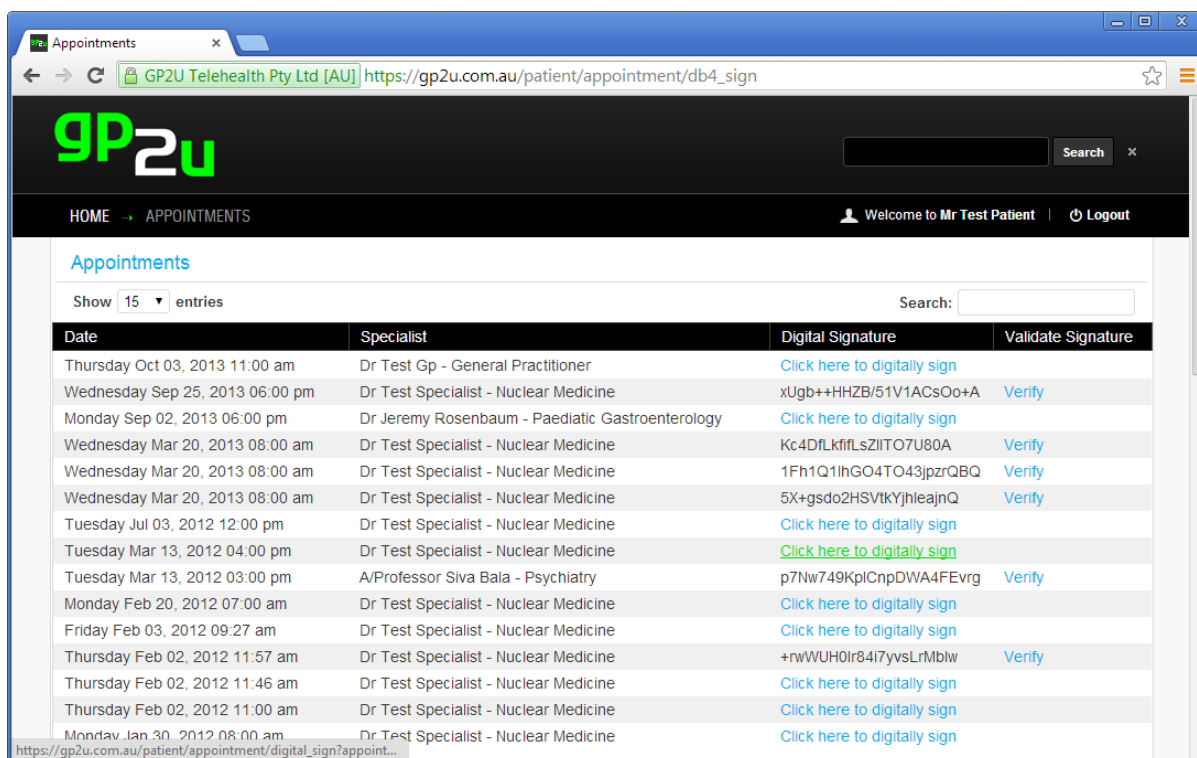

We have a digital version of this with the ability for patients to apply their digital signature.

This process is Medicare approved and far easier than the convoluted email process.

At the end of their appointment, all the patient needs to do is respond click on the link in the email we send:

or click the “Assign Medicare Benefits to Specialist” link to bring up this page:

Either way the patient will end up at this page.....

Clicking on the “Click here to digitally sign” link brings up this page:

DB4

[Digitally Sign as Mr Test Patient](#)

MEDICARE ONLINE CLAIMING BULK BILL ASSIGNMENT ADVICE

(This form is the approved form as prescribed under section 20A of the *Health Insurance Act 1973*)

Bulk Bill Claim for assessment by Medicare Australia
Please retain for your records

Location ID: GPT00001 **Reference:** GPT0000127112013052520

Servicing Location: GP2U Telehealth Pty Ltd
GPO Box 9951
Hobart TAS 7001

Patient Details:

Medicare No: 6950105131
Ref No: 9
First Name, Initial, Surname: Mr Test Patient
Date of Birth: 11-11-1978
Telephone No (BH): 0362240840
Residential Address: 36 Montpelier Retreat Battery Point Tasmania 7004

This Bulk Bill Claim has been: Submitted

And clicking on the “Digitally Sign as ...” link completes the process:

DB4

[Digitally Sign as Mr Test Patient](#)

The page at https://gp2u.com.au says:

You are about to digitally sign this DB4 form. Continue?

B

(This form is the approved form as prescribed under section 20A of the *Health Insurance Act 1973*)

Bulk Bill Claim for assessment by Medicare Australia
Please retain for your records

Location ID: GPT00001 **Reference:** GPT0000127112013052520

Servicing Location: GP2U Telehealth Pty Ltd
GPO Box 9951
Hobart TAS 7001

Patient Details:

Medicare No: 6950105131
Ref No: 9
First Name, Initial, Surname: Mr Test Patient
Date of Birth: 11-11-1978
Telephone No (BH): 0362240840
Residential Address: 36 Montpelier Retreat Battery Point Tasmania 7004

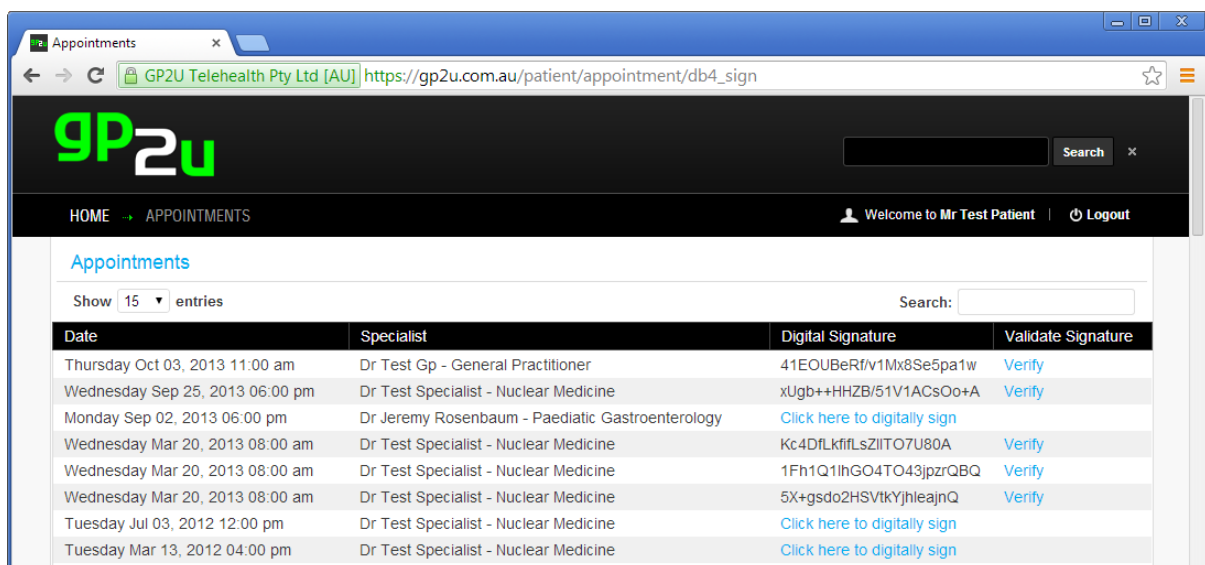

This Bulk Bill Claim has been: Submitted

https://gp2u.com.au/patient/appointment/sign?appointment=28194

If this prompt comes up, please tell your patients to hit “Ok”.

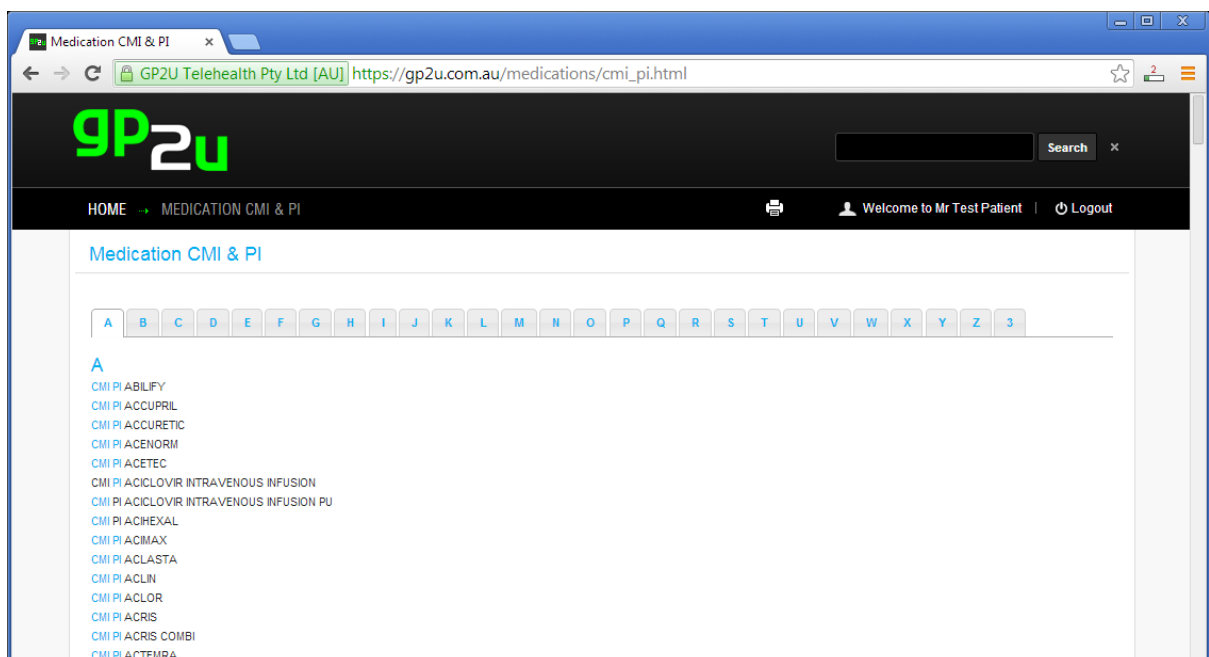

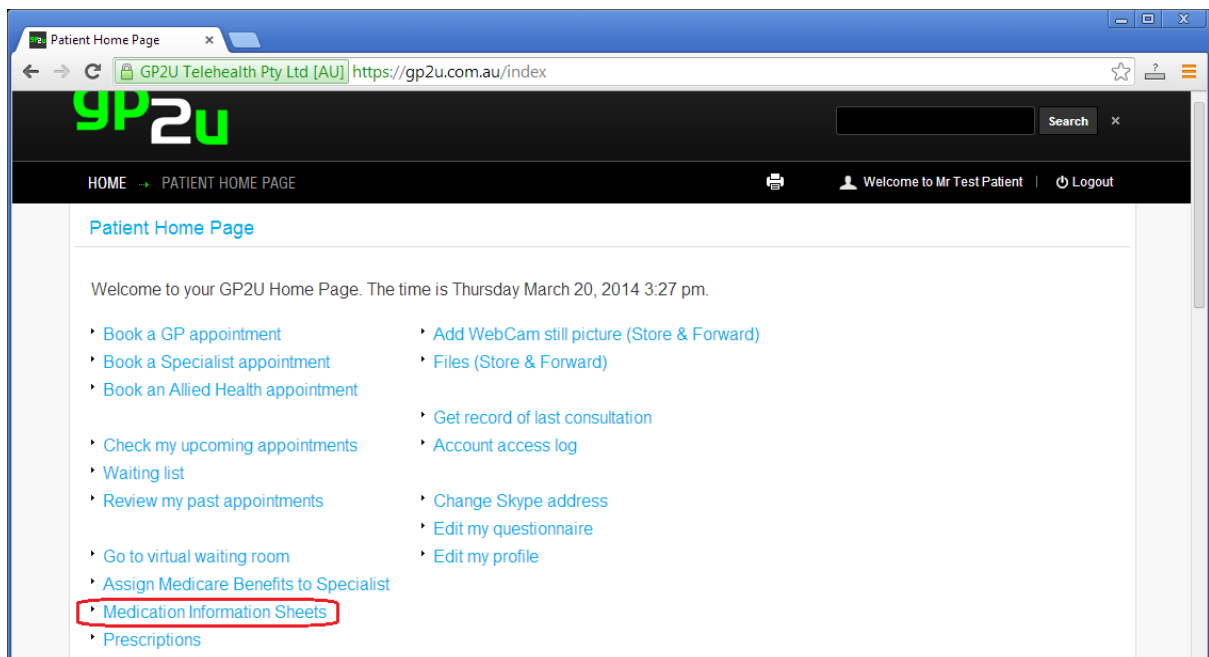

Now if we look at the DB4 page, we will see the digital signature (yes it looks like garbage!)

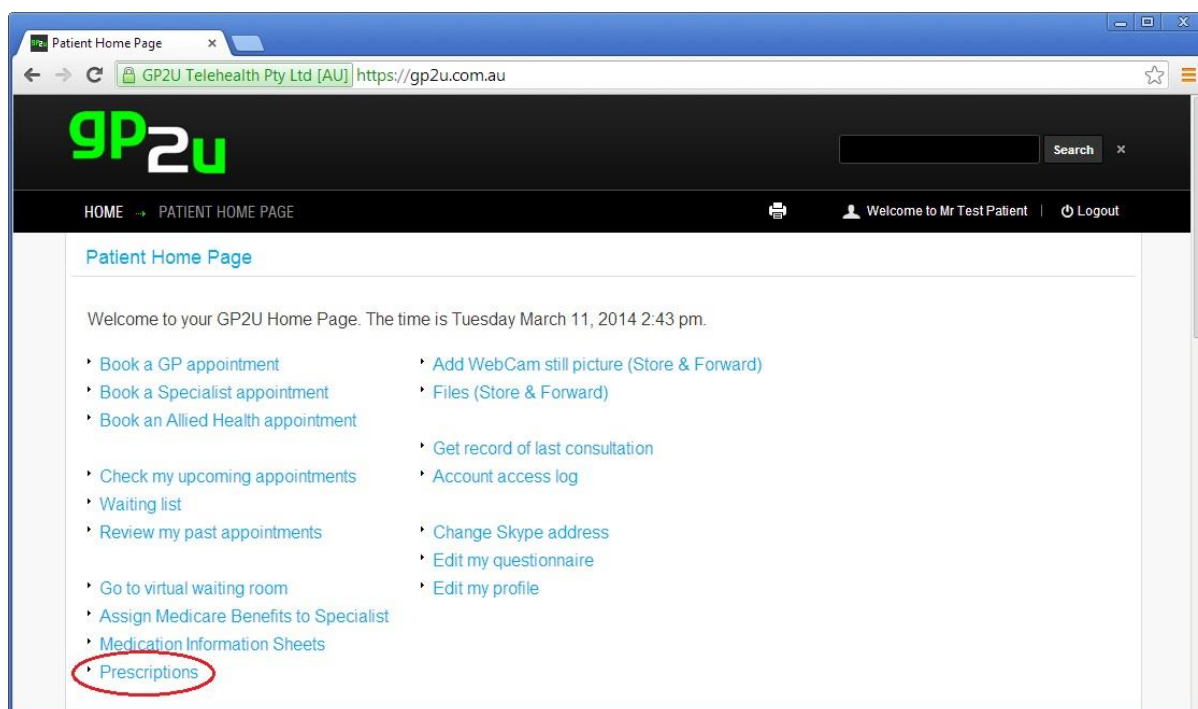

MEDICATION INFORMATION SHEETS

Here patients have access to the consumer medication information for several thousand common medications.

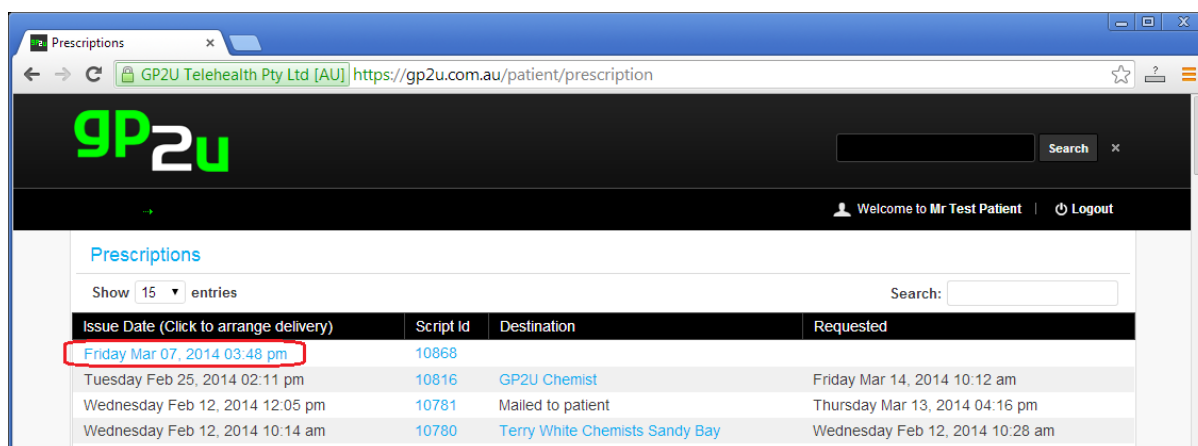

PATIENT PRESCRIPTIONS

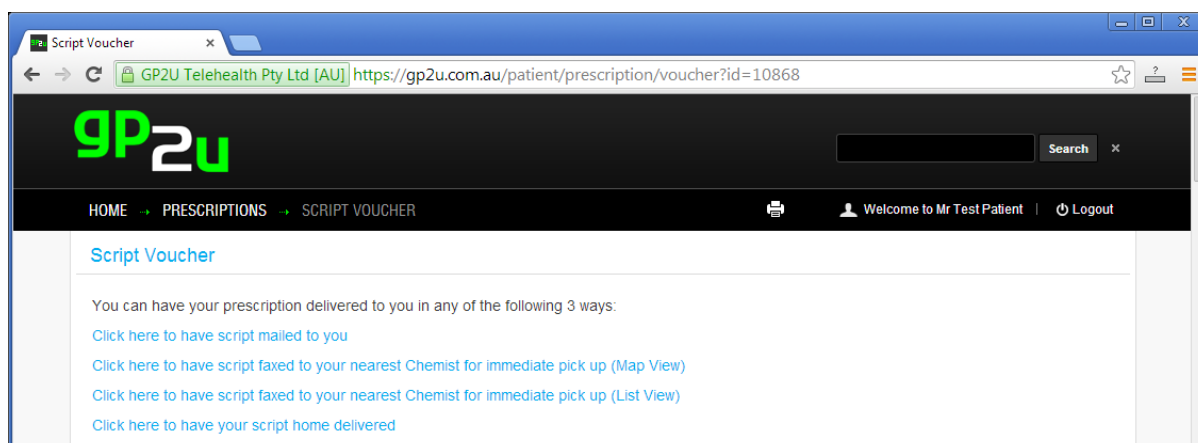

Patients can access their prescriptions from their home page:

Clicking on the link under “Issue Date”

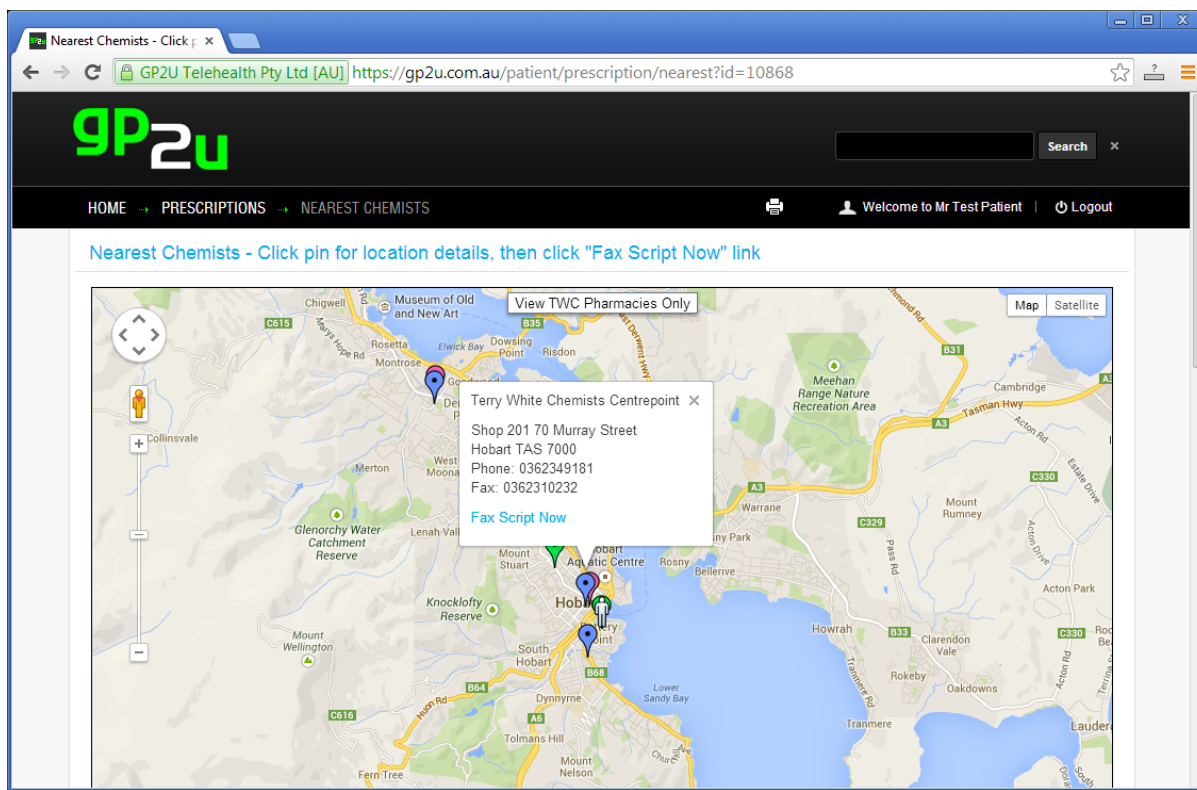

Provides the patient with a series of options about how they wish their script to be filled:

Patients have several delivery options – post, FAX and online

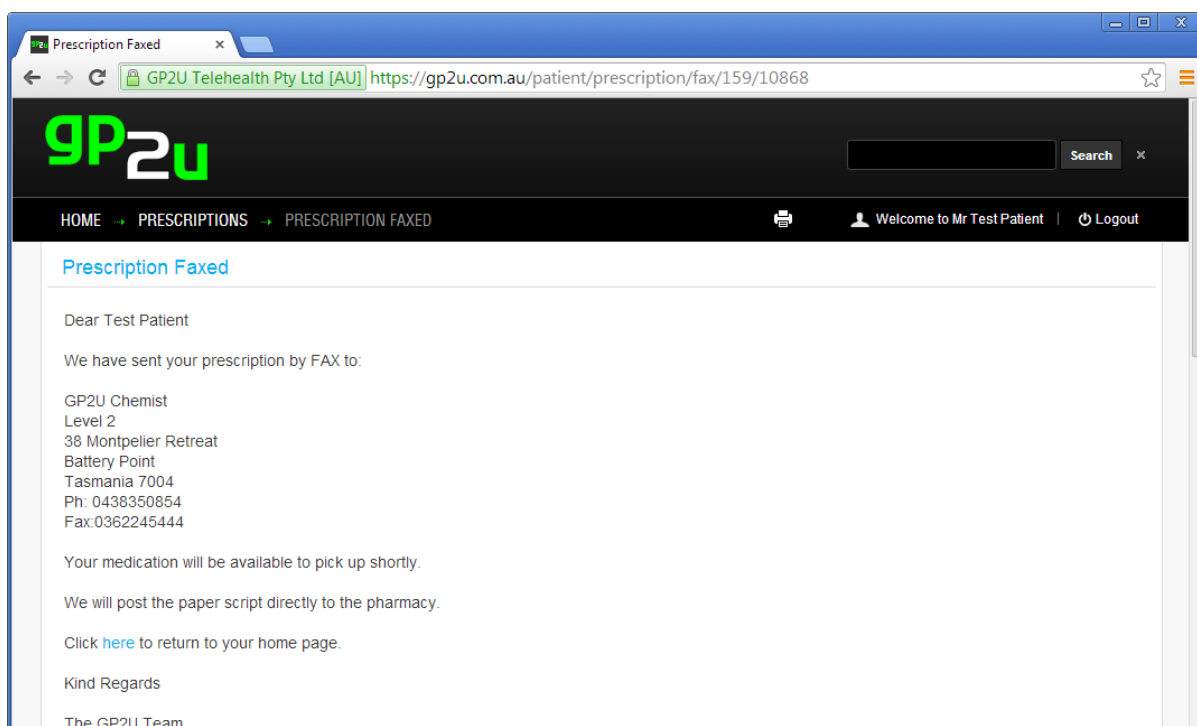

If the patient clicks on “Map View” then they are presented a map view of where to pick up their scripts:

When a patient clicks the map view, the next thing they see is a Google Map.

In the centre of the screen is a “You are here” person icon located at the patient’s address.

Patients can zoom in or out and scroll to different areas if needed. Clicking on a pin reveals the pharmacy details and a “Fax Script Now” link. Clicking that link faxes the script through to that pharmacy immediately.

ADD FILES

Just as you can, patients and GPs can upload files to our secure server – this provides a secure store and forward system.

ADD WEBCAM STILL PICTURE

This allows an ordinary web cam to be used as a camera and upload the images to the server

VIEW FILES

And of course there would not be much point if you could not see the files.....

GET RECORD OF LAST CONSULTATION

Patients can access a copy of their last consultation record.

This is actually a legal right, which is why we provide the capacity but, it does mean you should not put information into the patient notes that you would not be happy with them reading.

ACCOUNT ACCESS LOG

Patients can see who has accessed their record.

This provides privacy oversight and is the only practical way to both make the medical records available to those medical providers that need to see them, while at the same time protecting patient privacy.

Please be aware that if you open patient records of patients not related to your practice, they may well ask why.

CHANGE SKYPE ADDRESS

This is just a quick link to the “Edit my profile” section.

EDIT MY QUESTIONNAIRE

Patients are encouraged to fill in a questionnaire which covers all the usual standard questions

EDIT MY PROFILE

This is similar to what you see.

SKYPE NAME

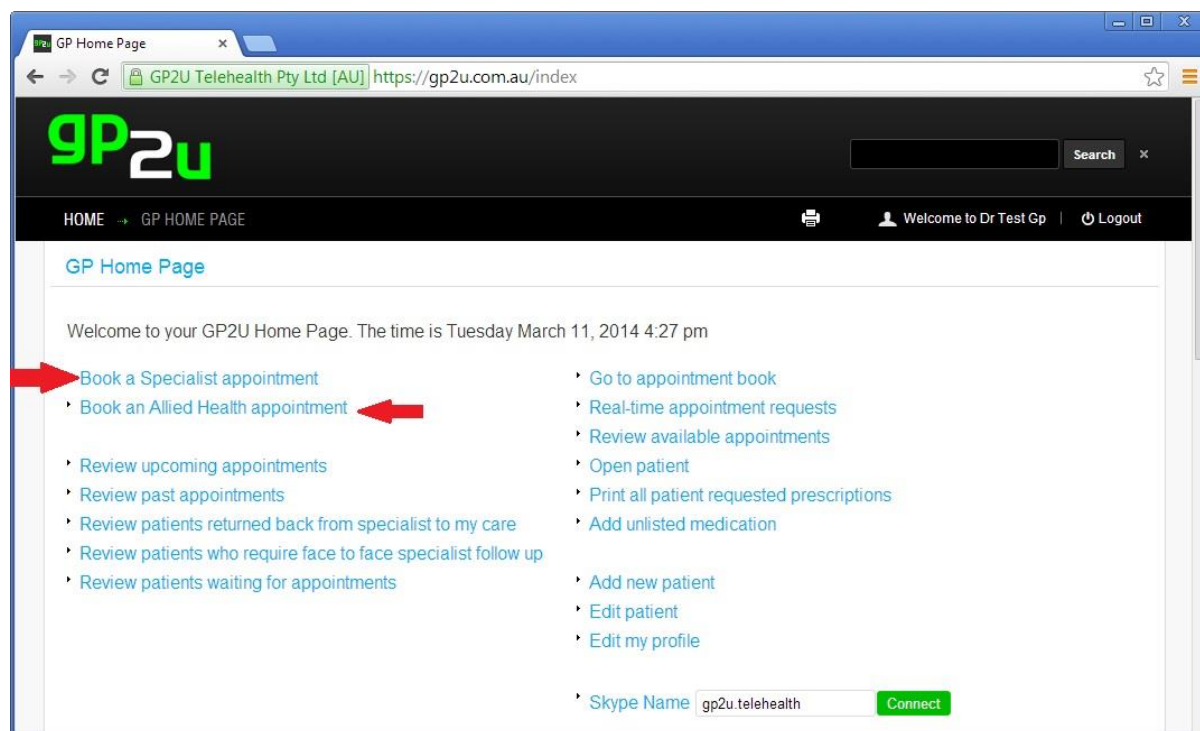

Once again, the same as you have.

How GPs USE GP2U

For GPs using GP2U to book Specialist appointments is free.

They have a similar registration process to you. However, we only require provider number and account activation is automatic and instant.

Having registered GPs see a home page like this:

Most of the functions they have are similar (or the same to the ones you have) so we won't repeat that here.

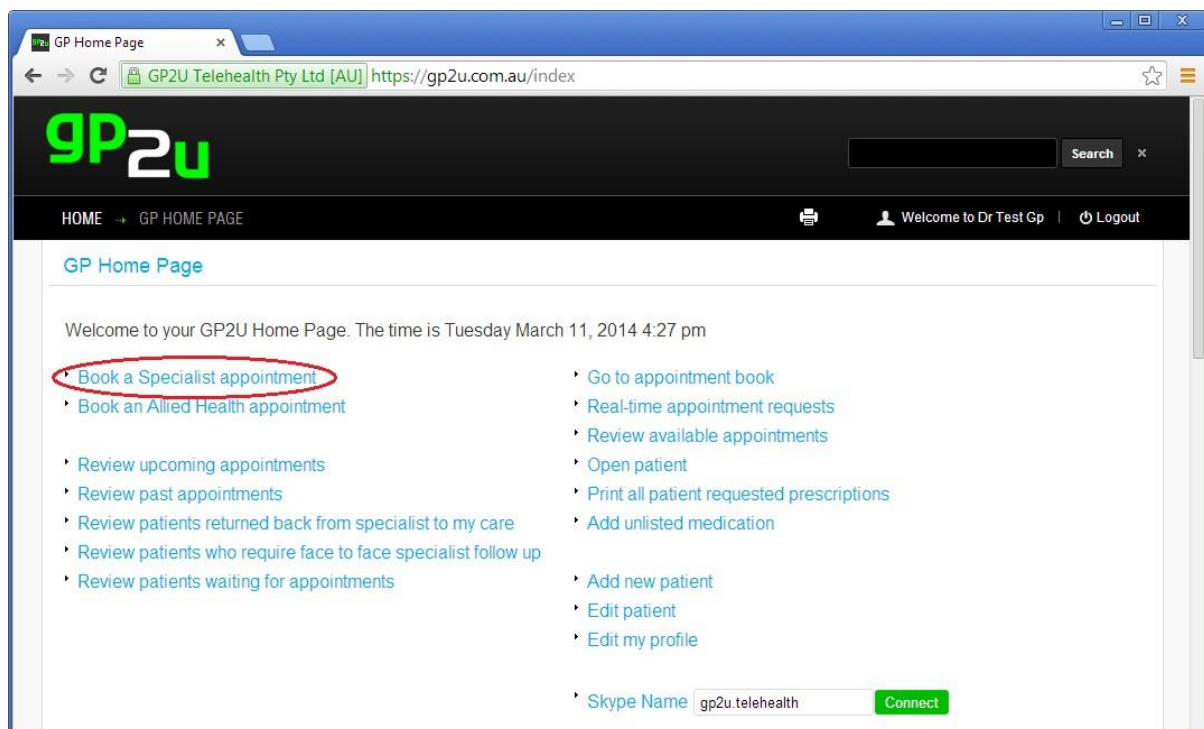

You will note two links at the top left:

“Book a Specialist appointment” and

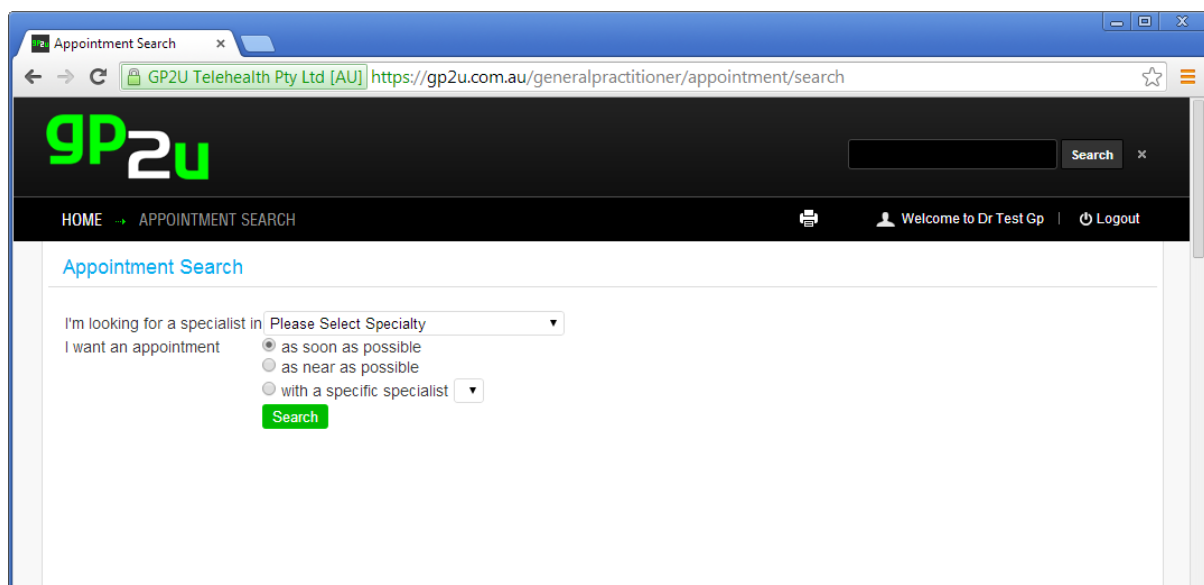

“Book an Allied Health appointment”.

Let's have a look at how a GP can book a Specialist appointment.

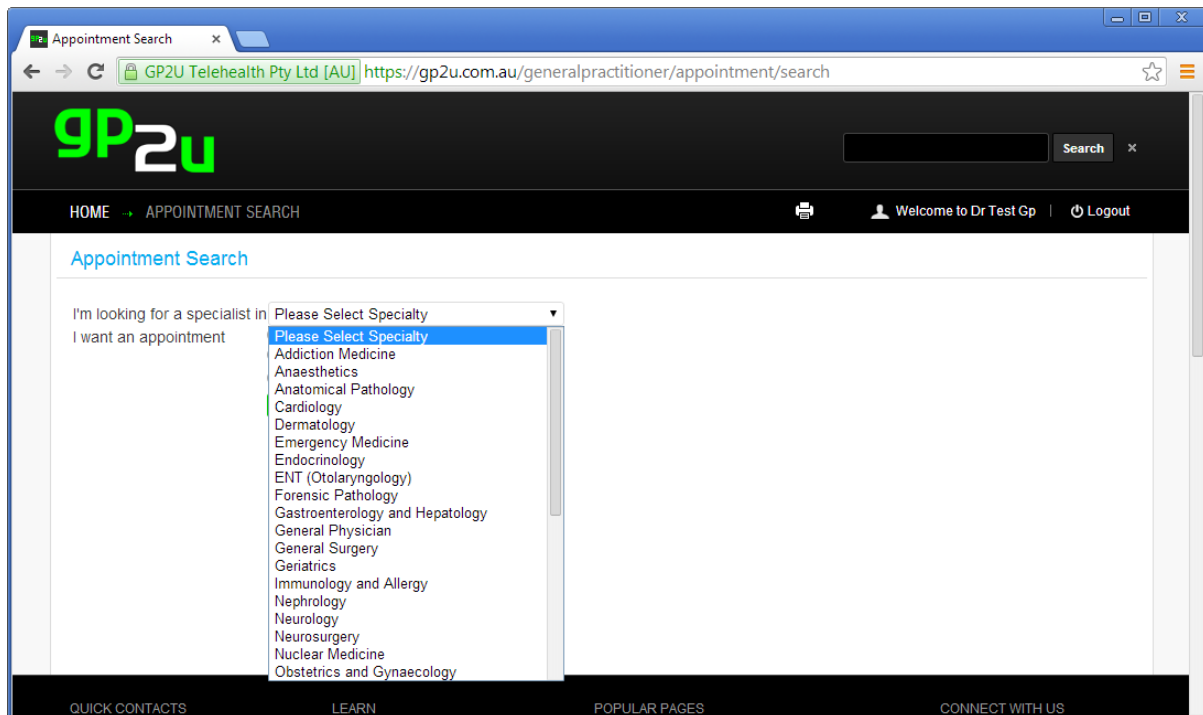

BOOKING SPECIALIST APPOINTMENTS

Having clicked the link, the GP sees this page:

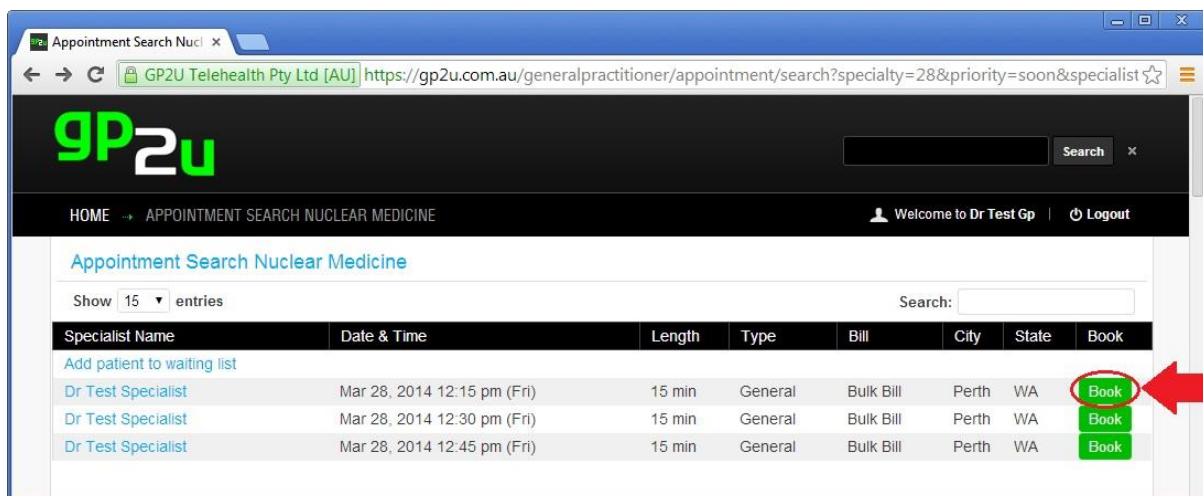

To book an appointment, they select a specialty from the drop down list and then their preferred option.

They can for example only search for available appointments with you.

To select an appointment a GP simply clicks "Book"

Which brings up this page.

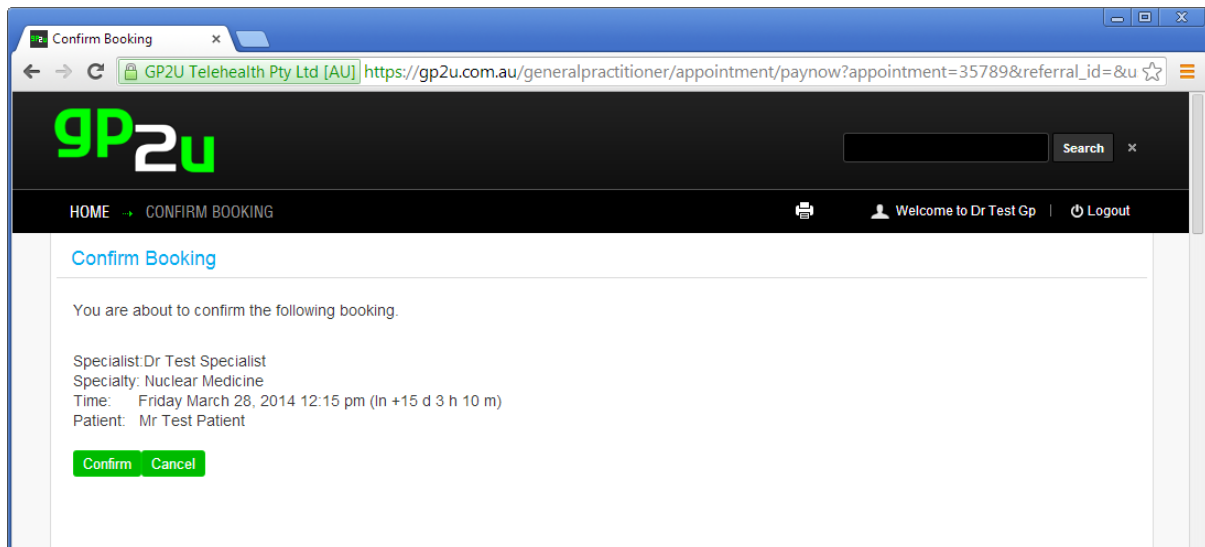

The screenshot shows a web browser window with the address bar displaying "https://gp2u.com.au/generalpractitioner/appointment/book?appointment=35789". The page header features the GP2U logo and a search bar. The main content area is titled "Book Patient" and displays an appointment for Friday, March 28, 2014, at 12:15 pm. It includes a "Patient not Registered? Send Invitation" link and a "Patient Search" section with input fields for Username, Firstname, Surname, and Medicare Number, each with a "Search" button. A "Referral" section has a "Referral valid to" date field set to 13/3/2015 and two radio buttons: "Make a new referral" and "Use my last referral". A green "Book Patient" button is at the bottom.

You will see the familiar options about "Sending Invitation" or searching for the patient.

Having found a patient the GP then gets to enter the referral:

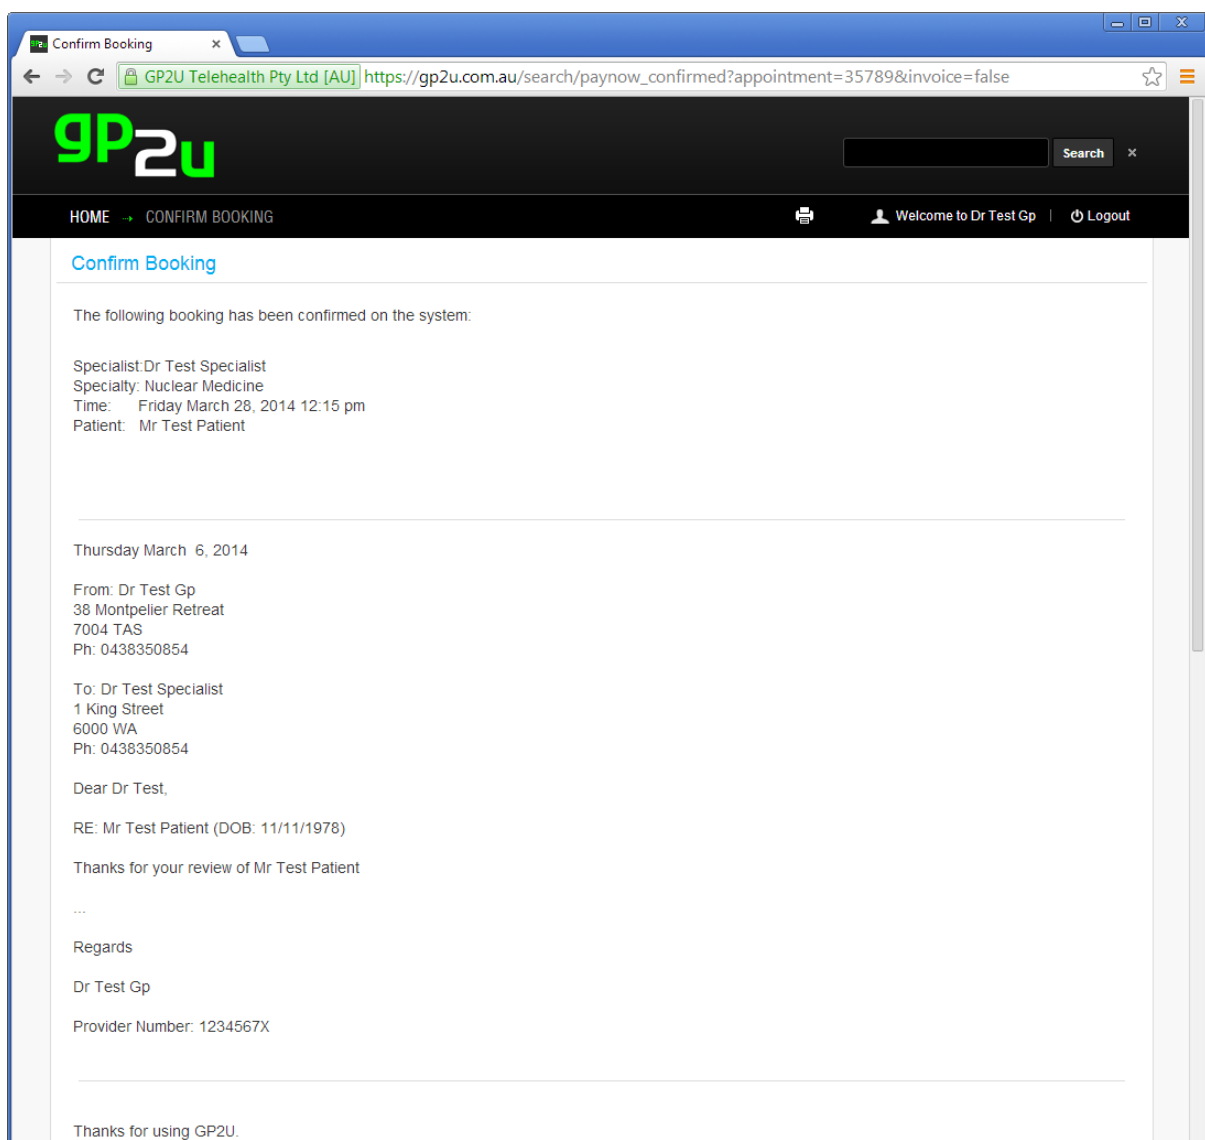

This screenshot shows the same "Book Patient" page but with the referral entry process initiated. The "Patient Search" section now shows a green checkmark and the text "Mr Test Patient [Add files]". The input fields are filled with "testpatient", "Test", "Patient", and "6950105131 9". The "Referral" section shows the "Use my last referral" radio button selected, with a green checkmark and the text "Found valid referral". The "Book Patient" button remains green. On the right side, a text area displays the referral details, including the date "Thursday March 6, 2014", the sender "Dr Test Gp", the recipient "Dr Test Specialist", and the patient's details "Mr Test Patient (DOB: 11/11/1978)".

And then clicks the “Book Patient” button

And then clicks on the “Confirm” link....

Which brings up this page:

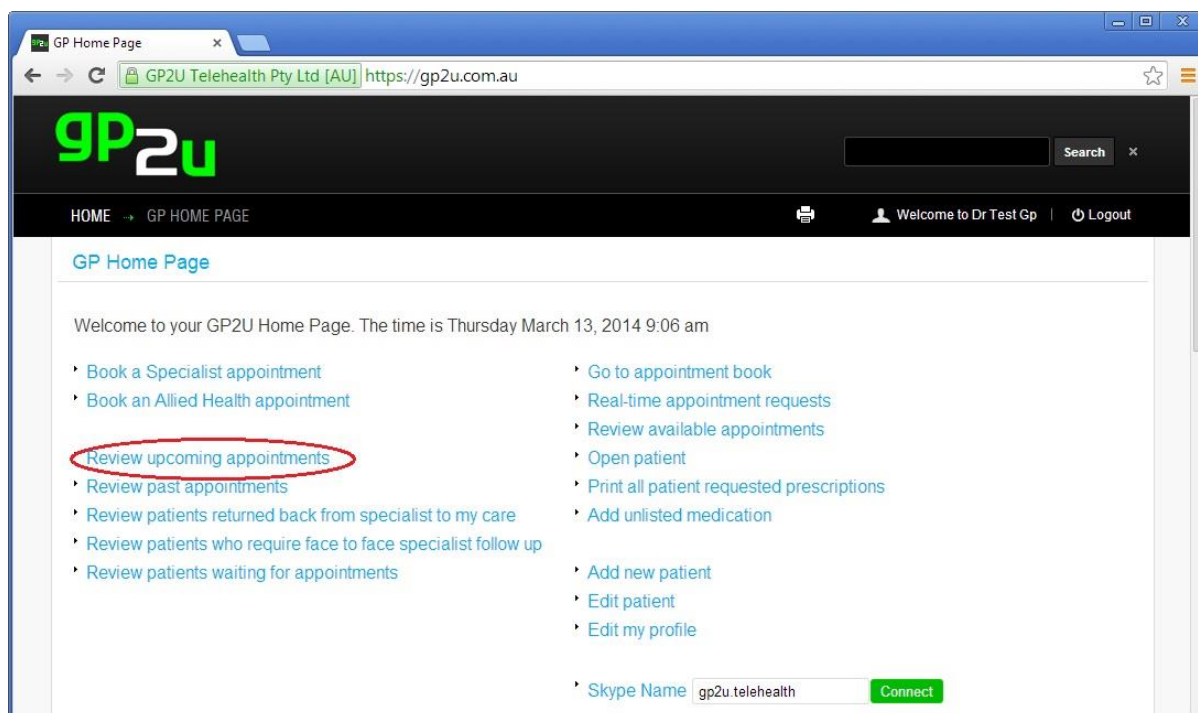

The referral text is provided so the GP can add it to their notes in their PMS if desired.

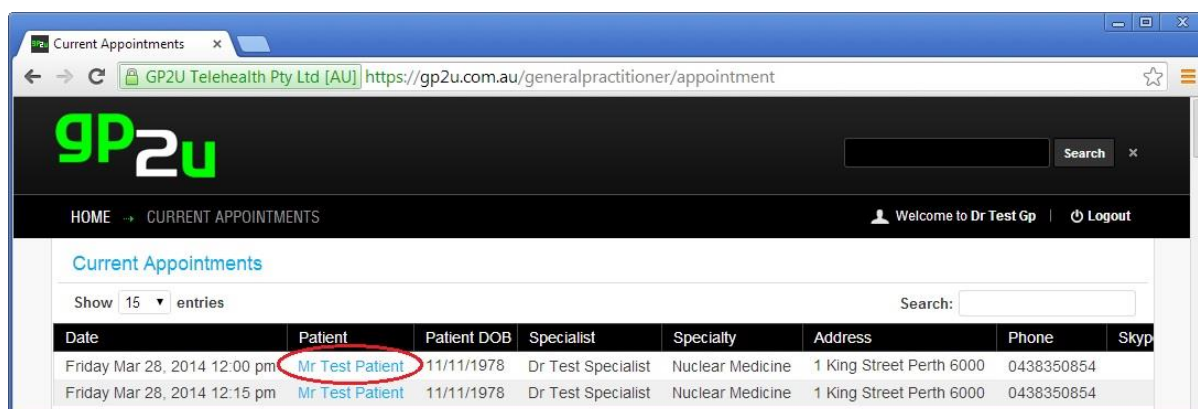

In the same way as when you book an appointment, appropriate emails and reminders are sent.

REVIEW UPCOMING APPOINTMENTS

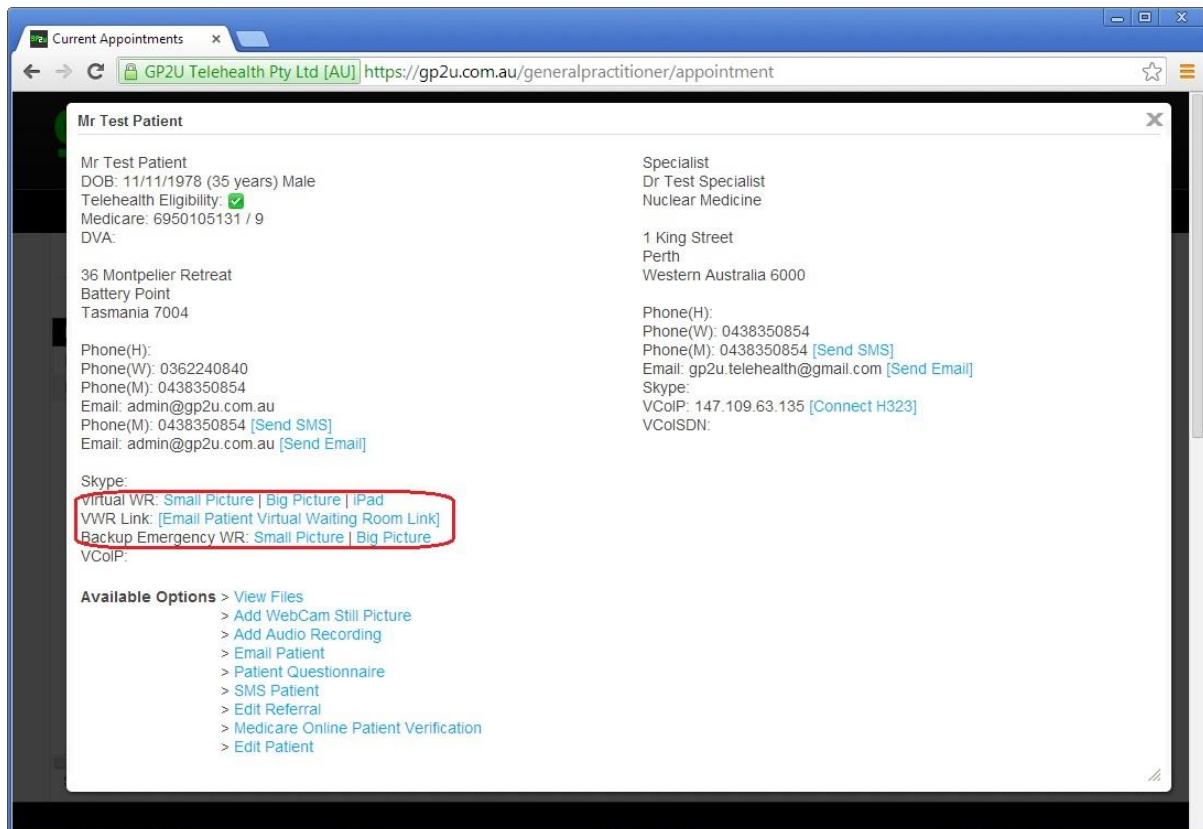

In this section a GP can see all their upcoming Telehealth appointments.

A GP just needs to click on “Review upcoming appointments”:

Which will bring up this familiar widget:

This provides the same sort of functionality you have, including a useful Virtual WR Link to allow you to connect to the Virtual Waiting Room.

And that's all folks!
